TOWNSHIP 4 SOUTH, RANGE 26 EAST, MOUNT DIABLO MERIDIAN, CALIFORNIA AMENDED PROTRACTION DIAGRAM OF UNSURVEYED AREA

This amended protraction diagram supersedes that portion of the Protraction Diagram 113 representing this township, and was prepared for the express purpose of showing the unsurveyed area. It does not constitute an official survey and shall not be used for extending the rectangular survey system from these unsurveyed lands and may be used for zoning and other purposes only.

The actual area of unsurveyed blocks (B) shown on this diagram may vary from the reliability of the survey information used to determine the position of existing surveyed boundaries. A protraction block cannot be subdivided without an official survey.

Unless otherwise shown, all unsurveyed sections designated on the diagram contain 360 acres. The sections and lots on this diagram shall be the same as they were at the time they were surveyed and shall continue to be surveyed lands.

Data shown in parentheses () is the survey information for the plan of survey and is subject to change. Sections and longitudes were surveyed in survey standard protracted sections using an elevation of 3600 feet for this township.

Geographic Coordinates - 3600 feet

Section	Latitude	Longitude

The anti-boundaries of surveyed areas for protracting the amended protraction diagram (APD) and for the other 360-acre lands in the area, are derived from the 360/360 Geographic Coordinate Data Base (GCD). The lake polygons were extracted from the U.S. Forest Service 7 1/2" Cartographic Vector File (CVF) as digitized from USGS Quad-Range Maps.

The boundaries of the Devil's Pole National Monument have not been surveyed. They are shown herein, based on the 1911 observation's beginning point (the 360-acre) being at the southeast corner of the section, has been digitized from the USGS "Crystal Creek" 7 1/2" Quad-range Map.

Section 484-792 represents USFS Wilderness, and 360/360 for a Recreation Area. In order to protect this Wilderness, this APD is based on the 360-112 data.

UNITED STATES DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
Sacramento, California

This diagram represents the official protraction of the rectangular system of survey, and is hereby accepted.
