Herd Management Areas (HMA) and Herd Areas (HA) have been placed in separate tables by state.

The population estimation method used on the majority of HMAs is the simultaneous double count method.

Most of the 177 HMAs have been counted with this method. Ground counts are still done on smaller areas where animals are easier to identify.

Populations do not reflect any changes after March 1, 2025 (i.e. foal crops or gathers).

BLM policy is to establish Appropriate Management Levels (AML) as a range with upper and lower levels.

Acres have been calculated using current digitized (GIS) maps using the UTM (Universal Transverse Mercator) projections.

Acreage transferred from BLM to another agency are not deducted from the HA acreage.

HA acreage totals are calculated based on designations made in the early 1970's.

1. High End AML is reported as the maximum number of animals sustainable on a yearlong basis.
2. Most Recent Year @ AML is the last time AML was achieved on the HMA.
3. Three Rivers Complex -AML-509; includes Alamo, Big Sandy, Havasu HMAs.
4. % of AML: If estimated population is above High AML, this value is the estimated population divided by the High AML (as a percentage of High AML).
- "Below Low AML" means that the estimate is below the low AML. "Within AML" means that the estimate is between Low AML and High AML.
5. Last Gather Mo/Year is based on 10 or more animals removed during the fiscal year.
6. Population estimates are based on statistically analyzed aerial survey data, aerial survey direct counts, ground counts, post gather inferences, and prior year's reported populations.
7. Animals listed as Outside Herd Areas are BLM animals outside of a Herd Area. Other animals (estrays, DODs jurisdiction) are not listed in the totals.

- High End AML is reported as the maximum number of animals sustainable on a yearlong basis.
- Most Recent Year @ AML is the last time AML was achieved on the HMA.
- HMA's created from other HAs will not have acres in the HA columns.
- Fort Sage AML is established in both CA (29) & NV (36)
- % of AML: If estimated population is above High AML, this value is the estimated population divided by the High AML (as a percentage of High AML). "Below Low AML" means that the estimate is below the low AML. "Within AML" means that the estimate is between Low AML and High AML.
- Last Gather Mo/Year is based on 10 or more animals removed during the fiscal year.
- Animals listed as Outside Herd Areas are BLM animals outside of a Herd Area. Other animals (estrays, DODs jurisdiction) are not listed in the totals.
- Burros from the AZ Havasu HMA on the California side of the Colorado River are included in the Chemehuevi HMA.
- Burros from the AZ Cibola-Trigo HMA on the California side of the Colorado River are reported as part of the Chocolate-Mules HMA.
- Population counts include statistically analyzed aerial survey data, aerial survey direct counts, ground counts, post gather inferences, and prior year's reported populations.
- Centennial Burro numbers are associated with Centennial HA.

1. High End AML is reported as the maximum number of animals sustainable on a yearlong basis.
2. Most Recent Year @ AML is the last time AML was achieved on the HMA.
3. % of AML: If estimated population is above High AML, this value is the estimated population divided by the High AML (as a percentage of High AML).
"Below Low AML" means that the estimate is below the low AML. "Within AML" means that the estimate is between Low AML and High AML.
4. Last Gather Mo/Year is based on 10 or more animals removed during the fiscal year.
5. Population counts include statistically analyzed aerial survey data, aerial survey direct counts, ground counts, post gather inferences, and prior year's reported populations.
6. Horses temporarily removed due to wildfire

- High End AML is reported as the maximum number of animals sustainable on a yearlong basis.
- Most Recent Year @ AML is the last time AML was achieved on the HMA.
- HMAs created from other HAs will not have acres in the HA columns.
- Fort Sage AML is established in both CA (29) & NV (36); administered by CA.
- % of AML: If estimated population is above High AML, this value is the estimated population divided by the High AML (as a percentage of High AML).
- "Below Low AML" means that the estimate is below the low AML. "Within AML" means that the estimate is between Low AML and High AML.
- Never designated -Managed as interim HMAs within Spring Mountain HA.
- Last Gather Mo/Year is based on 10 or more animals removed during the fiscal year.
- No low AML was established. Identified Low AML is based on 60% of AML.
- There are over 840 estray (state) horses on the Pah Rah HA.
- Animals listed as Outside Herd Areas are BLM animals outside of a Herd Area. Other animals (estrays, DODs jurisdiction) are not listed in the totals.
- Population estimates are based on statistically analyzed aerial survey data, aerial survey direct counts, infrared aerial surveys, ground counts, post gather inferences, and prior year's reported populations.

1. High End AML is reported as the maximum number of animals sustainable on a yearlong basis.
2. Most Recent Year @ AML is the last time AML was achieved on the HMA.
3. Horses on the FS winter on BLM but spend the rest of the time on FS land. Numbers will fluctuate with the weather and range conditions.
4. % of AML: If estimated population is above High AML, this value is the estimated population divided by the High AML (as a percentage of High AML).
*Below Low AML" means that the estimate is below the low AML. "Within AML" means that the estimate is between Low AML and High AML.
5. Last Gather Mo/Year is based on 10 or more animals removed during the fiscal year.
6. Population counts include statistically analyzed aerial survey data, aerial survey direct counts, ground counts, post gather inferences, and prior year's reported populations.

- High End AML is reported as the maximum number of animals sustainable on a yearlong basis.
- Most Recent Year @ AML is the last time AML was achieved on the HMA.
- HMAs managed within the Bible Springs Complex include: Bible Springs, Four Mile, and Tilly Creek.
- % of AML: If estimated population is above High AML, this value is the estimated population divided by the High AML (as a percentage of High AML).
- *Below Low AML* means that the estimate is below the low AML. "Within AML" means that the estimate is between Low AML and High AML.
- Last Gather Mo/Year is based on 10 or more animals removed during the fiscal year.
- Animals listed as Outside Herd Areas are BLM animals outside of a Herd Area. Other animals (estrays, DODs jurisdiction) are not listed in the totals.
- Population counts include statistically analyzed aerial survey data, aerial survey direct counts, ground counts, post gather inferences, and prior year's reported populations.
- Outside herd areas include: Mineral Range (35) and Partoun/Deep Creeks (30) = 65.

- High End AML is reported as the maximum number of animals sustainable on a yearlong basis.
- Most Recent Year @ AML is the last time AML was achieved on the HMA.
- HMAs created from other HAs will not have acres in the HA columns.
- % of AML: If estimated population is above High AML, this value is the estimated population divided by the High AML (as a percentage of High AML). "Below Low AML" means that the estimate is below the low AML. "Within AML" means that the estimate is between Low AML and High AML.
- Gather Mo/Year is based on 10 or more animals removed during the fiscal year.
- Population counts include statistically analyzed aerial survey data, aerial survey direct counts, ground counts, post gather inferences, and prior year's reported populations.
- Animals listed as Outside Herd Areas are BLM animals outside of a Herd Area. Other animals (estrays, DODs jurisdiction) are not listed in the totals.
- Pending upcoming post-gather aerial survey results.
