BLM and to all
to whom it may concern
and it should concern
us all:

The recent news of the leasing
of Lewisville Lake for possible
drilling has left me and many
of my thoughtful, sensible
friends appalled. Such an important
water source and already precarious
dam to be considered for
drilling is dumb and ill-considered.
The reasoning behind its feasibility
is nothing other than greed with
no regard as to the harm that
could be done. There is a glut,
prices will be down for a long
time - why jeopardize the Lake
Lewisville Lake area. Water is
more precious than petroleum!
I pray that BLM and all parties

involved in the decision making process
will have the wisdom to put in place
an agreement that will protect
further exploitation for profit
of this precious resource of
life-giving necessary water.

Any so-called benefits of drilling
such an area are dangerously sinful
if you have any concept of
stewardship of this generous and
bountiful earth we are given to
live on (wisely).

Please consider, oh so seriously,
the gravity of short-sightedness
in this matter. Do ^{not} ^{put} up for
auction the Lake Lewisville
property for leasing.

I am 90 years old and my main
income is from oil leases. I'm not
"anti-oil" but this, Lake Lewisville,
is a no-no.
