Re: Land Negotiations
Lake Lewisville
Lewisville, TX
Date: Feb. 17, 2016

I am opposed to opening land to drilling, especially fracking, at, on or near Lake Lewisville Texas. It is an unstable area. It is the 8th worst dam in the United States. It is a major water source for surrounding cities. Enough is enough. While you may wiggle the words to make people believe that fracking does not cause unstable faults to move, the water injection and the processes during and after do. To deny that is foolish.

I grew up in Southeastern New Mexico and West Texas. My father patented several drill bits for Dresser that were used in this specific part of the oil industry. I do know the history, the facts and the results that people live with from this type of drilling. This is not the place for it.

Sincerely,

Deborah Canterbury
