To Whom It May Concern:

I am formally protesting the leasing of land around Lake Lewisville in Texas.
You have got to be out of your mind to even consider this leasing option.

Possible contamination of the lake which is a HUGE drinking water supply for the DFW metroplex, possible other poisoning issues due to the chemicals used in fracking.

EARTHQUAKE possibilities which we KNOW happen due to the fracking for oil.
Azle, Irving, Springtown in Texas to name a few cities that have quake issues due to fracking.

Apparently insurance companies will not cover structure damages caused by man-made earthquakes associated with oil and gas production.

The lease parcels are extremely close to developed residential neighborhoods that could and will be harmed with the heavy industrial process that starts with the development of the padsite prep throughout the well completion.

I am protesting ALL lease parcels in the Hickory Creek Branch of Lake Lewisville in Texas.

Don't do this. You shouldn't do this. This isn't right and it's just another Flint Michigan water crisis waiting to happen.

An extremely concerned citizen,

Elizabeth Anderson
