Re: Lease of Drilling Rights underneath Lake Lewisville

To whom it may concern;

I am writing to protest the April 20, 2016 auction of the mineral rights under Lake Lewisville.

I do not wish The Bureau of Land Management to allow the auctioning of mineral rights and any drilling associated with the lease. There is too much potential for health and safety risks associated with drilling for natural resources. Lake Lewisville is used for recreational purposes such as fishing and it also supplies drinking water for the region. It is my understanding that there have been studies done to indicate no hazards to environment or individuals but honestly, we all know there are always risks with any operation.

Please do not auction any part of land or its mineral rights that is under or adjacent to Lake Lewisville. Thank you for your consideration.

Sincerely,

Jon Dahlvig
