Petition to the BLM to defer action on leasing the USF and Lindrith Parcels of the Oct. 2014 Competitive Oil and Gas Lease Sale

Petition summary and background	We are citizens calling for a halt on further oil and gas development in the Frontier District in order to protect the Rio Chama Watershed.
Action petitioned for	We support this conclusion from the BLM Environmental Assessment: "If the BLM were to forego leasing and potential development of the proposed parcels, the assumption is that the public's demand for the resource would not be expected to change. Instead, the mineral resource foregone would be replaced in the short- and long-term by other sources that may include a combination of imports, using alternative energy sources (e.g. wind, solar), and other domestic production. This offset in supply would result in a no net gain for oil and gas domestic production."
