To Whom It May Concern:

I respectfully ask the BLM to reconsider leasing out part of Lewisville Lake to be used for drilling rights. It is our main source of water for the Dallas, Denton and surrounding areas. The dam here is already very unstable and any fracking could have catastrophic results for our large metropolitan area. Obviously humans and wildlife could be in great danger. The price of oil is very low right now, so one wonders why anyone would want to frack and cause a great deal of environmental damage to our area.

Please reconsider auctioning off this area for drilling. Many, many people here are worried about this action and we ask you once again to reconsider doing this.

Sincerely,

A handwritten signature in cursive script that reads "Karen D. Winder".
