Appraised prices are determined by comparable sales data. Prospective purchasers are urged to make their own appraisals and determine their own quality and quantity of timber being offered.

6. DURATION OF CONTRACT AND SEASON OF OPERATION:

The duration of the contract will be forty-eight months. Extension will not ordinarily be granted. If circumstances do warrant an extension, the timber will be reappraised, but the reappraised price will not be lower than the original bid price or previous reappraisals.

Operations, including hauling, will be allowed from July 1 through November 14, each year, with possible localized suspensions for raptor and migratory bird nesting – refer to Section 44, Special Provisions, in the contract.

7. ACCESS AND ROADS:

BLM-provided access to the sale area shall be via U.S. Highway 287, BLM Road 2411 (Green Mountain Loop Road), and existing primitive dirt roads.

Purchaser may elect to haul using the Mine Road on the south side of Green Mountain instead of the west loop of BLM Road 2411, however, this is a privately owned road with privately owned gates and BLM does not provide access to this road. Purchaser shall be responsible for obtaining permission from Kennecott Aluminum if Purchaser elects to use this road.

The Purchaser shall be required to maintain the primitive dirt roads as Purchaser performed maintenance as specified in Section 44, Special Provisions.

Construction of new roads is not necessary. From BLM Roads 3411, existing primitive roads access all units, and Purchaser shall maintain or improve these existing primitive roads to the minimum standard necessary for safe hauling.

Access across State of Wyoming lands – Purchaser will be required to purchase wood products from the State of Wyoming to be allowed to haul BLM timber from Unit 1 across the State Section in T28N, R92W, Sec 36. For more information, contact Frank Mitchem, Wyoming State Forester, at (307) 856-8655.

The boundaries of all cutting units are marked with blue paint. Slash will be piled. The topography ranges from 0 – 15% slope.

Harvest trees are designated by description: All lodgepole pine, live and dead, that meet minimum merchantability requirements and are accessible to equipment, and are not marked with paint as leave or boundary trees, are available for harvest. Species other than lodgepole pine shall be retained as leave trees and protected from damage due to operations.

Prospective bidders are encouraged to inspect the sale area prior to bidding. The sale units are currently open to public access via public roads.
