August 17, 2018

To BLM regarding the Arctic Refuge coastal plain application for seismic exploration:

Please address the relationship between this proposed seismic exploration effort and the Coastal Plain leasing EIS, including how the results of any such seismic program might inform the location of an Arctic Refuge Coastal Plain lease sale, for which areas of the coastal plain of the highest potential for the discovery of hydrocarbons are relevant per the Tax Act. Also, please address whether it is possible to gather information regarding hydrocarbon potential under the coastal plain from technologies other than those proposed by SAEExploraiotn, including the use of LIDAR or other less intrusive and damaging technologies.

Thank you,

Adam Kolton
