Subject: Protest of drilling a gas well

I would like for it to go on record that I am protesting the drilling of a gas well in or around the Lewisville Lake Reservoir. We events in California concerning gas leaks and the contaminated water in Flint Michigan I just don't believe it is the responsible thing to do. There are hundreds of thousands of people that depend on the water from this lake. The argument at that it would not contaminate the lake but possibly ground water which seems to be a problem in some areas of the country is terrible. As we all know Texas is known for having droughts. With the droughts and the increased number of people moving into this area it is just a matter of time before we will be depending on the ground water too.

Thank you for allowing me to provide my opinion. Please don't let the money take the place of being good steward to our environment.
