PO Box 27115
Santa Fe, NM 87502

7 August 2014

Director Luen

We are writing to protest the sales of Parcel NM-201
001, and 004-015 to be offered for lease in the BLM of
Lease Sale, 22 Oct 2014.

Why?

We have lived and farmed in Abiquiu for 12 years -
hay, grapes and animals. I am a PhD in Wildlife
Biology having researched how poisons affect our
wildlife. We have an understanding of the current
impacts of oil & gas exploitation on the air, land, water
wildlife, farming and especially public health. We
understand how long problems resulting from drilling
can impact our ecosystems. Steel rusts and breaks
concrete erodes. Remaining (60%) waste fluids
can leak into geologic strata and aquifers
upon which our lives depend. Your life, too.

Fracking fluids contain very toxic compounds that
can cause deleterious impacts in the parts per
billion range. If these fluids enter the Rio
Chama then Rio Grande 56% of NM water
can be poisoned not to mention Mexico.

Please serve the people of our country
by stopping the lease sale of these parcels.
Thank you
Isabel & Samuel Jewell
