Re: Protesting the Auction of gas drilling rights to lake Lewisville, TX  
It has been brought to our attention by media and those concerned in the community that there are intentions to drill for mineral oil under the lake Lewisville. As 16 year residents and citizens of The Colony, we hereby would like to enter our plead and protest this effort to drill under our lake. Lake Lewisville is our the sole source for our drinking water, our beaches, and our wet lands and as such, we would like to keep it free of contamination, chemical and possibility of seismic movements.  
Thank you
