8/13/2014

Dear Director Juen,

My name is WhiteEagle Schmidt and I am writing to protest the proposed sales of parcels NM-201410-001, 004 thru 015 that will be offered up for lease in the BLM Competitive Oil and Gas Lease Sale, October 22, 2014.

### Interest in Protesting

I am a resident of Youngsville, and my family moved into this area in 2005. My income is based on the integrity and beauty of this land as I have visitors from around the world staying and studying. Clean water is paramount to this land we own and we cannot afford to have our water resource ruined to completely diminish the priceless value of our investment and improvements.

### Reasons for Protesting

I understand the importance of clean water, and a functioning ecosystem for the health of our community. Without clean water we cannot hope to thrive in our traditional lands. We live with a limited amount of water in our part of the world, and I am concerned about the 2-10 million gallons of water that is used for each well in this process. I highly protest this misuse of the limited resource of water.

Chemicals used in hydraulic fracturing are known to cause cancer, neurological, and other health problems. There have been many examples of spills and groundwater contamination, despite the efforts of private oil and gas companies. The risk of polluting our precious water is too great. If our water is affected it is the residents who will have to live with the consequences, not these companies.

The waters in Gallina and Regina flow into the Rio Chama and any pollution will also affect our neighbors down river all throughout the state.

Our forests are vulnerable to forest fires because of extreme drought, and the hydraulic fracturing process involves many fire risks. Wells have exploded and caught fire, and the flaring of natural gas burn off can
