To: "blm_ak_coastal_plain_seismic_ea@blm.gov" <blm_ak_coastal_plain_seismic_ea@blm.gov>

To BLM:

Have you consulted Dr. Matt Nolan and his photogrammetry survey work on the North Slope? It suggests that the footprint for seismic testing is heavier than the politicians would like us to believe.

What evidence do you have that seismic testing does not adversely affect the landscape of area 1002?

What evidence do you have that seismic testing will not affect hydrology and ecology of the 1002?

There are many politicians mouthing assurances but they are paid by oil and gas corporations. BLM should do better than obey the procedural agenda to get permits for those corporations. The bosses are boasting already.

Evidence! Links to actual scientific research. That's the least BLM owes citizens.
