Re: BLM gas leases @ Lake Lewisville in Tex

My name is Kim Feil of Arlington TX and I am protesting ALL lease parcels in the Hickory Creek Branch of Lake Lewisville in Texas.

I oppose any urban drilling w/o having first a health environmental impact study. Also home devaluation is an issue as is loss of life & property should seismic or subsidence activity causes the dam to breach.

Gas prices are too low & fracking is not economical and worsens global warming w/so many methane leaks.

Homes also could have trouble being insured as well as financing homes federally could be an issue: foreclosures.

In Arlington, our TTHM's have almost tripled with the correlation to when we started urban drilling in 2007.

Please do not allow BLM gas leases @ Lake Lewisville
