To whom it may concern,

My husband and I would like to add our voices to the protest against the auction of drilling rights to land around Lewisville Lake in North Texas. We do not want fracking to occur in our backyard, as it has been shown to contribute to earthquakes and may endanger local drinking water.

We were not told about the public review period regarding this matter, and we only found out about the potential fracking through local media reports. We feel strongly that Lewisville Lake should not be drilled, as it supplies water to hundreds of thousands of local residents and has a dam that is already in bad shape. The potential for damage to the lake's water and dam greatly outweighs the financial benefits that fracking may bring the area.

As residents who have invested significant money into our home and hope to reside here for years to come, we know that fracking could jeopardize our future here. We urge you to cancel the land auction and protect the waters of Lewisville Lake.

Thank you,

Megan Costa

Resident of The Colony, TX
