Reference: Possible Sale of Drilling Rights under Lake Lewisville, Texas for Oil Fracking
to Northwood Land Services of Fort Worth Texas

Gentlemen:

PLEASE DO NOT PLACE THE INTERESTS OF OIL DRILLING COMPANIES ABOVE THOSE OF
THE RESIDENTS OF THIS AREA!

There are many reasons this is a bad idea. For one, it would have a negative economic impact on the area. This is an area of million dollar homes and lakefront properties which would be affected.

Lake Lewisville provides drinking water for millions of Dallas Fort Worth residents, and this important water supply should not be endangered by possible fracking accidents, such as those which have already happened in another Dallas suburb, Arlington.

There have been earthquakes and seismic activity in the Arlington and Irving areas caused by fracking activity. It is not safe to do this, especially in an urban area.

We do not have the infrastructure to handle a wellhead accident or an evacuation. Our local Fire and Police do not have the training or manpower required to handle these types of accidents. Toxic, radioactive fracking waste would be trucked from the lake to a disposal site. This would mean large amounts of chemicals being transported routinely in the well-populated area, and we are not prepared for that.

This is the nearest lake and recreation to me and my neighbors. Please do not allow fracking under this lake. It is not fair or right that the current citizens should be subjected to this practice. We need to keep this lake clean and unpolluted for ourselves and our children and grandchildren.

PLEASE DENY THIS REQUEST BY NORTHWOOD LAND SERVICES OF FORT WORTH.

Thank you for your consideration. Please protect our environment and population.

Sincerely,

Marion Lynn Meltzer
