Dear Nicole: Please include the attached graphics as supplements to the comments I sent on Aug. 8 (attached here with my original message). These help to illustrate some of the points in my letter.

Fig. 1 is a photo taken 24 Jun 2018 by Dr. Matt Nolan of 3-D seismic trails west of the Canning River just outside the 1002 Area.

Fig. 2 is a grid generated by Matt Nolan that shows the network of 3-D seismic trails that would be necessary to survey the 1002 Area at 1300-foot intervals between the trails.

Fig. 3 is a photo taken by Heather Buelow, a researcher at the Toolik Lake Field Station, as she flying by helicopter to her research site. This site is located about 75 miles north of the Toolik Field Station

Thanks for including these with other the comments regarding the planned seismic survey.
