

Fax objecting to drilling in, on or close to Lake Lewisville in North Texas

505-954-2010 Feb. 14, 2016

*The Bureau of Land Management New Mexico Office
P.O. Box 27115
Santa Fe, NM 87502-0115*

*We STRONGLY object to drilling in, on or anywhere close to Lake Lewisville in North Texas!
The Lake is an important water source for many communities.*

You should not risk the possibility of any potential contamination. You may feel that drilling is safe, but things can go wrong in the future and it is not right to jeopardize a water source for so many people and future generation. It would be an irresponsible and reprehensible act.

Please do not allow this!

Sincerely,

[REDACTED]
