

CANYONS OF THE ANCIENTS
NATIONAL MONUMENT

Telescope Workshop

Are you interested in learning about telescopes to explore the night sky? Perhaps you have a telescope but aren't sure how to set it up?

Canyons of the Ancients Visitor Center and Museum is offering a beginner's telescope workshop. Bring your telescope to us, and experienced stargazer Dani Long will cover the basic mechanics, how to align your finderscope, the role of different lenses, care for your instrument, and any questions you may have. This will be an afternoon workshop, so you can see the parts of the telescope as you learn. Don't have a scope of your own? We'll have a few you can try out. You'll leave with greater confidence in operating your telescope, and handouts with some great night sky targets you can check out after the workshop.
