## How to Use the New Records Schedules

Developing and maintaining records disposition schedules is a critical component of a records management program. Scheduling records is the process of developing a document that provides mandatory instructions for what to do with records (and nonrecord materials) no longer needed for current government business. Records schedules provide for the selective retention of records of continuing or permanent value and the destruction of records of temporary value. Schedules should describe all agency records and prescribe a cutoff date for each record series, after which a particular disposition action must be taken.

Records Schedules authorize, after specified periods of time, the destruction of temporary records or the transfer of permanent records to the National Archives of the United States. The DRS/GRS/BLM Combined Records Schedules are a combination of schedules developed by the National Archives and Records Administration (NARA), the Department of the Interior (DOI) and the Bureau of Land Management (BLM). They constitute the only legal authority the Bureau has to dispose of its records.

- 1. Relationships between the NARA's General Records Schedules (GRS), DOI's Departmental Records Schedule (DRS) and the Bureau's records schedules.** The DRS/GRS/BLM Combined Records Schedules incorporate the records described in the GRS, the DRS, and records unique to BLM. NARA issues the GRS to provide disposition authority for records common to several or all federal agencies. The GRS covers records documenting administrative or housekeeping functions (personnel, payroll, procurement, etc.) rather than program functions. Disposition requirements are mandatory and must be applied except when the BLM has received NARA approval for a different retention period (also known as Exception to GRS).

Any BLM disposition authority takes precedent until superseded by a change. The DRS disposition authority takes precedent beginning with the stated timeframe. Changes to the GRS disposition authority are retroactive for any records in BLM custody or at the FRC.

- 2. Arrangement.** The DRS/GRS/BLM Combined Records Schedules are arranged numerically 1 through 32. Each numbered schedule defines a group of records that relate to a particular subject, function, or some other common relationship (e.g., Schedule 1 describes personnel records; Schedule 10 describes motor vehicle records).
- 3. Format.** Each schedule is subdivided into items with alpha-numeric designations for each records series. A series is a collection of records that have a well-defined internal relationship. A series consists of file units or documents arranged according to a filing system or kept together because they relate to a particular subject or function, result from the same activity, document a specific kind of action, take a particular physical form, or because of some other relationship arising out of their creation, receipt, or use. Series are generally handled as a unit for disposition purposes. Each record within a series has the same retention period and disposition action.
- 4. Individual Schedule Components.** Each schedule is comprised of an introduction followed by additional pages that present the series descriptions and disposition authorities.
  - a. Introduction.** The introduction of each schedule provides an overview of the records and describes any additional NARA requirements.
  - b. Series Description and Disposition Authority Columns.**
    - **Item.** A sequential alphanumeric identifier for each item row. May be followed by DRS reference number (e.g., DRS 3.1-0002) when disposition authority is from DRS (i.e., DAA-0048-2013-0008-0002) or GRS reference number (e.g., GRS 2.8-010) when disposition authority is from GRS (i.e., DAA-GRS-2014-0005-0001).
    - **Record Series Description.** The series descriptions contain the records series title, subject code, a general description of the documents or data in the series, and their arrangement, followed by the more detailed information that is described below:

## DRS/GRS/BLM Combined Records Schedules

### How to Use the New Records Schedules

- Authority. The authorizing law or directive is usually shown by a citation to the relevant Code of Federal Regulations or U.S. Code. Some authorities contain recordkeeping instructions. When the authorities are extensive, a cross-reference is provided to the BLM Manual where the list of authorities can be found.
  - Forms. Forms are described in the series descriptions by their numbers only; for brevity, form titles are not provided. See the Forms Index for a listing of forms indexed by schedule and item.
  - Confidentiality. The records access category number and, if applicable, the Privacy Act system number is included in the series description. This alerts records custodians to those files that must be protected from unauthorized access as required by the BLM Manual 1278 and helps the Federal Records Center (FRC) identify records whose destruction must be witnessed to protect confidential information.
  - Essential (Vital) Records Status. Records that are essential to the continued functioning of an organization (during and after an emergency) and records essential to the protection of legal and financial rights of the BLM and the public are identified as essential (vital) in the series description. If records are essential (vital), they must be managed according to the essential (vital) records program plan as required by the BLM Manual 1273. If a record is not essential (vital), the description will not include: Essential (Vital): Legal and financial rights records or Essential (Vital): Emergency operating records.
  - Location. The BLM is a decentralized Bureau whose policy is to delegate authorities to the lowest organizational level possible, consistent with efficient program management. The records needed to carry out those delegations are also placed at the lowest level possible. Because the delegation of authority may differ from State to State, the organizational unit where the records are located may also differ. This makes it difficult to specify the exact office of record on an organizational level.
  - When the office of record is consistent throughout the BLM, the specific organizational unit is cited (e.g., official personnel files are maintained by Personnel Offices at Washington Office (WO), Centers, and State Offices (SO)). When the location cited is "all" or "AFO" (All Field Offices) this means the series is usually found in most BLM offices; however, some offices may not maintain such records. When the location cited is "FO" (Field Office) this refers to a Field Office regardless of what it is called (e.g., Field Station, District Office, Field Office). Specific references to Centers are identified as NOC (National Operations Center, previously identified as NIRMC or SC or Service Center), NIFC (National Interagency Fire Center), or as Centers.
  - Exclusion Statements. Exclusion statements are added to some series descriptions. These statements are used to cross-reference record series that may be similar in title and function but which have different filing and disposition requirements.
- c. Disposition Authority. The disposition authority column identifies the records as either permanent or temporary and provides instructions for cutting off the files and their ultimate disposition - either by transfer or destruction.
- Permanent versus Temporary. All records are either permanent or temporary. All permanent records must eventually be transferred to NARA. All temporary records will eventually be destroyed either by BLM or the FRC. Even records with very lengthy retention periods (e.g., 50 to 75 years) are still temporary records.

## DRS/GRS/BLM Combined Records Schedules

### How to Use the New Records Schedules

- Cutoff Instructions. Cutting off files involves breaking or ending files at regular intervals, usually at fiscal or calendar year end, to permit their disposal or transfer. Case files are usually cutoff at end of the fiscal year in which they close.
- Disposition Instructions.
  - Permanent Records. Permanent records are never destroyed and are always identified for transfer to NARA at a specific time after cutoff. Permanent records are transferred to the FRC and then later transferred by the FRC to National Archives during NARA's annual move process. Permanent records may be transferred directly to the National Archives if they have met their disposition.
  - Temporary Records. All temporary records are scheduled for destruction, either at their cutoff date, or after a specific period of time after cutoff. Temporary records may be transferred to FRC where they will be destroyed when they reach their authorized disposal date. The volume of records and the retention period commonly dictate when files should be transferred to the FRC.
  - Specific Disposition Instructions: The disposition instruction will have a "Use" statement followed by the proper disposition authority citation and retention period that is mandatory to follow for records located within BLM offices. This may be followed by a statement for records that were previously shipped to the FRC where the disposition authority and retention period changed for those records and were applied retroactively. This may be followed by a "Former Authority" which is used as a reference for records at the FRC that may be identified on a Notice of Eligibility for Disposal (NA Form 13001) or on a Records Transmittal and Receipt (SF-135). Any records (excluding those at the FRC that have a retroactive change) must be disposed of according to the "Use" instructions.

All BLM records are shipped to the FRC under Records Group 049. Even though the DRS disposal authority cites record group 048, BLM records will still be identified for transfer under record group 049.

When sending records to the FRC, the proper disposition authority citation must be used.

- For DRS authorities use the Departmental Records Schedule Number (e.g., DAA-0048-2013-0001) followed by the applicable sequential number. For example: DAA-0048-2013-0001-0004. The "DRS 1.2A" in the Item column is a DRS reference number used to locate the authority in the Departmental Records Schedule so the corresponding title may be entered in the Description of Records field in ARCIS.
- For GRS authorities use the GRS Disposition Authority (e.g., DAA-GRS-2013-0003-0002). NARA suggests, for informational purposes, please include schedule and item number, for example, "DAA-GRS-2013-0003-0002 (GRS 1.1, item 011)." The GRS Schedule number and item number (e.g., GRS 1.1, item 011) is used to locate the authority in the new GRS so the corresponding title may be entered in the Description of Records field in ARCIS
- For BLM authorities, cite the specific schedule and item number (e.g., BLM 4/7c(1)).

## DRS/GRS/BLM Combined Records Schedules

### How to Use the New Records Schedules

- DRS, GRS or NARA Disposal Authority Citations. A reference to the GRS or a NARA number is at the end of each disposition authority. A GRS citation means the disposition authority is from the GRS. A NARA number means the records were approved for disposition under an SF-115 submitted by the BLM.
5. **Finding Aids.** Finding aids are available to assist users: (1) the subject index is an alphabetical listing of records with corresponding schedule and item number(s); (2) the forms index is a numerical listing of all forms mentioned in the series descriptions and their titles indexed by schedule and item number.
  6. **Reserved** is used as a placeholder.

## DRS/GRS/BLM Combined Records Schedules

### Schedule 1 - Civilian Personnel Records

#### Introduction

This schedule incorporates the records described in General Records Schedule and the Department Records Schedule and adds the following additional personnel records maintained by the Bureau of Land Management (BLM):

- Training aids developed by the BLM.
- The BLM volunteer personnel folders and volunteer administrative program files.
- The BLM fire experience and qualifications files.

Personnel records relate to the supervision over and management of Federal civilian employees and volunteers. This schedule covers the disposition of all Official Personnel Folders (OPFs) of the BLM employees and other records relating to personnel and volunteers, regardless of location.

The most important type of records - OPFs, Service Record Cards, and Employee Medical Folders - are maintained according to The Guide to Personnel Recordkeeping, an Office of Personnel Management (OPM) manual that prescribes a system of recordkeeping for Federal personnel.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

## DRS/GRS/BLM Combined Records Schedules

### Schedule 2 - Payrolling and Pay Administration Records

#### Introduction

The Department of the Interior Business Center is the payroll office for the Bureau of Land Management (BLM) and, as such, is the office of record for most BLM payroll records. The exceptions, which the BLM must maintain, are: (1) overtime approvals, and leave slips, created outside of the electronic timekeeping system (2) retirement assistance records, and (3) wage survey files.

Payrolling and pay administration records pertain to disbursement to civilian employees of the Government for personal services. This schedule applies to the pay records that are common to all agencies, but it EXCLUDES:

- (a) retirement records (SF-2806 or equivalent) that are maintained during employee duty and then transferred to the Office of Personnel Management (OPM);
- (b) files maintained in agency space for audit by the General Accounting Office (GAO) under 31 USC 3529(c);
- (c) records relating to tax withholding, savings bonds, fidelity bonds, or other records held by the appropriate units of the Treasury Department responsible for the related Government-wide programs, and
- (d) Office of Management and Budget (OMB) files reflecting agency personnel needs and problems.

Payroll documents required by the Comptroller General (CG) for site audit are segments of the accountable officers' accounts (Schedule 6). In no event may disposal be made of records pertaining to accounts, claims, or demands involving the Government of the U.S. which have not been settled or adjusted by the GAO unless the BLM has written approval of the CG, as required by 44 USC 3309. Most civilian pay accounts are prepared and maintained in accordance with Title 6 - Pay, Leave, and Allowances and incorporated in the GAO Policy and Procedures Manual for Guidance of Federal Agencies.

In the payrolling process different types of records are accumulated. Under Title 6 of the GAO Manual these records are normally site-audited on a sample basis by GAO representatives who examine primarily the earnings record card, payroll change slips that are prepared to document changes in normal pay, certification sheets containing the signatures of the certifying officer, checklists prepared in lieu of the more formal payrolls by Department of the Treasury or local disbursing personnel, source personnel documents such as basic time and attendance reports, and copies of personnel action forms documenting changes in pay. In addition, pay registers and other accounting devices are maintained to check and balance the accounts.

All payroll systems require the maintenance of a leave record used to submit data to the payroll system. Information is posted to this record from more detailed records kept by time and attendance clerks located throughout the BLM. Depending on the type of system in operation, this leave record may be a hard-copy input form or it may be a wholly electronic input.

Other records incidental to the payroll process are employee requests for tax withholding; employee requests for Thrift Savings Plan deductions; savings bond records; and other records not pertaining to individuals, but rather to the general administration of the payrolling office and the payroll function.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

## DRS/GRS/BLM Combined Records Schedules

### Schedule 3 - Procurement, Supply, and Grant Records

#### **Introduction**

Procurement and supply records document the acquisition of goods and non-personal services, controlling the volume of stock on hand, reporting procurement needs, and related supply matters which are part of daily procurement operations. The basic procurement files reflect a considerable range of procedure, from simple, small purchases to complicated prime contractor and subcontractor operations.

Frequently, copies of procurement documents become integral parts of other files, such as project files of various types or general subject files pertaining to program operations; such copies are not covered by this schedule because they cannot be considered and evaluated separately from the files of which they are a part.

The General Accounting Office (GAO) no longer requires agencies to maintain a separate file of contracts for site audit. The Bureau of Land Management (BLM) contract files maintained in the contracting officer's office are accessible to GAO auditors and have generally been used by them in the past.

When a claim is filed by or against the Government, records relating to the claim should be retained without regard to the otherwise applicable records retention schedules which would have authorized destruction of the records prior to the time when the claim is finally resolved unless the agency has received written approval from the GAO (44 USC Section 3309 and 62 Comp. Gen. 42 (1982)). A claim is finally resolved: (1) when it is disallowed and the time for appealing the denial or instituting suit on the claim has expired; or (2) when it is allowed and paid or the amount offered in compromise is accepted and paid; or (3) when the amount found due and owing proves uncollectible because time limits for collecting the indebtedness through legal proceedings or by way of setoff have expired.

Records documenting procurement and supply are largely standardized by various regulations of the Comptroller General and the Administrator of General Services. The physical arrangement of the transaction files themselves differs in the various agencies, however. In all agencies the official contract files, for example, contain a minimum core of specified documents, but there are also other documents that vary in accordance with what the individual agency deems to be best for its own operating purposes.

The key procurement file is the transaction case file containing the formal contract or informal purchase order or lease instruments and all related papers. The documents flowing into the transaction file differ in detail, but they include, in addition to the purchase document, specifications, bids, schedules of delivery, initiating requisition, invoices, and correspondence. Other copies of these documents made for expediting and other administrative purposes are scattered throughout the inspection, shipping, expediting, and other units of the agency procurement organization.

Other files related to the procurement and supply function include reports used for supply management purposes by the agency creating the records as well as the staff agency involved with Government-wide programs. They also include local requisition and stock inventory files and other minor supply papers. Of a specialized character in the procurement field are the title papers documenting the acquisition of real property (by purchase, condemnation, donation, exchange, or otherwise). These papers are required by the Government as long as the property remains in Government hands or if it has been sold or released - conditionally or with recapture clauses. When properties are disposed of by quitclaim deeds, this fact should be confirmed prior to the disposal of title papers, since the title evidence might be needed by the Government to defend the title in the event the properties were disposed of by deeds containing general or special warranties.

It should also be ascertained that the title evidence relates only to the properties which were sold by the Government. In many instances, lands acquired by the Government are disposed of in different size parcels, and if the Government retains the title to any portion the title evidence should be retained.

This schedule does not apply to Interior Department records relating to the public domain (see Schedule 4) or to the title opinion files of the Department of Justice.

This schedule includes some of the common agency records relating to grant programs. Since many Federal

agencies conduct grant programs which document projects contracted between the agency and an outside party, these records are included as an adjunct to the procurement and supply records.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

## DRS/GRS/BLM Combined Records Schedules

### Schedule 4 - Property Use and Disposal Records

#### **Introduction**

This schedule incorporates the records described in General Records Schedule (GRS) 4 and adds the property use and disposal records that are unique to the Bureau of Land Management (BLM).

Because the public lands and their resources are government property, this schedule covers most of the records associated with carrying out the BLM mission. These mission-related records involve:

1. Land Transfers. Records associated with the transfer of public lands are the patents, other conveyances, and acquisitions files. Related records include the land status records that document the ownership and availability of the public lands.
2. Land Use. Records associated with the use of resources include material sales, wild horse and burro adoptions, use permits and leases, rights-of-way, and water rights files. Related records include resource inventories and studies and land classification and withdrawal files.
3. Planning and Environment. Records that document the planning for multiple-use and environmental quality include resource management and environmental planning files.

In no event may disposal be made of records pertaining to accounts, claims, or demands involving the Government of the United States which have not been settled or adjusted by the General Accounting Office (GAO) without written approval of the Comptroller General, as required by 44 U.S.C. 3309.

Three forms are prescribed for use by an agency selling surplus personal property under the General Services Administration (GSA) regulations:

- a. SF-114, Sale of Government Property, Invitation, and Bid, and Acceptance. Related papers that are maintained by the agencies, usually in case fashion, consist of correspondence, bids, other notices of sale, invoices, and sales slips.
- b. SF-120, Report of Excess Personal Property, and SF-121, Quarterly Report of Utilization and Disposal of Excess and Surplus Personal Property. Agencies use SF-120 to report excess personal property to the regional GSA offices, which initiate screening action. The quarterly reports are submitted to the Office of Property Management, Office of Federal Supply and Services, GSA, which consolidates the data.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

<b>6d(1)</b>	Timber and Material Sales Data Base Project History. Documenting the history of the conception, planning, and development and/or improvement of the system, excluding system documentation (item 6d(2)(a)). Consists of the concept of operations, official record designation documentation (a.k.a. records transition plan), quality assurance plans, project feasibility studies, cost benefit analyses, charters, approvals, budgets, life cycle management documentation, training plans, briefing and issue papers, and other project history information. Files may be subdivided by subject as volume warrants. Location: Oregon	TEMPORARY. (N1- 49-90-1, 4/6d1)  This schedule item is maintained for historic purposes.
<b>6d(2)</b>	Timber and Material Sales Data Base System Documentation.	See sub-items below.
<b>6d(2)(a)</b>	Documentation Necessary for Servicing and Interpreting the System. Record copies of data modeling documentation, data system specifications, file specifications, data element descriptions, code books, record layouts, user guides, output specifications, and similar documentation (regardless of media) necessary for servicing and interpreting the system. Location: Centers.	TEMPORARY. <b>Use BLM 4/6d(2)(a).</b> Destroy or delete upon authorized destruction of master file (item 6d(4)). (N1-49-90-1, 4/6d(2)(a))  This schedule item is maintained for historic purposes.
<b>6d(2)(b)</b>	Data Verification and Quality Control Files Record copies. The data verification and quality control process documents the accuracy or factuality of data through a comparison to the source data. Data sampling is a means of checking selected portions of data in a data base to determine its quality level. Error detection involves comparing the data against the source documentation and comparing it with established data standards to determine if the data is in conformance with the standards. Documentation of the sampling and error detection activities consists of the date of action, steps taken, name of parties involved, summary of errors detected with an analysis of the errors, and the date corrective actions are taken. Excludes quality assurance plans which are part of the project history files (item 6d(1)). In the event of litigation, the records in this series may be required as evidence that the system is trustworthy, accurate, and reliable. Location: All Offices.	TEMPORARY. Cutoff EOFY in which documentation is created. <b>Use BLM 4/6d(2)(b).</b> Transfer to FRC 4 years after cutoff. FRC destroys 25 years after cutoff. (N1-49-90-1, 4/6d(2)(b))  This schedule item is maintained for historic purposes.

TSIS provides direct support to BLM Mission Goals 2.4.01 and 2.4.02 related to managing the use of forest and woodland products in the Public Domain (PD) and in the Oregon and California lands (O&amp;C). TSIS is the sole automated process to track timber sale and special forest product activity and accomplishments, and it is the sole source for validation of timber sale and special forest product revenues in the BLM's financial system. This system was previously known as the Timber and Material Sales Database and scheduled under N1-049-90-1, 4/6d(4), which is superseded by schedule item 6e(1). TSIS was subsequently superseded by Forest Resource Information System (FRIS). See item 6g.</p>	<p>See sub-items below.</p> <p>This schedule item is maintained for historic purposes.</p>

<p><b>6f</b></p>	<p><b>FOREST VEGETATION INFORMATION SYSTEM (FORVIS)</b>                      The Forest Vegetation Information System (FORVIS) is a system for storage, retrieval, and analysis of data about forestlands. The system provides data management and analytical capabilities for inventorying and monitoring vegetation on forested uplands. The focus of the system is the management of attribute data about vegetation polygons and associated land management events. FORVIS is used in conjunction with the Timber Sales Information System (TSIS) to support the BLM Forest and Woodlands Management Program.                      The system allows three data collection processes or levels of data describing vegetation. The sources are (1) photo interpretation, (2) walk-through survey, and (3) plot measurements (stand examinations). FORVIS allows broad, general vegetation descriptions where funds and resource value is low. It also allows more detailed descriptions of species attributes, forest structure, and understory vegetation where the resource values warrant. Additionally, when plot measurements are taken, projections of temporal change and vegetation treatment effects are possible through links to the U. S. Forest Service's Forest Vegetation Simulator and Stand Visualization System.</p>	<p>See sub-items below.</p>
<p><b>6f(1)</b></p>	<p>Master File. The system contains information about current vegetation for specific sites. The data is used to assess and classify current conditions, potential vegetation, and site productivity. It is used to generate various models, including those that show projections and scenarios about forest growth, forest structure, and wildlife habitat. The system is also used to quantify forest products, develop silviculture, plan forest restoration treatments, and record treatment and disturbance events.</p>	<p>PERMANENT. Cutoff every 5 years.  <b>Use BLM 4/6f(1).</b>                      Transfer a copy of the master file to NARA upon approval of this schedule along with the technical documentation in accordance with 36 CFR 1235.44-50. 7	<p><b>PATENT AND OTHER CONVEYANCE FILES [1860].</b>                      Documenting serialized applications filed under the various land laws for acquisition of title to public lands, including any related contest or appeal actions. The BLM maintains the records of title evidence by which tracts of public domain lands have passed from federal to non-federal ownership. Since 1785, numerous laws have been passed governing the disposition of public lands. Some of these laws involved cash and credit sales, military bounty land warrants, homesteads, grants to states, grants to railroad corporations, and public sales. In addition, states were allowed by law, under certain conditions, to select tracts of vacant public domain. Since 1908, each patent application case was given a serial number, and then when title was transferred to the applicant, the case was given a patent number. Authority: 43 CFR 1860. Confidentiality: Public record category 1B; Privacy Act System Interior/LLM-32. Essential (Vital): Legal and Financial Rights Records. Note: Prior to 1968, all permanent patent case files were transferred via the BLM Washington Office to the National Archives in Washington, D.C. In 1968, the Regional Archives began accepting these records. However, some files maybe at Regional Archives after a review of these records was conducted.</p>	See sub-items below.

10	<b>LAND STATUS AND USE FILES [1275].</b> Records that portray ownership of public lands and availability of those lands for entry and use under the various public land laws. The public land records began with the Ordinance of 1785 which authorized the Treasury Department to survey and auction public domain land as a source of revenue. The tract books system was established around 1800. Tract books were designed primarily for the maintenance of a permanent reference by State or Territory, meridian, township, range, section and subdivisions, of all transactions involving surveyed public lands. Because the tract books were badly worn and mutilated, establishment and installation of a new records system began in 1956. The new system, which consisted of master title plats, use plats, historical indexes, and control document indexes, eventually replaced the tract book system (except in the Eastern States). Authority: 43 CFR 1813. Forms: BLM 1275-3, 4; 1810-4. Confidentiality: Public record category 1A. Essential (Vital): Legal and Financial Rights Records. Location: Masters and control files created and maintained by each SO; duplicates in AFO.	See sub-items below.
10a	Master Title Plat (MTP) Masters. Includes supplemental MTP Masters. Record-copy paper, vellum, or mylar plats that provide a composite of the survey plats of a township on which is shown ownership and land status. MTPs depict lands granted to states, acquired lands, lands patented with reservations to the U.S., public domain lands with surface and subsurface rights noted, withdrawals, classifications, and rights-of-way. In most state offices, MTPs are captured on microform (items 10f).	PERMANENT. <p><b>14a(3)</b></p>	<p><b>RANGELAND ADMINISTRATION SYSTEM (RAS)</b>                      The Rangeland Administration System (RAS) provides grazing administrative support and management reports for the BLM and the public. RAS is an electronic database which serves as an electronic calendar for issuance of approximately 18,000 applications and 2,400 grazing authorizations (Permits, Leases, and Exchange-of-Use Agreements) per year. The system provides access to the public online (<a href="http://www.blm.gov/ras/">http //www.blm.gov/ras/</a>) and creates approximately 30,000 grazing bills per year. BLM uses RAS to provide distribution information to the Collections and Billings System (CBS) for tracking, collecting, and distributing grazing receipts. Additionally, the system maintains electronic files about allotments, authorizations, and grazing bill history.                      Reports generated in RAS primarily contain two types of information, allotment information and operator information. Metadata regarding allotments includes allotment identification, size, amount of private, state and public land administered, amount of forage use authorized, both active and suspended, for all operators using the allotment, proportion of forage in the allotment produced on public land, existence of an allotment management plan and identification of the grazing operator(s). Metadata regarding operators includes authorization number, name, address and date the authorization was issued, including expiration date, allotments used by operator, kind and number of livestock, and period of use and forage amount authorized for use by the operator. The public website for RAS allows users to generate a variety of on-demand reports, including Allotment Information, Allotment Master, Authorized Use by Allotment, Operator Information, Permits Schedule Information, and Public Land Statistics.</p>	<p>See sub-items below.</p>
<p><b>14a(3)(a)</b></p>	<p>Master File. The Rangeland Administration System (RAS) provides online public access to grazing allotment and operator information for Federal lands in the Public Land States of the Western United States. <b>14b</b>	<p>Land-Use Permits Approved Case Files [2920, 2930]. Case files documenting authorizations to use public lands up to 3 years, if the use involves little or no land improvement, construction, or investment, or if the investment can be amortized within the terms of the permit. Includes advertising and movie-making permits; cultural use permits; recreation use permits. A permit conveys no possessory interest. It is renewable at the discretion of the authorized officer and may be revoked so that the land can be made available for another use. Files consist of the application, map, evidence of approval and termination, any appeal documentation, correspondence, and any related material. Arranged by serial or permit number. Some permits are serialized; others are not. Forms: BLM 1842-1, 2; 1850-1, 3; 2060-2; 2920-1; 2930-1, 2; 3060-1, 2; 8370-1, 2; DI-1928. 14e	<b>RECREATION MANAGEMENT INFORMATION SYSTEM (RMIS)</b> RMIS is a web-based BLM internal application that aggregates information pertaining to BLM land used for public recreation purposes. In addition to information about recreational use, authorizations, and designations, RMIS provides data for visitation estimates, recreation site descriptions, and details about recreation permits and leases. This information is used for a variety of purposes, including providing details for Public Land Statistics, the Chief Financial Officer's Report, and various external publications, such as Public Lands, Public Rewards. In addition, information is used at the field level to document recreation activities and authorizations at the recreation site, recreation management area, and/or Field Office level. Information is used for NEPA documentation and reviewing trends in recreation use. This system is accessible only to BLM employees within the firewall. This information is entered into the system by an end user (authorized BLM Employee). The oldest data in the system dates back to fiscal year 1999, and new data is entered daily. Records are dated from 1999 - present.	See sub-items below.
14e(1)	Master File. The information collected in the database produces specific and aggregated information about the number of visitors, special recreation permits issued, participation in specific recreational activities, public land acres, area designation acres, national landscape conservation system units, recreation site details, off-highway vehicle designation acreage, associated planning documents, partnerships and agreements, special recreation permits, and contact information for the overseeing BLM office. 26	<b>COMMUNITIZATION, UNITIZATION, GAS STORAGE, AND SPACING ORDER FILES [3180, 3280].</b> BLM is responsible for the development of federal oil, gas, and geothermal resources under the principles of multiple-use management. It also has trust responsibility for American Indian tribal or allotted mineral interests. The records described below document the establishment and monitoring of communitization and unitization agreements, state spacing orders, and subsurface gas storage agreements in order to avoid waste of oil, gas, and geothermal resources and to protect correlative rights. Communitization brings together leases sufficient for the granting of well permits under applicable state spacing requirements. Unitization consolidates separate leases into a single consolidated unit for the purposes of operating and allocating costs and benefits on a basis as defined in the agreement or plan. Authority: 43 CFR 3180, 3280. Confidentiality: Public record category 1B, except some files may contain proprietary-confidential information which is non-public record category 2; Privacy Act System Interior/LLM-3, LLM-32. <p><b>27b</b></p>	<p>Oil and Gas Operations Lease and Well Files. This series is comprised of the two major file types described below - the lease operations file and the related well files which document the production, safety, and environmental activities on the lease area. Lease and well files are filed together, with the well jackets (folders) placed directly behind the related lease file folder. Forms: BLM 3000-2, 3, 3a, 4; 3100-7, 11, 11a, 11b; 3108-2, 2a, 2b; 3109-1, 2; 3120-2; 3140-1; 3160-3, 4, 5, 8, 9, 10, 11, 12, 13, 15, 16, 17. Location: Office with delegated responsibility - usually the FOs (in some states, the responsibility is retained by the SO).</p> <p>- <b>Lease Operations Case File.</b> A separate case file is established for each lease to document the supervision of operations on the lease from issuance to termination. The lease operations case file contains the lease instrument and any assignments, lease operations correspondence, operating agreements, decisions, environmental assessment, operator plans, site security and emergency action plans, reports and investigations of accidents and undesirable events, diligent development review documentation, evidence of termination, and related material. The case file may be subdivided into separate folders as volume of documentation grows.</p> <p>- <b>Well Files.</b> A separate case file is established for each well that is drilled under provisions of the lease in order to document the supervision of operations on the specific well. Well folders are arranged by well number and placed behind the related lease operations case file. The well file contains the application for permit to drill (APD), sundry notices, production reports, well completion and recompletion logs, maps, plats, drawings, specifications, requests and approvals of waivers from orders, drainage reports and investigations, applications for approval of methods for disposing of water produced from the wells and the subsequent annual water analysis reports, and other required well data, including monthly reports of operation.</p>	<p>See sub-items below.</p>

28	<p><b>GEOTHERMAL LEASING FILES [3200].</b>                      Geothermal resources are depletable subsurface reservoirs of energy composed of: (1) products of natural geothermal processes including indigenous steam, hot water, and hot brine; (2) steam, other gases, hot water and hot brine resulting from artificial introduction of water, gas, or other fluids into geothermal formations; (3) heat or other associated energy found in geothermal formations; (4) any byproducts derived from geothermal processes. The BLM is responsible for the development of federal geothermal resources under the principles of multiple-use management. It also has trust responsibility for American Indian tribal or allotted mineral interests. The BLM is responsible for the decision to lease; issuance of a lease; environmental protection; historic, natural, and cultural resource protection; evaluation of social and economic factors; record title management; lease management on BLM-administered lands; and coordination with other land management agencies. Authority: 43 CFR 3200. Confidentiality: Public record category 1B, except some files may contain proprietary-confidential information which is non-public record category 2; Privacy Act System Interior/LLM-3, LLM-32. Essential (Vital): Legal and Financial Rights Records. Exclusions: Pending applications (Schedule 4/16); exploration permits (Schedule 4/25); geothermal agreements (Schedule 4/26).</p>	See sub-items below.
28a	<p>Geothermal Lease Applications Case Files. Authorizing office record copies. Serialized case files, arranged by number, including both the leases approved by the BLM and the applications unapproved (either rejected by the BLM or withdrawn by the applicant) and any related appeal documents. Forms: BLM 3000-2, 3, 3a, 4; 3200-15, 20, 21a, 22, 24. Location: SO and some FOs.</p>	<p>TEMPORARY. <p><b>28b</b></p>	<p>Geothermal Operations Lease and Well Files. This record series is comprised of two major case types that are described below - the lease operations file and the related well files which document the regulation, supervision, inspection, and enforcement of drilling, production, safety, and environmental activities on the lease area. Forms: BLM 3000-2, 3, 3a, 4; 3200-15, 20, 21a, 22, 24; 3260-2, 3-5. Location: Office with the delegated responsibility - usually the FOs (in some states, the responsibility is retained by the SO).</p> <p>- <b>Lease Operations Case File.</b> A separate case file is established for each lease to document the supervision of operations on the lease from issuance to termination. The lease operations file contains the lease instrument and any assignments, lease operations correspondence, operating agreements, decisions, environmental assessment, reports of lease surveys and resurveys, operator plans, site security and emergency action plans, reports and investigations of accidents and undesirable events, evidence of termination, and related material. The case file may be subdivided into separate folders as volume of documentation grows.</p> <p>- <b>Well Files.</b> A separate case file is established for each well drilled under provisions of the lease in order to document the supervision of operations on the well. Well folders are arranged by well number behind the related lease operations case file. They contain application for permit to drill (APD), sundry notices, production reports, well completion and recompletion logs, maps, plats, drawings, specifications, well test reports, reports of operations, injection plans, injection reports and surveys, requests and approvals of waivers from orders, drainage reports and investigations, applications for approval of methods for disposing of water produced from the wells and the subsequent annual water analysis reports, and other required well data.</p>	<p>See sub-items below.</p>
<p><b>28b(1)</b></p>	<p>Geothermal Operations Lease and Well Files - Indian. It also has trust responsibility for American Indian tribal or allotted mineral interests. The BLM is responsible for the decision to lease; issuance of a lease; environmental protection; historic, natural, and cultural resource protection; evaluation of social and economic factors; record title management; lease management on BLM-administered lands; and coordination with other land management agencies. The BLM also delineates potential coal tracts, analyzes environmental impacts of leasing, and appraises tract values. Mineral materials are disposed of by contract of sale or free use permit under 43 CFR 3600. Minerals such as gold, silver, quicksilver, and hard rock minerals are leasable on acquired lands only. Solid leasable mineral commodities include coal, phosphate, sodium potassium, sulfur in Texas and Louisiana, gilsonite, and hard rock minerals on acquired lands. Also included are minerals, which are leased under special leasing acts, including asphalt in Oklahoma; gold, silver and quicksilver in confirmed private land grants; certain minerals in National Park Service areas; reserved minerals on certain lands which were patented to the State of California for park or other purposes; certain minerals in the White Mountains National Recreation Area, Alaska; and sand and gravel on certain lands which were patented to the State of Nevada. Federal Land Patents document information regarding the initial transfer of land titles from the Federal government to individuals. Several types of Federal Land Patents have been issued to individuals from 1820 to present for various purposes, including Cash Entry, Homestead and Military Warrant. Users may search for and retrieve metadata and document images, and place orders on-line for certified copies of land patents. Metadata includes Patentee, Assignee, Warrantee, Widow and/or Heir, together with the transaction date and Legal Land Description. The site contains approximately five million Federal land title records. Although GLORAS does not currently contain every Federal title record issued for the Public Land States, the respective states are continually working to scan and upload BLM's collection. Schedule 5 - Budget Preparation, Presentation, and Apportionment Records

**Introduction**

Budget and apportionment records include the various files accumulated in the course of formulating the budget for submission to the Office of Management and Budget (OMB) and Congress; in defending requests for funds before both bodies; and after enactment of an appropriation bill, ensuring that the funds are used in such a way as to suffice for the appropriate period of time. The funds are made available to the Bureau of Land Management (BLM) by OMB, usually in quarterly portions, and the BLM must indicate and justify regularly to OMB the proposed rate of expenditure. After the funds have been made available to the BLM, its own controls over the funds are in expenditure accounting records (Schedule 7), and detailed information relative to expenditures is contained in the accountable officers' accounts (Schedule 6).

Budget records are normally created at all levels of the BLM. They show proposals from all operating levels as well as the BLM-wide and DOI-wide coordinating work done by formally organized budget offices. The records consist of detailed work papers and budgetary statements developed by single operating units, the more significant budget statements and related papers representing consolidated submissions prepared by BLM then forwarded to the Department budget officer.

The nature of the budget presentation itself is standardized by OMB which prescribes format and procedures. The internal reports and papers which support the budget and are used in its preparation vary from agency to agency. The budget submission, a record copy of which is usually designated by BLM, is a duplicate of the set of papers submitted to OMB. These include summary statements of appropriations and expenditures, statements of contract authorizations, and statements of receipts as well as narrative summary statements which highlight the principal features of the BLM requests and immediately related supporting documents. The narrative presents the policies and the programs of the BLM which the budgetary requests are to support. In addition to the summaries, the submission includes schedules of obligations and statements pertaining to each type of appropriation and fund under which the BLM operates. OMB requires additional supporting data pertaining to objects of expenditure, particular programs, and figures based on the cost of various type of service operations, such as personnel and payrolling activities.

## DRS/GRS/BLM Combined Records Schedules

### Schedule 6 - Accountable Officers Accounts Records

#### Introduction

This schedule covers accountable officers' returns and related records, including records under the cognizance of the General Accounting Office (GAO).

Accountable officers' accounts include record copies of all records concerned with the accounting for, availability, and status of public funds. There are several types of "accountable officers," such as: (a) the collecting officer, who receives monies owed to the federal government and ensures that it is credited to the proper account; (b) the disbursing officer who is responsible for providing documentation to GAO since he/she accomplishes the actual payment of public monies to proper federal creditors; and (c) the certifying officer, whose signature on a summary attests to the authenticity of vouchers listed on the schedule.

Disbursements for most civilian Government agencies are made by the Chief Disbursing Officer of the Treasury, who heads the Division of Disbursement of the Bureau of Government Financial Operations within the Department of Treasury. Since July 1949, disbursements have been made for most agencies on the basis of certified schedules, with the detailed vouchers transferred to GAO from the agency or held in agency space if a site audit was involved. This procedure was extended and confirmed by GAO General Regulation No. 115, issued January 29, 1952, which promulgated a standard form voucher and schedule of payment (SF-1166 and SF-1167) for use by all agencies, effective July 1, 1952, and formally eliminated the transfer of vouchers to the Chief Disbursing Officer of the Treasury.

This schedule includes records held for on-site audits conducted by GAO, as described in Item 1a of this schedule. Under an on-site audit, vouchers, contracts, schedules, statements of transactions and accountability and other related supporting documents are retained in the Bureau of Land Management (BLM) space for GAO auditors. Section 5 of the Post Office Department Financial Control Act of 1950 and Section 117(b) of the Budget and Accounting Procedures Act of 1950 (whenever the Comptroller General determines that an audit shall be conducted at the site) require agencies to retain these records, which are under GAO cognizance. GAO has given general authority to agencies, if the records are no longer required for administrative purposes, to transfer all audited records and any unaudited records more than 1 full fiscal year old to Federal Records Centers. However, to transfer unaudited accountable officers' accounts less than 1 year old, permission must be obtained from the Director, Records Management, and GAO. Because the records previously transferred to GAO are retained in the agency, some agencies have eliminated the creation of memorandum copies as described in Item 1b of this schedule.

Records relating to the availability, collection, and custody of funds include (1) appropriation warrants, (2) other documents which deposit funds into the Treasury, and (3) documents which provide accountable officers with status reports on funds in their custody, such as the proofs of depository account and statements of funds to their credit. The BLM copies of these deposit and status documents are so intimately related to the accounts of these officers that they are included in this schedule.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

<b>1</b>	<b>ACCOUNTABLE OFFICERS FILES [1300].</b> Agencies must offer any records created prior to January 1, 1933, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.	See sub-items below.
<b>1a</b>  <b>DRS 1.3B</b>	<p>Accountable Officers Original or Ribbon Copies. Accountable officers accounts maintained by the BLM for site audit by GAO auditors, consisting of statements of transactions, statements of accountability, collection schedules, collection vouchers, disbursement schedules, disbursement vouchers, and all other schedules and vouchers or documents used as schedules or vouchers. Since the BLM is operating under an integrated accounting system approved by GAO, certain required documents that support vouchers and/or schedules are included in site audit records. These records document only the basic financial transaction, money received, and money paid out or deposited in the course of operating the BLM. Exclusions: the certified payment or collection copy, usually the original or ribbon copy, and all additional or supporting documents not involved in an integrated system (covered by succeeding items in this schedule), copies of forms which may be filed in related case files, commercial passenger transportation and freight records (Schedule 9), payroll records (Schedule 2). ## DRS/GRS/BLM Combined Records Schedules

### Schedule 7 - Expenditure Accounting Records

#### Introduction

Expenditure accounting records are the ledgers and related documents maintained by all Federal agencies to show in summary fashion how their funds, appropriated and nonappropriated, are spent after allotment by the Office of Management and Budget (OMB), and the sources and nature of any receipts. The key records are the general ledger accounts, which constitute, as a unit, the heart of the agency accounting system. These ledgers summarize the financial status and financial transactions of the agency, showing the current status of funds available for expenditure, the amounts due and collected for the account of the Government, accumulated expenditures and liabilities, and the values of stock, equipment, and other property in agency custody. They are controls that serve not only as central fiscal records, but also as a primary source of data for top management concerned with agency solvency, expenditures, and program costs.

The general ledgers are subdivided into arbitrarily created account titles, which are based on programs, projects, costs, and funds. Supporting them is a group of subsidiary ledgers and documents further detailing the information in the general ledgers or serving as posting media to the ledgers themselves. To the extent that they reflect appropriation expenditures, the general ledgers are supported by allotment ledgers, which at all times show the current unobligated balance of funds allotted for specific agency purposes and thereby provide a safeguard against overexpenditure by operating officials. The allotment ledgers are general controls over expenditures, and they, in turn, summarize and are supported by more detailed controls that normally take the form of project or job orders that authorize exact and specific expenditures.

The sources of data that are posted to the ledger files are somewhat diverse, but they fall into two general groups.

- a. Copies of various obligation or expenditures documents, such as vouchers and schedules, that flow through the ledger unit for posting, and
- b. Journal vouchers and similar internal control documents created to authorize and convey entries to the general ledger.

As the centralized fiscal record, the general ledgers ultimately summarize stores, plant and cost accounting data, which are treated in a separate schedule, but these are only several aspects of the total ledger accounts. Consequently, the ledgers are the source of the data included in the basic apportionment reports to the OMB and the Department of the Treasury and overall reports of agency fiscal condition which may be required by the General Accounting Office (GAO) (Schedules 6 and 8). The adequacy for audit purposes of the general ledger accounts is normally considered by GAO auditors to be indicative of the agency's entire accounting system and the reliability of its financial data.

When a claim is filed by or against the Government, records relating to the claim should be retained without regard to the otherwise applicable records retention schedules that would have authorized destruction of the records prior to the time when the claim is finally resolved, unless the agency has received written approval from GAO (44 USC 3309 and 62 Comp. Gen. 42 (1982)). A claim is finally resolved: (1) when it is disallowed and the time for appealing the denial or instituting suit on the claim has expired; or (2) when it is allowed and paid or the amount offered in compromise is accepted and paid; or (3) when the amount found due and owing proves uncollectible because time limits for collecting the indebtedness through legal proceedings or by way of setoff have expired.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

Schedule 8 - Stores, Plant, and Cost Accounting Records

**Introduction**

Specialized stores, plant, and cost accounting records are maintained by most agencies, particularly those with extensive plant and stock inventories. These records, which reflect the net monetary worth of an agency and its assets, are periodically reconciled with the supply data found in stock inventory records, but they do not include procurement papers.

a. Stores Accounting. These records are maintained to provide personal accountability for the receipt and custody of materials and to document the monetary worth of such materials. Completed copies of material movement documents show custody, and stores accounting data are normally reviewed and consolidated by means of records and returns submitted to agency headquarters. There the information is used for procurement planning, budget, and other management purposes. These records do not include records reflecting the physical movements of material to and from storage points, although they may be involved in posting. Summary data on plant value are also available in pertinent ledger accounts.

b. Plant Accounting. These records document principal characteristics of each item of physical plant and equipment, including real property. They constitute primarily a type of inventory control, but in addition are a principal source of data on the capital investment in physical plant (as distinguished from maintenance or operating costs) and other items not normally represented in a store or stock inventory system. Summary data on plant value are also maintained.

c. Cost Accounting. These records are designed to show accumulated data on the costs of agency operation, the direct and indirect costs of production, administration, and the performance of program functions of the agency. The data, which are normally accumulated by means of cost reports and statistics accumulated by operating personnel, are ultimately integrated into the accounts concerned with operating and program costs. Material cost information is collected by posting requisitions for material or procurement documents to intermediate records, and labor cost information is obtained by charging time expended on individual jobs and projects assigned control numbers for cost control purposes. Cost data are used in evaluating economy of agency operation and in preparing budget estimates.

## DRS/GRS/BLM Combined Records Schedules

### Schedule 9 - Travel and Transportation Records

#### **Introduction**

This schedule covers records documenting the movement of goods and persons under government orders. The records include bills of lading, transportation requests, transportation vouchers, per diem vouchers, travel authorizations, and all supporting documentation, including those prescribed by Title 5 of the General Accounting Office (GAO) Policy and Procedures Manual. Record copies of all travel, transportation, and freight documents used to support payments become components of accountable officers' accounts (Schedule 6). Disposition for commercial transportation and freight site audit records is covered by item 1 of this schedule. Individual, noncommercial, reimbursable travel site audit records are covered by Schedule 6, Items 1a, 10, or 11. Some copies become accounting posting media which are covered by Schedule 7, Item 4.

a. Movement of Goods. The key record is the government bill of lading (GBL), of which there are copies for consignors, consignees, and the carriers themselves. The documents related to and normally filed with the bill of lading are varied and often voluminous. These may consist of shortage and demurrage reports, invoices, and other data which document the transaction. Included are records relating to the shipment of household effects, authorized by law and regulations for government employees. Offices shipping certain valuables under the Government Losses in Shipment Act, which insures against loss, retain copies of schedules of material shipped, documents relating to claims which may ensue, and other pertinent records.

b. Movement of Persons. The movement of persons is documented by copies of travel orders, authorizing travel and subsequent payment, and standard form vouchers showing payment for official travel. The two primary copies of travel orders are the administrative copy maintained by the transportation unit controlling the authorization of travel and the copy used for encumbrance of funds. Vouchers documenting cash advances for travel purposes are covered by Schedule 6, Item 1a, only after the advance has been properly liquidated and can be included in a settled fiscal account. Unliquidated cash advances for travel purposes are covered by Schedule 6, Item 10.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

DRS/GRS/BLM Combined Records Schedules

Schedule 10 - Motor Vehicle and Aircraft Maintenance and Operation Records

**Introduction**

The records in this schedule pertain to the management, maintenance, and operation of motor vehicles and aircraft used in the Bureau of Land Management (BLM).

41 CFR 101-34 prescribes policies and procedures. Standard Form 82, which is an annual motor vehicle report required by the Federal Acquisition Service, General Services Administration, is the only standardized record. Certain cost and inventory control forms have been developed, but they are not mandatory. This schedule covers BLM records pertaining to the daily use and operation of the vehicles and aircraft.

In general, records pertaining to motor vehicles and aircraft reflect a threefold responsibility: (a) the accumulation of cost and operating data for internal accounting and management purposes and for reports submitted to Federal Acquisition Service (SF 82, Agency Report of Motor Vehicle Data); (b) the maintenance of the vehicles themselves; and (c) protecting the interest of the government in accident claims against it. The records themselves consist of service logs and reports, repair and maintenance check-off sheets, cost ledgers, and claims correspondence and forms.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

DRS/GRS/BLM Combined Records Schedules

Schedule 11 - Space and Maintenance Records

**Introduction**

This schedule provides for the disposal of all copies, wherever located in the Bureau of Land Management (BLM), of records relating to space and maintenance, except as indicated below. Records documenting these functions pertain to the acquisition, allocation, utilization, and release of space and include related correspondence and reports submitted to the General Services Administration (GSA) or similar agency, as directed by law and regulations (41 CFR 101-17); correspondence and forms relating to the compilation of directory service listings, identification credentials and related accountable records, requests for building and equipment services, and correspondence files reflecting the activities of the unit responsible for handling space and related matters within the BLM.

This schedule does not cover: (a) copies of these records that are an integral part of accountable officers' accounts (Schedule 6); or, (b) records of procurement and supply (Schedule 3). Any records created prior to the establishment of the Public Buildings Administration in 1939 must be offered to the National Archives and Records Administration (NARA) for appraisal before applying these disposition instructions.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

DRS/GRS/BLM Combined Records Schedules

Schedule 13 - Printing, Binding, Duplication, and Distribution Records

**Introduction**

This schedule provides for the disposal of all copies, wherever located in the Bureau of Land Management (BLM), of records relating to printing, binding, duplication, and distribution, except as indicated. The principal records documenting these functions are (a) records pertaining to requests for service, control, production, and distribution of individual jobs or projects (this material normally consists of requisitions requesting service and registers or similar media utilized to control the receipt of the requisitions, and to record the production, distribution and cost analysis within the operating units); and (b) correspondence and report files reflecting the activities of the unit responsible for handling, printing, binding, duplication, and distribution matters.

This schedule does not cover the record copy of printed materials (Schedule 16/17), records retained for on-site audit by the General Accounting Office (Schedule 6/1a), or memorandum copies of the accountable officers' accounts files (Schedule 6/1b).

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

DRS/GRS/BLM Combined Records Schedules

Schedule 14 - Information Services Records

**Introduction**

This schedule covers certain records pertaining to informational services performed by the Bureau of Land Management (BLM) offices in their day-to-day affairs and in their relations with the public; including records created in administering Freedom of Information Act (FOIA) and Privacy Act (PA) programs. Except as otherwise specified in individual items, it applies to copies of these records wherever located in the bureau. Item 4 applies only to files maintained in the office responsible for the operation of the informational activities of BLM. Items 11 through 15 describe the files accumulated in carrying out the provisions of the FOIA, and items 21 through 26 describe the files created in administering the provisions of the PA. Items 31 through 35 cover records created in response to requests for mandatory records declassification.

These records consist of inquiries, replies, and related correspondence; in the case of FOIA, PA, and mandatory declassification files, appeals, and other records; administrative background files for formal information releases; and records relating to inappropriate release of privileged information. Closely related records are covered by other schedules, such as records regarding budget presentation (Schedule 5) and printing, duplicating, and distribution records (Schedule 13).

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. DRS/GRS/BLM Combined Records Schedules

Schedule 15 - Housing Records

**Introduction**

The housing records covered by this schedule include files and data accumulated in the maintenance and management of Federally owned and operated housing and quarters facilities within the continental United States for Federal employees and others eligible by law to reside in the projects. These facilities may consist of low cost quarters located either within or adjacent to the confines of Federal installations or in a critical defense or other area. This schedule includes housing records maintained by housing managers and housing or quarters offices, but does not cover the headquarters or staff office files of the supervising agency, or the files of the Department of Housing and Urban Development, the Department of Health and Human Services, or the Department of Veterans Affairs pertaining to program operations in planning and financing housing facilities.

Maintenance records reflect repair and general upkeep of the housing project or units. Management involves the assignment and rental of units, rent collection and other fiscal operations, and overall supervision.

Certain housing records are subject to the provisions of other records schedules. Supply and fiscal files are covered by Schedules 3 and 6. Schedules 1, 2, 8, and 10 may also be involved. Many records of agent cashiers serving as housing rental managers are similar to those of other Federal accountable officers and are disposable under Schedule 6.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

## DRS/GRS/BLM Combined Records Schedules

### Schedule 16 - Administrative Management Records

#### **Introduction**

This schedule provides for the disposition of records relating to administrative management activities, excluding records of operating personnel, budget, accounting, and printing functions, which are covered by other records schedules. Included within the scope of the schedule are disposable records created in the course of organizational planning, development, and simplification of procedures; records management activities; and administration of management improvement programs. Schedule 1 (items 12 and 13) provide for the disposition of case files on individuals involved in incentive award and similar types of management improvement programs.

The organizational locations and titles of administrative management units vary from agency to agency. They may be scattered at numerous levels or locations, or may be centralized. For the purposes of this schedule, the nomenclature standards set forth by the Senate Committee on Government Operation in Senate Report No. 245, 80th Congress, 1st session, are followed: the first organizational level within an agency is the bureau level; subordinate components are, successively, division, branch, section, and unit.

This schedule is based on the presumption that management activities are carried on by a specialized person or unit with, at least, division-wide and usually bureau-wide or agency-wide responsibilities or by a group of such persons or units in an agency, although its provisions are applicable to exactly comparable records of agencies without such formal assignments of responsibility. Many similar or comparable records created at lower organizational levels or in Field Offices vary so greatly in content, value, and arrangement that they are not covered by this schedule.

Because of the nature of the activities documented by administrative management records, a relatively large proportion of them is of continuing value. Files with archival value are covered by all or parts of Items 1, 8, and 15-20 of this schedule. These records include organizational charts and reorganization studies, functional statements, delegations of authority, and agency histories. However, related temporary or ephemeral materials include working papers that do not have a direct bearing on the transaction, intermediate drafts of documents and worksheets that do not represent significant basic steps in the preparation of final drafts, letters or memoranda of transmittal and acknowledgment, routing slips, and extra copies of documents.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

## DRS/GRS/BLM Combined Records Schedules

### Schedule 17 - Cartographic, Aerial Photographic, Architectural, Engineering, and Cadastral Survey Records

#### Introduction

This schedule incorporates the cartographic, aerial photographic, architectural, and engineering records that are described in General Records Schedule 17 and adds records of a similar nature that are unique to the Bureau of Land Management (BLM).

1. Cartographic Records. These are graphic representations at reduced scale of selected cultural and physical features of the surface of the earth and other planetary bodies. They include maps, charts, photomaps, atlases, cartograms, globes, and relief models. Related records are those records that form an integral part of the map making process, such as field survey notes, geodetic controls, map history case files, source materials, indexes, and findings aids.
2. Remote Sensing Records. Remote sensing technology produces aerial photographs and other forms (e.g., digital) of visual images of the surface of the earth or other planetary bodies taken from airborne or spaceborne vehicles for the purpose of evaluation, measuring, or mapping the cultural and/or physical features of the landscape. Related tabular and graphic indexes necessary for the proper identification and retrieval of these records are also produced. Conventional aerial photographs taken from aircraft represent direct film images from cameras; other forms of imagery, such as those from satellites, sometimes require a conversion or alteration of sensor data from digital, electronic, or computerized forms to photographic or videographic images.
3. Architectural and Engineering Records. Official record copies of architectural and engineering records are filed in the official project file for the structure being designed and built on public lands. Other copies may be maintained for reference. Typical BLM projects include the design and construction of roads, trails, bridges, buildings, water catchments, fences, and other permanent or long-term structures. Other project files document the design and construction of temporary structures and resource improvements such as discing, chaining, burning, planting, or seeding of public lands.
4. Cadastral Survey Records. The survey records described in this schedule are the hard copy documentation for all types of land surveys (township surveys, dependent and independent surveys, supplemental surveys, agricultural surveys, homestead surveys, mineral surveys, etc.). A cadastral survey is an official survey that creates, marks, defines, retraces, or reestablishes the boundaries and subdivisions of the public and federal interest lands. An official survey is one which has the field notes approved, the plat accepted, and the record filed in the proper BLM office.

Federal agencies create or receive cartographic, aerial photographic, architectural, and engineering design records in connection with their official activities. Many of these records have continuing historical value after they are no longer being used by the agency. Guidelines for identifying and scheduling the records of continuing value are now provided in "Managing Cartographic and Architectural Records: An Instructional Guide." The Guide must be used in conjunction with the General Records Schedule to ensure proper disposition of all cartographic, aerial photographic, architectural, and engineering design records held by an agency.

This schedule relates to cartographic records prepared during intermediate stages of publication, unannotated aerial photographic negatives and prints, and architectural and engineering drawings.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

<b>13d</b>	<p><b>RANGELAND IMPROVEMENT PROJECT SYSTEM (RIPS)</b></p> <p>The Rangeland Improvement Project System (RIPS) tracks range improvement funds collected by BLM from fees paid by those who graze their livestock on BLM land. It also provides management data regarding range improvements such as spring developments, cattle guards, exclosures, and others. The Federal Land Policy and Management Act of 1976 (43 USC 1701-1784) states that the funds are to be used for projects such as fencing, weed control, and water development that benefit rangeland resources, including wildlife, watersheds, and livestock. In 1993, the General Accounting Office reported to Congress that BLM's range improvement project database was incomplete and inaccurate, which lead to further development of the RIPS system to better record and track range improvement projects on BLM administered lands. Instruction Memorandum 2001-27 established a policy that all projects must be entered into RIPS, excluding projects regarding facility asset management, abandoned mine lands, HazMat, natural resource damage assessment, and threatened and endangered species. This policy also established the use of fee-for-service (FFS) codes to link RIPS projects to BLM financial systems.</p>	See sub-items below.

## DRS/GRS/BLM Combined Records Schedules

### Schedule 18 - Security and Protective Services Records

#### Introduction

This schedule incorporates security and protective services records described in General Records Schedule 18 and adds records of a similar nature that are unique to the Bureau of Land Management (BLM).

BLM has authority for enforcement of all laws and regulations pertaining to the use, management, and development of public lands and resources under its jurisdiction. Security and protective services records include various files documenting efforts to control and protect classified information; to protect government land and facilities from unauthorized entry, sabotage, loss, pollution, and fire; to ensure the adequacy of protective measures at privately owned facilities given security cognizance by the government; and to determine loyalty and fitness of individuals employed by, or seeking employment from the government; and to develop and implement plans for the protection of life and property under emergency conditions. Included are selected files of offices having Government-wide or agency-wide responsibility for security and protective services programs. Also included are files of security units, guard forces, and other organizational elements documenting the control of classified information, access to facilities, and like matters.

Records documenting certain administrative actions relating to security and protective services are authorized for disposal by GRS 18, Items 1-28. The BLM additions to Schedule 18 are identified in this schedule following the GRS items. They include:

1. Internal BLM Policies, Procedures, and Plans. These are BLM-specific policies, procedures, and plans for security and protective services program that are not documented in a numbered directive.
2. Law Enforcement. The primary records of law enforcement originate with the special agents and rangers, who conduct criminal investigations, apprehend violators, patrol public land areas, and prepare reports of those activities. The LAWNET electronic system supports the law enforcement program.
3. Trespass. Trespass activities involve investigation of reports of unauthorized use of or harm to lands, resources, or other property and the collection of compensation for any losses or injuries suffered as a result. Documentation of trespass investigations are contained in the trespass case files.
4. Fire. Fire management involves developing fire techniques and prevention methods and managing the fire suppression and fire use programs. Fire records in this schedule include reports, project packages, dispatch records, resource orders, review reports, and an electronic initial attack management system.
5. Hazardous Materials. Hazardous materials management activities include inventorying hazardous materials sites on public lands, investigating reports of incidents of suspected contamination, and documenting site clean-up. Records in this schedule include incident reports, site files, and the public information repository and administrative records.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

29	<b>NATIONAL DEFENSE EXECUTIVE RESERVE (NDER) CASE FILES.</b>	The BLM does not maintain these records. Rescinded per GRS Transmittal 27. ----- <i>Former Authority:</i> <i>NC1-GRS-87-10, item 1a/1b</i>
30	<b>LAW ENFORCEMENT FILES [9260].</b> Files created by activities authorized by Section 303(a) and 303(c) of the Federal Land Policy and Management Act of 1976. Authority: 43 USC 1733; 43 CFR 9260. Confidentiality: Non-public record category 2; Privacy Act System Interior/DOI-10. Essential (Vital): Legal and financial rights records.	See sub-items below.
30a	Law Enforcement Criminal Investigation Case Files. Documenting investigations and arrests concerning alleged violation of federal land laws. Consists of incident report, reports of investigation, field investigative contacts, photos, photo logs, evidence, evidence logs, and related correspondence. Also includes the incident reports and related printouts that are generated by the LAWNET data base (item 30d). Forms: BLM 9260-1, 2-10, 13, 13a, 16, 17, 18, 18a, 18b. Location: Offices with law enforcement officers: SO, FOs.	TEMPORARY. Cutoff EOFY in which the case is settled or closed. <b>Use BLM 18/30a.</b> Transfer to FRC 5 years after cutoff. FRC destroys 15 years after cutoff. (NC1-49-85-2, 18/12a(2))
30b	Law Enforcement Patrol Logs. Forms: BLM 9260-15, 16, 17 (formerly 8360-7), 8360-5. Location: Offices with law enforcement rangers - usually FOs.	TEMPORARY. Cutoff EOFY. <b>Use BLM 18/30b.</b> Transfer to FRC 5 years after cutoff. FRC destroys 15 years after cutoff. (NC1-49-85-2, 18/12a(1))
30c	Law Enforcement Activity Reports. Recurring reports of law enforcement activities. Consists of Uniform Crime Reports, DOI Law Enforcement Incident Reports, Drug Enforcement Activity Reports, Weekly Reports of Special Agents, and Significant Activity Reports. Also includes reports generated by the electronic LAWNET data base (item 30d), which include Activity Reports, Law Enforcement Officer Report, ARPA Report, Case Log, NIBRS printouts, and DOI Law Enforcement Incident Reports. Forms: BLM 9260-12.	See sub-items below.
30c(1)	Law Enforcement Activity Feeder Reports. Submitted by offices with law enforcement authority to Headquarters - usually FO reports to SO who forwards to WO. LAWNET data base (item 30d) will eventually eliminate the need for these reports. Location: SO, FOs.	TEMPORARY. Cutoff EOFY. <b>Use BLM 18/30c(1).</b> Destroy 3 years after cutoff. (N1-49-96-3, 18/30c(1))
30c(2)	Law Enforcement Activity Consolidated Reports. Headquarters law enforcement office copies. Location: WO.	TEMPORARY. Cutoff EOFY. <b>Use BLM 18/30c(2).</b> Destroy 5 years after cutoff. (N1-49-96-3, 18/30c(2))

<b>30d</b>	LAWNET Data Base. Electronic file that contains information concerning incidents of crime occurring on the public lands, including date, time, and location of the incident; the name, address, telephone number and description of any associated victims, witnesses, complaints, offenders, and arrestee; type of incident; quantity, description, and ownership of any affected property; description of any vehicles involved, action taken, disposition; and the BLM officers involved in the incident. LAWNET will replace the Field Office activity feeder reports (item 30c(1)) and uniform crime reports. Exclusions: Records used to test, update, and monitor the system (Schedule 20/1); records associated with the Data Element Dictionary (metadata) (Schedule 20/20); reference copies of any system files which may be destroyed when no longer needed for reference or convenience.	See sub-items below.
<b>30d(1)</b>	LAWNET Project History. Record copies that document the history of the conception, planning, and development and/or improvement of the system, excluding system documentation (item 30d(2)). Consists of the concept of operations, official record designation documentation, quality assurance plans, project feasibility studies, cost benefit analyses, charters, approvals, budgets, life cycle management documentation, training plans, briefing and issue papers, and other project history information. Files may be subdivided by subject as volume warrants. Location: NIFC.	TEMPORARY. Cutoff EOFY in which the LAWNET data base is certified as an official agency records system. <b>Use BLM 18/30d(1).</b> Transfer to FRC 5 years after cutoff. FRC destroys 25 years after cutoff. (N1-49-96-3, 18/30d(1))
<b>30d(2)</b>	LAWNET System Documentation. Record copies.	See sub-items below.
<b>30d(2)(a)</b>	Documentation Necessary for Servicing and Interpreting the System. Record copies of data modeling documentation, data system specifications, file specifications, data element descriptions, code books, record layouts, user guides, output specifications, and similar documentation (regardless of media) necessary for servicing and interpreting the system. Location: NIFC.	TEMPORARY. <b>Use BLM 18/30d(2)(a).</b> Destroy or delete upon authorized destruction of the master file (item 30d(4)). (N1-49-96-3, 18/30d(2)(a))
<b>30d(2)(b)</b>	Data Verification and Quality Control Files. Record copies. The data verification and quality control process documents the accuracy or factuality of data through a comparison to the source data. Data sampling is a means of checking selected portions of data in a data base to determine its quality level. Error detection involves comparing the data against the source documentation and comparing it with established data standards to determine if the data is in conformance with the standards. Documentation of the sampling and error detection activities consists of the date of action, steps taken, name of parties involved, summary of errors detected with an analysis of the errors, and the date corrective actions are taken. Excludes quality assurance plans which are part of the project history files (item 30d(1)). In the event of litigation, the records in this series may be required as evidence that the system is trustworthy, accurate, and reliable. Location: NIFC.	TEMPORARY. Cutoff EOFY in which documentation is created. <b>Use BLM 18/30d(2)(b).</b> Transfer to FRC 4 years after cutoff. FRC destroys 25 years after cutoff. (N1-49-96-3, 18/30d(2)(b))

Some records are produced or stored in electronic formats (including Computer-Aided Design [CAD] or Portable Document Format [PDF]).                      Note: Records for fire equipment reassigned to another BLM service area should be transferred with that equipment.                      Confidentiality: Non-public record category 2. Exclusions: contracts and acquisitions actions for equipment products (Schedule 3/3) and property inventory files (Schedule 4/5). A small volume of legacy records (paper) may be stored at BLM's state offices. Records are maintained by the Fire and Aviation Directorate, Division of Fire Operations, NIFC.</p>	<p>TEMPORARY. Cutoff when the equipment is taken out of service, sold, or donated.  <b>Use BLM 18/32i.</b>                      Destroy within 4 years from cutoff.                      (N1-049-09-1/1)</p>
32j	<p><b>FireCode System.</b>                      FireCode is a web-accessible application that tracks wildland fires for the five wildland fire bureaus and assigns a unique 4-digit alpha-numeric character to each wildland fire, which is used in the accounting code as a project number. This unique code allows all responding agencies to use that project number within their accounting string to link obligations to a single fire. A component of NIFC External Network-General Support System (NIFCeNET/GSS). Location: NIFC.</p>	<p>See sub-items below.</p>
32j(1)	<p>Master File. The database contains the unique code assigned to a specific fire name, legal location, map coordinate information, jurisdictional agency, date and source of ignition, approximate size, and name of individual entering the data into the system.</p>	<p>PERMANENT. Cutoff every 5 years.  <b>Use BLM 18/32j(1).</b>                      Transfer a copy of the master file to NARA immediately, along with the technical documentation, in accordance with 36 CFR 1235.44-50. Thereafter, transfer a copy every 5 years, along with the current technical documentation. 32k	<p><b>Wildland Fire Management Information System (WFMI).</b>                      WFMI Master Files. Modules include Lightning, Weather, Unit Identifiers, and Fire Reporting.                      WFMI provides wildland fire managers access to four web-based modules that share a common structure: Lightning, Weather, Unit Identifiers, and Fire Reporting. Lightning and weather data is also provided by agreement to the National Oceanic and Atmospheric Administration, National Climatic Data Center, Western Regional Climate Center (WRCC) for long term storage. A component of NIFC External Network-General Support System (NIFCeNET/GSS).</p>	<p>See sub-items below.</p>

32k(1)	Lightning Module. The Lightning module provides access to lightning strike data captured by commercial sensors throughout the U.S. and used by the federal and state fire community.	TEMPORARY. <b>Use BLM 18/32k(1).</b> Delete when 90 days old. (N1-049-09-17/1a)
32k(2)	Weather Module. The Weather module performs two functions. It provides access to observational weather data from remote automatic weather stations (RAWS). The module also provides metadata records of the installation and maintenance dates for each weather station or sensor. The information is available to WFMI users in tabular and graphical format. The observational weather data and the station metadata are distributed to multiple downstream clients including the WRCC.	See sub-items below.
32k(2)(a)	Data describing weather conditions generated from stations.	TEMPORARY. <b>Use BLM 18/32k(2)(a).</b> Delete when 90 days old. (N1-049-09-17/1b(1))
32k(2)(b)	Weather station metadata. Provides a record of each weather station including the installation and maintenance dates for the weather station and each sensor.	TEMPORARY. Cutoff when station is discontinued. <b>Use BLM 18/32k(2)(b).</b> Delete when no longer needed for administrative and legal purposes or agency use. (N1-049-09-17/1b(2))
32k(3)	Unit Identifiers Module. The Unit Identifiers module consists of a listing of the identifiers (codes) that are used to uniquely identify the organizational units within the federal and state government that are involved in wildland fire management including BLM, National Park Service (NPS), Bureau of Indian Affairs (BIA), U.S. Fish and Wildlife Service (FWS) and USDA Forest Service (USFS). The codes are input by agency personnel.	TEMPORARY. <b>Use BLM 18/32k(3).</b> Delete when no longer needed for reference, administrative and legal purposes or agency use, whichever is longer. (N1-049-09-17/1c)
32k(4)	Fire Reporting Module. The Fire Reporting module is a web-accessible source for the fire reports submitted by four DOI agencies; Bureau of Indian Affairs (BIA), BLM, Bureau of Reclamation (USBR), and National Park Service (NPS). The dates of accumulated data are as follows: BIA, NPS, and BLM, 1972 to present, and US Bureau of Reclamation (host unit for some wildland fires), 2005-present, BLM, NPS, and BLM fire reports are complete beginning with 1972 fires. There are some fire reports from earlier years as well.	PERMANENT. Cutoff at end of each calendar year. <b>Use BLM 18/32k(4).</b> Transfer full dataset for the lengthiest accumulated date range of report to NARA upon approval of this schedule under 36 CFR 1235.44-50, or whatever standards are in place at the time of the transfer. For subsequent transfers to NARA, transfer the latest full dataset of fire reports dating from the initial year of reporting to the year just ended. (N1-049-09-17/1d) ERA disposition authority: Pending: to be established.

Typical case files include but are not limited to, incoming and outgoing correspondence and memoranda, research proposals and projects for fire- and fuels-related research. Confidentiality: Non-public Record Category 2; Privacy Act Systems Interior/LLM-31, BLM-35. Exclusions: grant-funded final reports, contracts and acquisition actions for equipment products (Schedule 3/3) and property inventory files (Schedule 4/5). Authority: Department of the Interior and Related Agencies Appropriations Act 1998. Location: NIFC.</p>	See sub-items below.
32L(1)	<p>Funded Proposals. These records reflect a complete history of each funded proposal from the date a proposal is funded until the research is complete and a final report is received by the program office. Funded proposal files consist of the proposal describing the research being conducted, peer review comments, correspondence relevant to the proposal, and the final report. Some of the documentation is derived from the Joint Fire Science Program grant-tracking database (item 32L(3) below). A typical research proposal project lasts 3 to 5 years. Grants are funded from between \$25,000 up to \$500,000. This program is funded by DOI and USDA Forest Service.</p>	See sub-items below.
32L(1)(a)	<p>Final reports provided by the grantee, for significant funded projects as selected by JFSP managers using one or more of the following criteria:</p> <ul style="list-style-type: none"> <li>• Observational data of ongoing value,</li> <li>• Information that pertains to the development or modification of special equipment or modeling processes that have ongoing value,</li> <li>• Information that documents criteria, methods, and materials used for electronic tools, instrumentation, and computer applications where this information may inform and guide future science projects,</li> <li>• Information gathered or produced, that is unique or irreplaceable;</li> <li>• Research that results in significantly altered basic assumptions or approaches taken by the wildland fire and restoration community,</li> <li>• Information that support decisions and actions that have a substantial impact on important public policy or private sector decisions;</li> <li>• Research that is the subject of widespread national or international media attention and/or that results in significant social, political, or scientific controversy, or is the subject of extensive Congressional, DOI, or other government agency scrutiny or investigation.</li> </ul>	<p>PERMANENT. <b>32L(4)</b>	Joint Fire Science Program grant-tracking database master data file. The data in the tracking database date from 1998 to the present and include the initial proposal explaining the research project (received via an on-line application hosted on the BLM JFSP website) with applicant contact information. The database is used by the grant program office to track and query project information and allows the JFSP Governing Board access to all JFSP project information. Data includes external peer review of proposals, correspondence applicable to the proposals, funding decisions; and annual progress reports. One record is created for each project.	TEMPORARY. <b>Use BLM 18/32L(4).</b> Destroy/delete data when no longer needed for agency business. (N1-049-10-1/4)

## DRS/GRS/BLM Combined Records Schedules

### Schedule 20 - Electronic Records

#### **Introduction**

This schedule provides disposal authorization for certain electronic records and for specified paper, microform, or other hard copy records that are integrally related to the electronic records.

This schedule applies to electronic records created or received by Federal agencies including those managed for agencies by contractors. It covers records created by computer operators, programmers, analysts, systems administrators, and all personnel with access to a computer. Disposition authority is provided for certain master files, including some tables that are components of data base management systems, and certain files created from master files for specific purposes. In addition, this schedule covers certain electronic records produced by end users in office automation applications. These disposition authorities apply to the categories of electronic records described in GRS 20, regardless of the type of computer used to create or store these records.

GRS 20 does not cover all electronic records. Disposition may not be carried out for electronic records not covered by GRS 20 unless authorized by a Standard Form (SF) 115, Request for Records Disposition Authority, that has been approved by the National Archives and Records Administration (NARA). The records covered by several items in this schedule are authorized for erasure or deletion when the agency determines that they are no longer needed for administrative, legal, audit, or other operational purposes. NARA cannot establish a more specific retention that would be appropriate in all applications. Each agency should, when appropriate, determine a more specific disposition instruction, such as "Delete after X update cycles" or "Delete when X years old," for inclusion in its records disposition directives or manual. NARA approval is not needed to set retention periods for records in the GRS that are authorized for destruction when no longer needed.

Items 1a (in part), 2a, and 16 of this schedule apply to hard copy records used in conjunction with electronic files. Item 1 also covers printouts produced to test, use, and maintain master files. Items 10 and 11 of this schedule should be applied to special purpose programs and documentation for the referenced electronic records whatever the medium in which such programs and documentation exist.

This schedule has been revised to expand the authority agencies have to apply previously approved schedules to electronic records; grant broader authority to agencies to dispose of hard copy records that have been converted to an electronic format; and provide disposition instructions for ad hoc printouts and for documentation associated with permanent electronic records. Additionally, because copies of system security records are now covered by GRS 24, item 5, a cross-reference has been provided for item 11b to that effect. The items affected by the revisions to this GRS 20 schedule are 2, 3, 3.1, 11, and 16.

Electronic versions of most records authorized for disposal elsewhere in the GRS may be deleted under the provisions of item 3 of GRS 20. See also 36 CFR Part 1234 for NARA regulations on electronic records management.

[NOTE 1: The term hard copy records or non-electronic records as used in this schedule includes, in addition to traditional textual files: still picture negatives, prints, slides, and transparencies; aerial photography, maps, charts, and drawings; motion picture film and analog videotape; and analog sound recordings.]

[NOTE 2: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

<p><b>20</b></p>	<p><b>CORPORATE DATA ELEMENT DICTIONARY (DED/CDD) DATA BASE.</b> An electronic repository for all definitive information about data elements, including their use, meanings, sources, characteristics, relationships, authorities, etc. The DED is the primary tool used to implement and maintain the concept of standardized BLM data; it is where metadata (data about data) is maintained. The primary objectives of the DED are: (1) to improve identification of existing, valuable information resources that can be used by others in the same organization and shared with other organizations; (2) to help reduce unnecessary development of computer programs and data elements (redundant data) when suitable programs already exist; (3) to simplify software and data conversion through the provision of consistent documentation; and (4) to increase portability of acquired skills, resulting in reduced personnel training costs. Authority: Various; see BLM Manual 1283. Confidentiality: Non-public record category 2. Location: NOC. Exclusions: Records used to test or update the system (Schedule 20/1); reference copies of system files which may be destroyed when no longer needed for reference or convenience.</p>	<p>See sub-items below.</p>

Schedule 20 - Electronic Records

Item	Record Series Description	Disposition Authority
<b>20a</b>	<b>DED History.</b> Documenting the history of the conception, planning, and development and/or improvement of the system, excluding system documentation (item 20b). Consists of the concept of operations, official record designation documentation (aka records transition plan), quality assurance plan, project feasibility studies, cost benefit analyses, charters, approvals, budgets, life cycle management documentation, training plans, briefing and issue papers, and other project history information. Files may be subdivided by subject as volume warrants.	TEMPORARY. See item 11a(1) above. ----- <i>Former Authority:</i> <i>GRS 20/11a(1)</i> <i>Destroy or delete upon authorized deletion of the related electronic records or upon the destruction of the output of the system if the output is needed to protect legal rights, whichever is later.</i> <i>(N1-GRS-07-4 item 11a1)</i>
<b>20b</b>	<b>DED Data Base Documentation.</b>	See sub-items below.
<b>20b(1)</b>	Documentation Adequate for Servicing and Interpreting the Data Base. Consists of data system specifications, file specifications, code books, record layouts, user guides, output specifications, and similar documentation (regardless of media) about the data base.	TEMPORARY. See item 11a(1) above. ----- <i>Former Authority:</i> <i>GRS 20/11a(1)</i> <i>Destroy or delete upon authorized deletion of the related electronic records or upon the destruction of the output of the system if the output is needed to protect legal rights, whichever is later.</i> <i>(N1-GRS-07-4 item 11a1)</i>
<b>20b(2)</b>	Data Verification and Quality Control Files. The data verification process documents the accuracy or factuality of data through a comparison to the source data. Data sampling is a means of checking selected portions of data in a data base to determine its quality level. Error detection involves comparing the data against the source documentation and comparing it with established data standards to determine if the data is in conformance with the standards. Documentation of the sampling and error detection activities consists of the date of action, steps taken, name of parties involved, summary of errors detected with an analysis of the errors, and the date corrective actions are taken. Exclusions: Quality assurance plans which are part of the project history files (item 20a).	TEMPORARY. See item 11a(1) above. ----- <i>Former Authority:</i> <i>GRS 20/11a(1)</i> <i>Destroy or delete upon authorized deletion of the related electronic records or upon the destruction of the output of the system if the output is needed to protect legal rights, whichever is later.</i> <i>(N1-GRS-07-4 item 11a1)</i>
<b>20c</b>	<b>DED Software.</b> Application software necessary to use or maintain the master DED data base.	TEMPORARY. See item 11a(1) above. ----- <i>Former Authority:</i> <i>GRS 20/11a(1)</i> <i>Destroy or delete upon authorized deletion of the related electronic records or upon the destruction of the output of the system if the output is needed to protect legal rights, whichever is later.</i> <i>(N1-GRS-07-4 item 11a1)</i>

Electronic file that integrates and organizes wildlife habitat data for planning and decision-making. Provides editing and storage of field collected data and production of standard reports for managers. Provides data about habitat sites and species that use the area; puts wildlife species data together by niches and guilds. Site Writeup Area (SWA) or Habitat Site is basic mapping unit so vegetative data on the same site can be obtained from Ecological Site Inventories. Habitat sites with biological commonalities are stratified and characterized into standard habitat sites. System provides data interchange with other classification systems of federal, state, and private organizations. Total of 101 programs. Confidentiality: Non-public record category 2. 38	<p><b>MINERALS AUTOMATED INSPECTION RECORDS SYSTEM (AIRS) [3160].</b>                      A menu-driven microcomputer-based system that allows the BLM Field Offices to enter, store, and track data about inspections of oil and gas wells on Indian and federal lands. The system also generates standardized reports and allows ad hoc queries of the various data files. Each BLM oil and gas inspection office is equipped with an AIRS resident microcomputer. Using the AIRS tape-writing facility, once a month each inspection office creates a cassette tape of their AIRS data. Data from Field Office tapes are then consolidated into the AIRS central data base (CDB) on a microcomputer at the Service Center. Each month, the Service Center sends a copy of the CDB data files on cassette tapes to the Headquarters Fluid Minerals Information Office and Minerals Management Service (MMS). At the same time, an extract of only the CDB well and header information is sent to MMS on a 9-track tape. CDB interfaces with MRO (item 46). 52	<p><b>GEOGRAPHIC INFORMATION SYSTEM (GIS) [9167].</b></p> <p>Background: A Geographic Information System (GIS) is an automated system designed to capture, store, edit, analyze, and display geographically-referenced data. The GIS data are used for natural resources-related studies and inventories; planning studies; fish and wildlife projects; and a variety of other uses which involve analysis of the geographic distribution of data. Products include maps (both hard copy and electronic images) and other graphics, tables of statistics and analytical methods. Products are created through use and manipulation of GIS data, but are not themselves data. They are generally covered under other schedules. The source GIS data are stored electronically in specialized industry standard GIS software and continually updated. The source data can be exported in a variety of formats retaining varying levels of the original functionality. In general, GIS data are created and maintained at the BLM Field or State Offices and aggregated to national datasets. The systems may contain information uniquely collected by the BLM offices as well as data received from other federal, state and local agencies, and commercial sources.</p> <p>System-centric GIS data comprises the corporate official source data. Project-centric GIS data is an extracted subset of system-centric data that, at the end of the project, updates the system-centric data. Project-centric data has a defined beginning and end date whereas system-centric data is on-going. This schedule covers system-centric GIS data in terms of submission to NARA for permanent retention. It is important to note that only a fraction of all GIS data is eventually submitted to NARA. The agency offices are required to maintain their own archives in accordance with their own needs assessment and policy.</p> <p>Preservation of both system-centric and project-centric GIS data, in fully functional format, will be the responsibility of BLM State Offices. Project-centric GIS data and the portion of system-centric GIS data not covered in item 52a below, as well as excluded GIS products and applications, are further described under EXCLUSIONS:</p> <p><i>(continued next page)</i></p>	See sub-items below.

Item	Record Series Description	Disposition Authority
52 Cont.	<p>Exclusions are <b>TEMPORARY</b> records per NARA, but they are important records that must be retained and managed by the agency until no longer needed for agency business which may be many decades.</p> <p>(1) Project-centric GIS data and GIS products (described above in background) are not covered by this item. Final project decision records are <b>filed under the appropriate subject schedule item</b>. There is potentially a great deal of important source GIS data, interim products and analysis that were used in BLM decisions. These GIS data and products are stored intact and readily available at the relevant BLM office for future use and are retained there until the statute of limitations for litigation has passed. At that time the project-centric GIS data are fully incorporated back into system-centric GIS data and only the final project decision record is transferred to NARA. The final decision record may contain GIS products, but not the source data.</p> <p>(2) Applications and databases residing outside of system-centric GIS are excluded. These applications and databases may reference and have important information about spatial features contained in system-centric GIS (described in item 52a below), but the records are <b>filed under separate schedules</b>.</p> <p>(3) Unaltered or minimally altered data layers received from other federal, state and local agencies, and commercial sources (i.e. no significant additions to data content of unique BLM data) and the data can be reacquired from the external sources when needed. This information can be deleted when no longer needed for business purposes under General Records Schedule 20, item 2C.</p> <p>(4) The following GIS datasets, while very important to BLM GIS systems, are assigned to other Federal agencies by OMB Circular A-16, Appendix E, and are excluded from BLM submission:</p> <ul style="list-style-type: none"> <li>• Hydrography (USGS)</li> <li>• Digital Orthophotography (USGS)</li> <li>• Elevation models (USGS)</li> <li>• Soils and Ecological Sites (NRCS)</li> <li>• Vegetative cover (USGS and USFS)</li> <li>• Fire history (National Interagency Fire Center)</li> <li>• Cultural (NPS)</li> <li>• Climate (NRCS)</li> </ul> <p>Most, but not all of the listed themes have interagency data standards. The BLM assumes that the assigned agency (which might change) will coordinate across all agencies, accepting BLM's data modifications and incorporating them into the final datasets prior to submission to NARA. Because this is an assumption, BLM offices are responsible for maintaining the data in their own long-term archives.</p> <p><i>(continued next page)</i></p>

DRS/GRS/BLM Combined Records Schedules

Schedule 21 - Audiovisual Records

**Introduction**

This schedule covers audiovisual and related records created by or for the Bureau of Land Management (BLM) as well as those acquired in the course of business. For audiovisual records that are not described in this schedule, agencies must request disposition authority by submitting a SF-115, Request for Records Disposition Authority, to the National Archives and Records Administration (NARA) Life Cycle Management Division (NWML).

Audiovisual records include still and motion picture photography, graphic materials, and sound and video recordings. Related documentation includes: (1) production files or other files documenting the creation, justification, ownership, and right to the records; and (2) finding aids used to identify or access the records.

This schedule does not cover (1) cartographic records, (2) remote sensing imagery recorded on film or magnetic tape, or (3) microfilm copies of textual records. Disposable cartographic records and remote sensing imagery recorded on film are covered by Schedule 17; temporary computerized data are covered by Schedule 20 and 23; and microfilm copies of textual records that have been authorized by NARA for destruction need not be separately scheduled, in accordance with 36 CFR 1230.10(b).

Guidance about the identification, maintenance, use and disposition of potentially permanent audiovisual records is provided in the NARA publication, "Managing Audiovisual Records: An Instructional Guide" (copies are available from the NARA Publications Distribution Staff) and NARA records management regulations at 36 CFR 1228.184, Audiovisual Records.

The word "destroy" is used to authorize the destruction of data or information. Erasable media such as audio tape should be reused whenever practical. Silver-bearing photographic film must be destroyed in accordance with 41 CFR 101-45.10, "Recovery of Precious Metals."

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

DRS/GRS/BLM Combined Records Schedules

Schedule 22 - Evaluation, Inspection and Audit Records

**Introduction**

The Inspector General monitors agency programs and operations to prevent and reduce waste and fraud and to improve agency management. The Inspector General Act of 1978, as amended, and other legislation established an Office of Inspector General (OIG) in selected Government agencies. Several other agencies have created nonstatutory OIGs. General Records Schedule 22, Inspector General Records, was withdrawn in December 1998, with the issuance of transmittal 8 from the National Records and Records Administration (NARA).

This schedule covers the files that are created by the Bureau of Land Management (BLM) when the Inspector General, the Department of the Interior, or the BLM conducts and supervises audits and investigations; recommends policies to promote economy, efficiency, and effectiveness and to prevent fraud and abuse; and reports problems, deficiencies, and progress to the BLM Director or office heads.

General subject files concerning evaluation inspection, and audit records are covered by Schedule 23, Item 1a. Indexes to evaluation, inspection, and audit files are covered by Schedule 23, Item 9.

This schedule does not authorize disposal of investigative files for cases that result in national media attention, Congressional investigation, or substantive changes in the BLM policy or procedure. Offices who create or maintain such files must submit an SF-115 to the BLM Records Officer in accordance with the requirements of 36 CFR 1228.26.

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

DRS/GRS/BLM Combined Records Schedules

Schedule 23 - Records Common to Most Offices

**Introduction**

This schedule incorporates the records common to most offices as described in General Records Schedule 23 and adds the Bureau of Land Management (BLM) general correspondence and reader files. This schedule covers administrative subject files; facilitative records such as suspense files, tracking and control records, calendars, and indexes; transitory documents. This schedule does not include materials that the BLM has determined to be nonrecord or to materials such as calendars or work schedules claimed as personal.

The office administrative files described under item 1 are records retained by the originating office as its record of initiation of an action, request, or response to requests for information. This item may be applied only to separate administrative files containing such records as copies of documents submitted to other offices for action including budget feeder documents, purchase orders, and training requests. Item 1 may not be applied to files that also contain program records (Schedule 16/20), and it may not be applied by an office that receives and takes action on documents submitted by other offices.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

<b>1</b>	<b>OFFICE ADMINISTRATIVE FILES.</b> Records accumulated by individual offices that relate to the internal administration or housekeeping activities of the office rather than the functions for which the office exists. In general, these records relate to the office organization, staffing, procedures, and communications; the expenditure of funds, including budget records; day-to-day administration of office personnel including training and travel; supplies and office services and equipment requests and receipts; and the use of office space and utilities. They may also include copies of internal activity and workload reports (including work progress, statistical, and narrative reports prepared in the office and forwarded to higher levels) and other materials that do not serve as unique documentation of the programs of the office. Authority: 36 CFR 1222.10. Confidentiality: Non-public record category 2. Location: All. Exclusions: record copies of organizational charts, functional statements, and related records that document the essential organization, staffing, and procedures of the office (Schedule 16/18). ## DRS/GRS/BLM Combined Records Schedules

### Schedule 24 - Information Technology Operations and Management Records

#### **Introduction**

This schedule provides disposal authorization for certain files created and maintained in the operation and management of information technology (IT) and related services. As defined in the Information Technology Management Reform Act of 1996 (now the Clinger-Cohen Act), “information technology” includes computers, ancillary equipment, software, firmware and similar procedures, services (including support services), and related resources.

This GRS does not cover all records relating to information technology operations and management. Offices with responsibility for IT operations also maintain administrative records covered by other GRS and records not in the GRS that must be scheduled by the agency. In addition, this GRS does not apply to system data or information content, which must be scheduled separately by submitting an SF 115, Request for Records Disposition Authority, to NARA.

The disposition instructions apply to records regardless of physical form or characteristics. Records may be maintained on paper, in microform, or electronically. Dispositions apply, however, only to records that are maintained as described in each item or sub item. If documents are part of a larger case file or recordkeeping system that contains records not covered in this GRS, agencies must separately schedule that file or system by submitting an SF 115 to NARA. If records covered by more than one item in this schedule are maintained together in one file or recordkeeping system, agencies must retain the records for the longest retention period authorized for those items.

Note that GRS 20, Electronic Records, remains in effect. GRS 20 covers certain temporary files associated with database management. This new schedule supplements GRS 20 by providing disposal authority for temporary records relating to overall IT management, as opposed to the operation and use of specific systems. NARA is reviewing alternatives to GRS 20 and will develop revised requirements as it explores new approaches to managing electronic records.

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

Included are policies and procedures planning records; stand-up configuration and validation records; operation records; audit and monitor records; and termination, consolidation, or reorganizing records.</p> <p>Policies and procedures planning records relate to defining and establishing PKI systems. Records relate to such activities as determining that a PKI should be established; creating project implementation plans; creating the certificate policy (CP), certification practice statement (CPS), and other key operating documents; developing procedures in accordance with the CP and CPS; conducting risk analyses; developing records management policies (including migration strategies); and selecting the entity that will serve as registration authority (RA).</p> <p>Stand-up configuration and validation records relate to installing and validating both the Certification Authority (CA) and Registration Authority (RA), obtaining final approval or rejection from the agency's oversight or authorizing body, creating and generating a CA signature key, testing security procedures for the CA and RA, validating certification revocation procedures, and establishing back-up and storage for the PKI system.</p> <p>Operation records relate to the certification application; certificate issuance and key generation (including key pair generation and private key loading and storage of private keys and components of private keys); certificate acceptance, validation, revocation, suspension, replacement, and renewal; creating and maintaining an event log; and installing and validating software updates. Audit and monitor records relate to conducting periodic internal and external reviews of auditable events specified in the Federal Bridge Certification Authority (FBCA) X.509 Certificate Policy and other Entity CA policies, monitoring compliance with security requirements specified in the CPS and other operating procedures, investigating internal fraud or misconduct, and conducting internal and external audits of software and systems security.</p> <p>Termination, consolidation, or reorganization records relate to terminating, consolidating, or reorganizing a PKI; notifying subscribers of decisions, transferring inactive keys and revocation certificate lists to storage repositories, transferring consenting subscribers' and certificates and related materials to a new Certificate Authority, destroying sensitive records involving privacy (in accordance with an authorized records schedule), and shutting down and disposing of RA hardware and CA software.</p> <p><b>NOTE:</b> Select PKI administrative records serve as transaction records that must be retained as part of the trust documentation set with transaction-specific records. Agencies must determine which PKI administrative records are embedded with transaction-specific records as transaction records. These administrative records may vary from transaction-to-transaction.</p>	See sub-items below.

<p><b>13b</b> <b>GRS 3.2-062</b></p>	<p>PKI Transaction specific Records. Records relate to transaction-specific records that are generated for each transaction using PKI digital signature technology. Records are embedded or referenced within the transaction stream and may be appended to the transaction content or information record. Along with PKI administrative and other administrative records, transaction-specific records are part of the PKI trust documentation set that establish or support the trustworthiness of a transaction. They may vary from transaction-to-transaction and agency-to-agency. When retained to support the authentication of an electronic transaction content record (information record), PKI digital signature transaction records are program records.</p> <p><b>NOTE:</b> Extreme care must be taken when applying the GRS-PKI to transaction records. Destruction of the transaction-specific and administrative records embedded in the transaction stream prior to the authorized retention of the information record that they access/protect will render the PKI incapable of performing what it is designed to do-protect and provide access to the information record. Due to the relative newness of PKI technology, both from an implementation and a litigation perspective, it is recommended that agencies identify all PKI transaction records (including PKI select administrative records embedded in the transaction stream and transaction-specific records) to be retained as part of the trust documentation for the records the PKI is designed to protect and or access and link the retention of the transaction records with that of the information record it protects/accesses. Transaction records must be retained as trust documentation set records together with the content/information record.</p>	<p>TEMPORARY. <b>Use N1-GRS-07-3 item 13b.</b> Destroy/delete when 7 years 6 months to 20 years 6 months old, based on the maximum level of operation of the appropriate CA and after the information record the PKI is designed to protect and/or access is destroyed according to an authorized schedule, or in the case of permanent records, when the record is transferred to NARA legal custody. Longer retention is authorized if the agency determines that transaction-specific PKI records are needed for a longer period.</p> <p>----- <i>Former Authority:</i> <i>GRS 24/13b</i> <i>(N1-GRS-07-3 item 13b)</i></p>

## DRS/GRS/BLM Combined Records Schedules

### Schedule 25 – Ethics Program Records

#### **Introduction**

This schedule incorporates the records described in General Records Schedule 25, which describes personnel records common to most federal agencies, and adds the following additional personnel records maintained by the Bureau of Land Management (BLM):

Title IV of the Ethics in Government Act of 1978 as amended, 5 U.S.C. appendix, title IV, authorizes the development of an executive branch-wide ethics program to ensure that decisions made by employees are neither tainted by, nor appear to be tainted by, any question of conflicts of interest. Under the relevant sections of title IV and Office of Government Ethics (OGE) executive branch-wide regulation at 5 CFR part 2638, each agency is required to establish an ethics program. This schedule covers records documenting the activities of executive branch agency ethics program offices and provides disposition for financial disclosure reports; ethics agreements; outside employment and activity records; referrals of violations of criminal conflict of interest statutes; ethics determination, advice, consultation, and training records; and other commonly held ethics program records. Records pertaining to legislative branch and judicial ethics programs, the Hatch Act, the Whistleblower Protection Act, procurement integrity and other areas often associated with, but not expressly under the authority of executive branch ethics programs, are not covered by this schedule.

Master lists of financial disclosure report filers, individuals requesting outside employment and activities approval, and other types of ethics-related master lists are not included in this schedule. Ethics-related master lists that are used solely for the purpose of tracking and controlling ethics records should be disposed of in accordance with GRS 23 Item 8, Tracking and Control Records. Master lists that are used for purposes in addition to tracking and controlling ethics records should be disposed of in accordance with the disposition for the underlying records as listed in this schedule or as otherwise scheduled.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[Note 1: Executive branch ethics program records are sometimes needed in an ongoing investigation. Such records should be retained beyond their approved retention period until no longer needed in the investigation.]

[NOTE 2: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

DRS/GRS/BLM Combined Records Schedules

Schedule 26 – Temporary Commissions, Boards, Councils and Committees

**Introduction**

This schedule covers records created and maintained by temporary commissions, boards, councils and committees (including continuing entities governed by renewable charters such as agency advisory committees). In the case of interagency bodies, this schedule covers the records maintained by the designated secretariat as well as records accumulated by other commission members.

This schedule does not apply to the records of Presidential commissions, boards, councils and committees covered by the Presidential Records Act.

For convenience, the term “commission” is used in this schedule to cover all types of temporary organizations.

The record series described in this schedule are created and maintained in different media and formats, therefore this schedule is written to authorize the disposition of the records in any media (media neutral). Agencies are required to refer to the most current version of the Code of Federal Regulations (CFR) and other relevant guidance to ensure that the media and format that is chosen by the agency meets NARA’s transfer requirements for permanent records. See 36 CFR Sections: 1228.266 – Audiovisual Records; 1228.268 – Cartographic and Architectural Records; 1228.270 – Electronic Records; 1230.026 – Microform Records.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE 1: Interagency or Advisory Committee records were previously schedule 16, item 8; now see item 5 below.]

[NOTE 2: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

## DRS/GRS/BLM Combined Records Schedules

### Schedule 27 - Records of the Chief Information Officer

#### **Introduction**

This schedule provides disposal authorization for certain records created and maintained by Federal Chief Information Officers (CIO) and their program offices. This schedule applies to the records of CIOs at agency or departmental headquarters as well as those of deputy and subordinate CIOs at the bureau or Field Office level. This schedule does not apply to officials with Government-wide responsibilities for information resources management (IRM) and information technology (IT) governance.

In accordance with the Clinger-Cohen Act (originally the Information Technology Management Reform Act), CIOs of 24 major departments and agencies have IRM as their primary duty. They are responsible for advising and assisting the agency's executive with IT acquisition and management; developing and maintaining the agency's IT architecture; promoting the efficient design and operation of the agency's major information resources management processes; monitoring the performance of IT programs of the agency; and developing the knowledge and skill of IT staff. CIOs may also lead, coordinate, or participate in programs to support the mandates of the Paperwork Reduction Act, Government Paperwork Elimination Act, Federal Records Act, E-Government Act of 2002, Privacy Act, Government Performance and Results Act, and other Federal laws and regulations relating to IRM.

This schedule does not cover all records relating to the work of CIOs. CIOs are often responsible for programs and activities whose records are already covered by an approved GRS. Records not described in this or any other GRS must be scheduled by submission to NARA of an SF 115, Request for Records Disposition Authority. If records are part of a larger case file or recordkeeping system that contains records not covered in this schedule, agencies must separately schedule those records or systems by submitting an SF 115 to NARA. If records covered by more than one item in this schedule are maintained together in one file or recordkeeping system, agencies must retain the records for the longest retention period authorized for those items.

The disposition instructions apply to records regardless of physical form or characteristics. Records may be maintained in any format on any medium.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE 1: GRS 20, Electronic Records, remains in effect. GRS 20 covers certain temporary files associated with database management. This schedule supplements GRS 20 by providing disposal authority for records relating to the administration of a CIO's office, as opposed to the operation and use of specific systems. This schedule does not apply to the data or information content of IT systems. Records relating to specific systems that support or document the agency's mission must be scheduled individually by submission of an SF 115 to NARA.]

[NOTE 2: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

Item	Record Series Description	Disposition Authority (*See intro for records prior to January 1, 1921)
<p><b>1</b>  <b>DRS</b> <b>1.4B</b></p>	<p><b>Information Technology (IT) Program Planning Records.</b> Records relating to the development of agency IT programs. Included are records that document agency-wide IT goals; specify milestones to be achieved; identify performance measures for the agency’s IT portfolio; or summarize the underlying principles and approach by which the agency will plan for and manage its IT resources. Records may include strategic and tactical plans documenting the implementation and maintenance of IT systems in support of the agency mission and also may include records supporting formally issued plans, such as records of concurrence, comments, clearances, justifications, and other issuance records. <b>Note:</b> This item does not apply to the data content or design of individual IT systems. Records relating to specific mission-related systems must be scheduled individually by submission of an SF 115 to NARA. (N1-GRS-04-4 item 1 Note)</p>	<p>TEMPORARY. Schedule 30 - Land and Mineral Electronic Record Systems

Introduction

This schedule describes current and legacy Land and Mineral Electronic Record Systems.

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

Item	Record Series Description	Disposition Authority
<b>1</b>	<p><b>AUTOMATED LAND AND MINERAL RECORD SYSTEM (ALMRS).</b>                      An application designed to integrate the functions of Records System Release 1.0 (RR1), Case Recordation System (CRS), Online Recordation &amp; Case Access System (ORCA), Mining Claim Recordation System (MCRS), Legal Land Description (LLD), and Status (Schedule 30/3-9) and provides the ability to access the Bond and Surety System (Schedule 30/10), and Geographic Coordinate Data Base (GCDB) (Schedule 30/9). ALMRS was designed as a distributed system having unique components in each State Office; no single master file of all information would exist. ALMRS would incorporate Serial Register Pages and Logs (Schedule 4/32); it would not replace any lands and minerals case files. Authority: 43 CFR 1813. Confidentiality: During development, Non-public record category 3; after installation, a combination of public record category 1, discretionary category 2, and Non-public category 3; Privacy Act System Interior/LLM-33. Essential (Vital): Rights and interest records. Exclusions: Official serialized cases and related indexes and serial pages (Schedule 4, items 7, 20-23, 25, 51-72); records used to test or update the system (Schedule 20/1); records associated with the Corporate Data Dictionary (metadata) (Schedule 20/25); reference copies of any system files which may be destroyed when no longer needed for reference or convenience.</p>	<p><b>NOTE:</b> ALMRS was not deployed. Only the Project History record and Bureau Level System Documentation was created.</p> <p>This schedule item is maintained for historic purposes.</p>
<b>1a</b>	<p>ALMRS Project History. Record copies of files that document the conception, planning, and development and/or improvement of the ALMRS Project, excluding system documentation (item b).</p>	<p>See sub-items below.</p>
<b>1a(1)</b>	<p>Records that Document Significant Changes in or Revisions to the BLM Recordkeeping Policies. Consists of the concept of operations, project charter, approvals, official record designation documentation (aka records transition plans), quality assurance plans, briefing and issue papers, and other project history information of continuing value. Files are subdivided by subject as volume warrants. Location: NOC.</p>	<p>PERMANENT. Cutoff end of FY in which ALMRS is certified as an official records system. <b>Use BLM 30/1a(1).</b> Transfer to FRC 1 year after cutoff. FRC transfers to NARA 10 years after cutoff. (N1-49-94-1, 30/1a(1))</p>

<b>1a(2)</b>	Other Project History Files. Feasibility studies, cost benefit analyses, plans, approvals, life cycle management documentation, inreach and outreach plans, training plans, benefit analyses, plans, approvals, life cycle management documentation, inreach and outreach plans, training plans, and other project history information of temporary value. Files are subdivided by subject as volume warrants. Location: NOC.	TEMPORARY. Cutoff end of FY in which ALMRS is certified as an official records system. <b>Use BLM 30/1a(2).</b> Transfer to FRC 1 year after cutoff. FRC destroys 25 years after cutoff. (N1-49-94-1, 30/1a(2))
<b>1b</b>	ALMRS System Documentation	See sub-items below.
<b>1b(1)</b>	Documentation Necessary for Servicing and Interpreting the System	See sub-items below.
<b>1b(1)(a)</b>	Bureau-Level Documentation. Technical description of the electronic records being described, consisting of data modeling documentation, data system specifications, file specifications, data element descriptions, code books, record layouts, user guides, output specifications, and similar documentation (regardless of media) necessary for servicing and interpreting the system. Location: NOC.	PERMANENT. Cutoff end of FY in which ALMRS is certified as an official records system. <b>Use BLM 30/1b(1)(a).</b> Transfer to NARA with 30/1d(1), ALMRS Master Data Files, 1 year after cutoff. (N1-49-94-1, 30/1b(1)(a))
<b>1b(1)(b)</b>	State-Level Documentation. Technical description of the electronic records being transferred and copies of supplemental, state-generated instructions on interpretation of source data, application of data standards, data entry instructions, and similar documentation (regardless of media) necessary for servicing and interpreting the system. Location: SO.	<i>Former Authority:</i> PERMANENT. Service Center will collect all records and transfers to NARA with the master file (30/1d). Retain a copy for reference until no longer needed. (N1-49-94-1, 30/1b(1)(b))
<b>1b(2)</b>	Data Verification and Quality Control Files. The data verification and quality control process documents the accuracy or factuality of data through a comparison to the source data. Data sampling is a means of checking selected portions of data in a data base to determine its quality level. Error detection involves comparing the data against the source documentation and comparing it with established data standards to determine if the data is in conformance with the standards. Documentation of the sampling and error detection activities consists of the date of action, steps taken, name of parties involved, summary of errors detected with an analysis of the errors, and the date corrective actions are taken. In the event of litigation, the records in this series may be required as evidence that the system is trustworthy, accurate, and reliable. Location: NOC, SO. Exclusions: Quality assurance plans which are part of the project history files (item a); see BLM Manual 1283.	<i>Former Authority:</i> TEMPORARY. Cutoff end of FY in which documentation is created. Service Center collects all records and transfers to FRC 4 years after cutoff. FRC destroys 25 years after cutoff. (N1-49-94-1, 30/1b(2))
<b>1c</b>	ALMRS Software. Application software necessary to use or maintain ALMRS. The master is maintained by NOC; copies are distributed to SOs. Location: NOC, SO.	<i>Former Authority:</i> TEMPORARY. Delete when superseded or obsolete. (N1-49-94-1, 30/1c)

<b>1d</b>	ALMRS Master Data Files. Note: ALMRS is a distributed system; no single master file of BLM-wide data exists.	See sub-items below.
<b>1d(1)</b>	National Archives File. Magnetic master, created by each state office at end of the FY, by copying (not removing) all closed cases for that FY to tape in a hardware and software independent format as required by 36 CFR 1228.188. NARA maintains permanent electronic records under environmentally-controlled conditions and provides copies to BLM upon request. Location: SO.	<i>Former Authorities: PERMANENT. 1) At end of FY after ALMRS is certified as an official records system, copy all closed cases in the system and send to Service Center. Service Center transfers to NARA with the system documentation (30/1b(1)(b)) and GCDB master file (30/9d). 2) Thereafter, at end of each FY, copy only cases closed during that FY, send to Service Center. Service Center transfers to NARA. (N1-49-94-1, 30/1d(1)) Superseded by DAA-0049-2013-0004-0001.</i>
<b>1d(2)</b>	Shelf List File. Magnetic master, created by each state office, by copying to tape the index of the records being transferred to NARA. The index is created by the system when the National Archives File tape (item d(1)) is prepared. Cases are indexed by serial number, case type designation, customer name, legal description, serialization date, case closure date, etc. Location: SO.	<i>Former Authorities: TEMPORARY. Retain until no longer needed for reference. (N1-49-94-1, 30/1d(2)) Superseded by DAA-0049-2013-0004-0001.</i>
<b>1d(3)</b>	The BLM History File. Magnetic master, created by each state office at the end of each FY, by moving off the system to tape all cases associated with the temporary use of lands and resources (leases and permits for oil and gas, other minerals, occupancy, etc.) that have been closed for 3 years. Cases that affect land title status (conveyances, acquisitions, exchanges, withdrawals, classifications, rights-of-way, etc.) will always remain on the system. Use cases are left on the system for 3 years after closure in the event of new actions that may occur after closure. The system creates and maintains on the system an index of the cases that are moved to the history file. This index also contains data on the location of terminated physical (paper) case files. If new actions occur after 3 years, cases may be brought back onto the system from the BLM History File or from a copy of the National Archives File (item d(1)) which can be obtained from NARA. Records described in this series are removed from the system to prevent overloading the system with noncurrent and seldom-referenced data. The History tapes are recopied and revalidated annually. Location: SO.	<i>Former Authorities: TEMPORARY. Retain until no longer needed for reference or for reconstruction of closed cases. (N1-49-94-1, 30/1d(3)) Superseded by DAA-0049-2013-0004-0001.</i>

<b>1e(1)</b>	Security Tapes. Electronic files of data identical in physical format to the master file created in case the master is damaged or inadvertently erased.	<i>Former Authority: TEMPORARY. Cutoff when tape is full and transfer to off-site storage. Delete after the identical records are deleted, or when replaced by a subsequent security backup file. GRS 20/8b.</i>
<b>1e(2)</b>	Essential (Vital) Records Tapes. Electronic files of data identical in physical format to the master file created at the end of each FY to protect vital rights and interests records in accordance with 36 CFR 1236.	<i>Former Authority: TEMPORARY. Transfer to FRC immediately after tape is created. FRC destroys when replaced by new tape. (NI-49-94-1, 30/1e(2))</i>
<b>1e(3)</b>	Usage Monitoring Tapes. Created daily to monitor system usage, including log-in files, password files, audit trail files, system usage files, and cost-back files used to assess charges for system use.	<i>Former Authority: TEMPORARY. Cutoff when tape is full. Transfer to off-site storage immediately after it is created. Delete 7 years after cutoff. (NI-49-94-1, 30/1e(3))</i>
<b>1f</b>	ALMRS Input/Source Documentation. Data entry sheets, nonrecord copies of case documents, and electronic versions of in-put/source documents that are used solely to create, update, or modify the records in an electronic medium and are not required for audit or legal purposes. Exclusions: Official serialized case file documents that are used for input/source documentation; disposition of serialized cases and related indexes and serial pages is authorized by Schedule 4 (see items 7, 20-23, 25, 51-72). Location: SO, FOs.	<i>Former Authority: TEMPORARY. Destroy or delete after the information has been converted to an electronic medium and verified, or when no longer needed to support the reconstruction of, or serve as the backup to, the master file (item d), whichever is later. <b>1g</b>	ALMRS Outputs. Information generated for reference purposes by computer and placed on an outside medium such as paper or electronic storage medium. Location: May be found at all organizational levels. Exclusions: Outputs that may become a part of official files; the disposition of such outputs will be governed by the disposition authority for the files to which they relate (e.g., outputs used for budgeting and interfiled with other budget records are covered by Schedule 5; outputs used as source documents for and filed within public lands statistics publication files are covered by Schedule 16/31b).	<i>Former Authority: TEMPORARY. Destroy or delete when no longer needed for current business. (NI-49-94-1, 30/1g)</i>

2	<p><b>RECORDS SYSTEM RELEASE 1.0 (RR1) (ALASKA).</b>                      RR1 (aka Interim 1) is a system installed in Alaska in 1992 that replaced the Alaska Automated Land and Mineral Record System (AALMRS). RR1 customer, action history and land descriptions for all serialized lands and minerals authorization and title cases and provides storage of extensive historical and current case-related data, based on the BLM standards. It allows for creation, updating, deleting, and retrieving all data in a number of report formats; allows case group, township or identified window area reporting and querying. Other capabilities include accounting advice generation and support to monetary accounting (escrow), customer data maintenance and reporting, and land survey data. RR1 also includes six subsystems developed in Alaska which interface with the core system. Authority: 43 CFR 1813.                      Confidentiality: Public record category 1, except some files may contain information which is Non-public record category 2; Privacy Act System Interior/LLM-33. Essential (Vital): Legal and financial rights records. Exclusions: Official serialized cases and related indexes and serial pages (Schedule 4, items 7, 20-23, 25, 51-72); records used to test, update, and monitor the system (Schedule 20/1); records associated with the Corporate Data Dictionary (metadata) (Schedule 20/25); reference copies of any system files which may be destroyed when no longer needed for reference or convenience. NOTE: Records in this system will transition in their entirety to the ALMRS (Schedule 30/1).</p>	See sub-items below.
2a	<p>RR1 Project History. Record copies of files that document the conception, planning, and development and/or improvement of RR1, excluding system documentation (item b). Consists of the concept of operations, official record designation documentation (aka records transition plan), quality assurance plans, project feasibility studies, cost benefit analyses, charters, approvals, budgets, life cycle management documentation, training plans, briefing and issue papers, and other project history information. Files are subdivided by subject as volume warrants. Record copies for core system maintained by NOC; record copies for subsystems maintained by Alaska SO. Location: NOC, Alaska SO.</p>	<p>TEMPORARY. Cutoff end of FY in which ALMRS (Schedule 30/1) is certified as an official records system.  <b>Use BLM 30/2a.</b>                      Transfer to FRC 1 year after cutoff. FRC destroys 25 years after cutoff.                      (N1-49-94-1, 30/2a)</p>
2b	<p>RR1 System Documentation. Record copies.</p>	See sub-items below.
2b(1)	<p>Documentation Necessary for Servicing and Interpreting the System. Data modeling documentation, data system specifications, file specifications, data element descriptions, code books, record layouts, user guides, output specifications, and similar documentation (regardless of media) for servicing and interpreting the system. Location: NOC.</p>	<p>TEMPORARY.  <b>Use BLM 30/2b(1).</b>                      Destroy or delete upon authorized destruction of the master file (item d). 2b(2)	Data Verification and Quality Control Files. The data verification and quality control process documents the accuracy or factuality of data through a comparison to the source data. Data sampling is a means of checking selected portions of data in a data base to determine its quality level. Error detection involves comparing the data against the source documentation and comparing it with established data standards to determine if the data is in conformance with the standards. Documentation of the sampling and error detection activities consists of the date of action, steps taken, name of parties involved, summary of errors detected with an analysis of the errors, and the date corrective actions are taken. Excludes quality assurance plans which are part of the project history files (item a). In the event of litigation, the records in this series may be required as evidence that the system is trustworthy, accurate, and reliable. Location: Alaska SO.	TEMPORARY. Cutoff end of FY in which documentation is created. <b>Use BLM 30/2b(2).</b> Transfer to FRC 4 years after cutoff. FRC destroys 25 years after cutoff. (N1-49-94-1, 30/2b(2))
2c	RR1 Software. Application software necessary to use or maintain RR1. The master is maintained by NOC; copies are distributed to Alaska SO. Location: NOC, SO.	TEMPORARY. <b>Use BLM 30/2c.</b> Delete upon authorized destruction of the master file (item d). (N1-49-94-1, 30/2c)
2d	RR1 Master Data File. Magnetic master, created by Alaska State Office, by copying to tape all data in the system at the time of migration to ALMRS. Location: Alaska SO.	TEMPORARY. <b>Use BLM 30/2d.</b> Delete after ALMRS (Schedule 30/1) is certified as an official records system. (N1-49-94-1, 30/2d)
DRS 1.4A1	2e RR1 Backup Tapes. Electronic file of data identical in physical format to the master file and retained in case the master is damaged or inadvertently erased. Location: Alaska SO.	TEMPORARY. Cutoff when replaced by subsequent backup file. <b>Use DAA-0048-2013-0001-0013.</b> Destroy no later than 3 years after cutoff. ----- <i>Former Authorities:</i> <i>GRS 20/8b</i> <i>Delete after the identical records are deleted, or when replaced by a subsequent security backup file.</i> <i>(N1-GRS-95-2 item 8b)</i> <i>Superseded by:</i> <i>GRS 3.2, item 051,</i> <i>DAA-GRS-2013-0006-0008.</i> <i>Destroy immediately after the identical records have been deleted or replaced by a subsequent backup file.</i>

3	<p><b>CASE RECORDATION SYSTEM (CRS).</b>                      A centralized data base for recording data about lands and minerals serialized cases since 1982. Categories of data include case identification data, financial data, name and address data, legal description, action data, and general remarks. (Note: while the capability for financial data exists, it is usually not entered). Case identification data consists of the serial number, case type in a coded format (a 6-digit code that references the main section of the 43 CFR that authorizes the program), the number of acres involved, and the commodity in coded format. Name and address data identifies the entity(s) associated with the case, including name of the entity, mailing street address, city, state, zip code, an identification number, category code of the entity, the interest relationship code describing the entity's role in the case (applicant, surface manager, etc.), and the percent interest delineating the relationship in the case. For PLSS states, legal description data delineates the land in accordance with a cadastral or special survey, including the principal meridian, township, range, section; the survey type, survey number, survey number suffix; the subdivision composed of the aliquot part and nominal location; lot designations; and management agency. Includes geographic table information. For the non-PLSS states, legal description includes the state, county, survey type, survey number, survey number suffix, and the subdivision of metes and bounds and/or cadastral identifier. The action data contains one or more action entries showing history of the case through case processing, including date of action, the action itself in a coded form, remarks refining the action code or providing supplemental information, and pending actions which identifies the office or party responsible for a specific action. General remarks data is used to provide further data pertaining to the case and consists of a line number and remarks or comments. Authority: 43 CFR 1813. Confidentiality: Mixed categories 1, 2 and 3; Privacy Act System Interior/LLM-33. Essential (Vital): Rights and interest records. Exclusions: Official serialized cases and related indexes and serial pages (Schedule 4, items 7, 20-23, 25, 51-72); records used to test, update, and monitor the system (Schedule 20/1); records associated with the Data Element Dictionary (metadata) (Schedule 20/25); reference copies of any system files which may be destroyed when no longer needed for reference or convenience. Formerly Schedule 20/64.</p>	<p><b>NOTE:</b> Case Recordation System is now a component of Legacy Rehost System (LR2000), see Schedule 4, item 34.</p> <p>This schedule item is maintained for historic purposes.</p>

<b>3a</b>	CRS Project History. Record copies of files that document the conception, planning, and development and/or improvement of the CRS Project. Consists of the concept of operations, project charter, approvals, official record designation documentation (aka records transition plans), quality assurance plans, briefing and issue papers, and other project history information of continuing value. Also consists of feasibility studies, cost benefit analyses, plans, approvals, life cycle management documentation, inreach and outreach plans, training plans, and other project history information of temporary value. Files are subdivided by subject as volume warrants. Location: NOC. Exclusion: system documentation (item b).	<i>Former Authority:</i> <b>TEMPORARY.</b> Cutoff end of FY in which ALMRS (Schedule 30/1) is certified as an official records system. Schedule 30 - Land and Mineral Electronic Record Systems

Item	Record Series Description	Disposition Authority
5f	<p>MCRS Input/Source Documentation. Data entry sheets used solely to create, update, or modify the records in an electronic medium and are not required for audit or legal purposes. Examples include annotated abstracts or data input sheets. Excludes official serialized case file documents that are used for in-put/source documentation; the disposition of mining claim case files and related indexes and serial pages is authorized by Schedule 4 (see Items 7, 51, 71, 72). Location: SO.</p>	<p><i>Former Authority: TEMPORARY. Destroy or delete after the information has been converted to an electronic medium and verified, or when no longer needed to support the reconstruction of, or serve as the backup to, the master file (item d), whichever is later. GRS 20/2a.</i></p>
5g	<p>MCRS Outputs. Information generated for reference purposes by computer and placed on an outside medium such as paper, microform, or electronic storage medium. Includes various paper reports and case abstracts and microform indexes by claim name, claimant name, geographic location, and serial number (both master film and microform copies). Excludes outputs that may become a part of official files; the disposition of such outputs will be governed by the disposition authority for the files to which they relate. Location: May be found at all organizational locations.</p>	<p><i>Former Authority: TEMPORARY. Destroy or delete when no longer needed for current business. (NC1-49-81-1, B/24C and NC1-49-85-1, Q/22)</i></p>
6	<p><b>LEGAL LAND DESCRIPTION SYSTEM (LLD).</b> Electronic alpha/numeric file of survey information collected from master title plats and cadastral survey plats and field notes in which land is identified by principal meridian, township, range, section, survey type, survey number and suffix, aliquot part and nominal location, acreage, and a survey note in coded format, if applicable. Additional information associated with each entry consists of codes representing the BLM state, district, resource area, planning unit, county, Congressional district, and administrative agency. LLD does not replace cadastral survey group files, field notes, plats, related survey files (see Schedule 17/14) or any other existing records. Authority: 43 CFR 1813, 9180. Confidentiality: Non-public record category 3; however, may become discretionary category 2 after certification. Essential (Vital): Due to the costs associated with recollection of data. Exclusions: Records used to test, update, and monitor the system (Schedule 20/1); records associated with the Data Element Dictionary (metadata) (Schedule 20/25); reference copies of any system files which may be destroyed when no longer needed for reference or convenience. NOTE: Records in this system will transition in their entirety to the ALMRS (Schedule 30/1).</p>	<p><b>NOTE:</b> LLD is now a component of Legacy Rehost System (LR2000), see Schedule 4, item 34.</p> <p>This schedule item is maintained for historic purposes.</p>

<b>6a</b>	LLD Project History. Documenting the history of the conception, planning, and development and/or improvement of the system, excluding system documentation (item b). Consists of the concept of operations, official record designation documentation (aka records transition plan), quality assurance plans, project feasibility studies, cost benefit analyses, charters, approvals, budgets, life cycle management documentation, training plans, briefing and issue papers, and other project history information. Files may be subdivided by subject as volume warrants. Location: NOC.	<i>Former Authority:</i> <b>TEMPORARY.</b> Cutoff end of FY in which ALMRS (Schedule 30/1) is certified as an official records system. Transfer to FRC 1 year after cutoff. FRC destroys 25 years after cutoff. (N1-49-94-1, 30/6a)
<b>6b</b>	LLD System Documentation. Record copies	See sub-items below.
<b>6b(1)</b>	Documentation Necessary for Servicing and Interpreting the System. Data modeling documentation, data system specifications, file specifications, data element descriptions, code books, record layouts, user guides, output specifications, and similar documentation (regardless of media) necessary for servicing and interpreting the system. Location: NOC, SO (note: SOs have created some unique technical direction).	<i>Former Authority:</i> <b>TEMPORARY.</b> Destroy or delete upon authorized destruction of master file (item d). (N1-49-94-1, 30/6b(1))
<b>6b(2)</b>	Data Verification and Quality Control Files. The data verification and quality control process documents the accuracy or factuality of data through a comparison to the source data. Data sampling is a means of checking selected portions of data in a data base to determine its quality level. Error detection involves comparing the data against the source documentation and comparing it with established data standards to determine if the data is in conformance with the standards. Documentation of the sampling and error detection activities consists of the date of action, steps taken, name of parties involved, summary of errors detected with an analysis of the errors, and the date corrective actions are taken. Excludes quality assurance plans which are part of the project history files (item a). In the event of litigation, the records in this series may be required as evidence that the system is trustworthy, accurate, and reliable. Location: SO.	<b>TEMPORARY.</b> Cutoff end of FY in which documentation is created. <b>Use BLM 30/6b(2).</b> Transfer to FRC 4 years after cutoff. FRC destroys 25 years after cutoff. Schedule 30 - Land and Mineral Electronic Record Systems

Item	Record Series Description	Disposition Authority
7	<p><b>STATUS SYSTEM.</b></p> <p>Electronic alpha/numeric file containing federal land and mineral ownership information, withdrawals, classifications, and determinations. Data categories include case identification data, case lands data, general case data, supplemental case data, action data, name and address data, and general remarks. Case identification data consists of the serial number and the case part number (the part number is used to break cases into smaller sub-cases and allows a single case to be processed as separate cases and still maintain its identity as a single case). The case lands data or the legal description delineates the lands within the case in accordance with a cadastral or special survey, including township, range, principal meridian, section, survey type, survey number and suffix, and subdivision composed of the aliquot part definition, lot designations, and acreage. General case data consists of the case type (a 6-digit code generally referring to the 43 CFR section and subsection covering and authorizing the case), source document category in coded format, source document identification number, date of the source document or action, U.S. rights in title in a coded format, the geographic name, if applicable, and the agency administrative area in a coded format. The supplemental data is used to provide further information pertaining to the case and consists of a data element number and a remark. The action data contains one or more action entries showing the history of the case through the BLM case processing, consisting of the date of the action, the action itself in a coded format, and remarks refining the action code or providing supplemental information. The name and address data identifies the entity(s) associated with the case, consisting of name of the entity, mailing street address, city, state, zip code, an identification number, category code of the entity, the interest relationship code describing the entity's role in the case, and the percent interest delineating the ownership in the case. The general remarks data is used to provide further information pertaining to the case and consists of a line number, a remark, and sometimes a key township reference. The Status System does not replace any existing records. Authority: 43 CFR 1813.</p> <p>Confidentiality: Non-public record category 3; however, may become discretionary category 2 after verification. Essential (Vital): Due to the costs associated with recollection of data.</p> <p>Exclusions: Records used to test, update, and monitor the system (Schedule 20/1); records associated with the Data Element Dictionary (metadata) (Schedule 20/25); reference copies of any system files which may be destroyed when no longer needed for reference or convenience. 9	<p><b>BOND &amp; SURETY SYSTEM.</b></p> <p>Electronic file used for collecting, storing, and retrieving bond data on various land uses authorized under 43 CFR, which require bonding. Consists of a bond file and a surety file. Bond file is maintained by each office accepting bonds. Surety file consists of a list of acceptable sureties maintained by Center Division of Finance. Authority: 43 CFR 1813. Confidentiality: Non-public record category 3; Privacy Act System Interior/LLM-33. Essential (Vital): Due to the costs associated with recollection of data. Exclusions: Records used to test, update, and monitor the system (Schedule 20/1); records associated with the Data Element Dictionary (metadata) (Schedule 20/25); reference copies of any system files which may be destroyed when no longer needed for reference or convenience.</p> <p><u>Surety Data</u>: Categories include name identification data, name and address data, financial information, geographic limitations, and action data. Name identification data consists of a name identification number (NID) assigned by Center Division of Finance and entered with the other surety data; it is bridged to the Master Name System but is not a part of it. Name and address data identifies entity(s) associated with the surety, including name of entity, mailing street address, city, state, zip, code, and category code of the entity. Financial information consists of the underwriting limitation of the surety. Geographic information consists of the state limitation (all, or selected states) to the area of coverage within the surety. Action data consists of one or more action entries showing history of surety, including data of action, the action itself in coded format, and remarks refining the action code or providing supplemental information.</p> <p><u>Bond Data</u>: Categories include bond file number, password, name and address data, bond type, case type, bond coverage, bond purpose, type of land, commodity, bond amount, surety bond identification number, action data, and general remarks. Bond file number is programmatically generated and assigned by the computer to uniquely identify a particular bond and includes the state, district, or resource area office. It also includes an optional bond part number which is used when a contract or permit within a case requires different bond coverage. The NID is assigned within the Master Name System. Name and address data identifies entity(s) associated with the bond, including name of the entity, mailing street address, city, state, zip code, category code of the entity, and the interest relationship code describing the entity's role in the bond (bonded principal, surety). Bond type is a one-digit numeric code identifying the bond (personal, surety, letter of credit, etc.).</p> <p>(Continued)</p>	<p><b>NOTE:</b> Bond &amp; Surety System is now a component of Legacy Rehost System (LR2000), see Schedule 4, item 34.</p> <p>This schedule item is maintained for historic purposes.</p>

9 (cont'd)	<p>Case type consists of coded format (6-digit code) referring to the 43 CFR Section and subsection authorizing the bond. Bond coverage is a one-digit code identifying if the bond is statewide, nationwide, etc. If bond is statewide, states covered by the bond are entered. Bond purpose identifies if the bond is for drilling, exploration, etc. Type of land identifies the extent of federal surface and subsurface ownership. Commodity identifies if bond is for coal, oil and gas, etc. Bond amount is the dollar amount of the bond. Surety bond identification number is the number of the certificate of deposit, letter of credit, or the bond number assigned by the surety company to the bond (entry is mandatory if a surety bond; otherwise, entry is optional). The action data contains one or more action entries showing the history of the bond, including date of action, the action itself in coded form, remarks refining the action code or providing supplemental information, and pending actions which identifies the office or party responsible for a specific action. General remarks data is used to further provide data pertaining to the bond and consists of a line number and remarks or comments.</p> <p>NOTES: 1) This system will be accessed by ALMRS (Schedule 30/1); 2) Bond and surety paper records are covered by Schedule 4/21; 3) Records used to test, update, and monitor the system are covered by Schedule 20/1. 4) Records associated with the Data Element Dictionary (metadata) are proposed for scheduling under Schedule 20/25; 5). Reference copies of system files may be destroyed when no longer needed for reference or convenience.</p>

Schedule 30 - Land and Mineral Electronic Record Systems

Item	Record Series Description	Disposition Authority
<b>9b(2)</b>	Data Verification and Quality Control Files. The data verification and quality control process documents the accuracy or factuality of data through a comparison to the source data. Data sampling is a means of checking selected portions of data in a data base to determine its quality level. Error detection involves comparing the data against the source documentation and comparing it with established data standards to determine if the data is in conformance with the standards. Documentation of the sampling and error detection activities consists of the date of action, steps taken, name of parties involved, summary of errors detected with an analysis of the errors, and the date corrective actions are taken. Excludes quality assurance plans which are part of the project history files (item a). In the event of litigation, the records in this series may be required as evidence that the system is trustworthy, accurate, and reliable. Location: NOC, SO.	TEMPORARY. Cutoff end of FY in which documentation is created. <b>Use BLM 30/9b(2).</b> Transfer to FRC 4 years after cutoff. FRC destroys 25 years after cutoff. (N1-49-94-1, 30/9b(2))
<b>9c</b>	Bond Surety Software. Application software necessary to use or maintain the master Bond Surety System. Location: NOC.	<i>Former Authority:</i> TEMPORARY. Delete upon authorized destruction of the master file (item d). (N1-49-94-1, 30/9c)
<b>9d</b>	Bond Surety Master Data File. Magnetic masters, created by each state office, by copying to tape all data in the system when the data is migrated to a new system. Location: NOC, SO.	<i>Former Authorities:</i> TEMPORARY. Delete after Bond Surety System is replaced by and data transitioned into a new system and the new system is certified as an official agency records system. (N1-49-94-1, 30/9d) Superseded by DAA-0049-2013-0004-0001.
<b>9e</b>	Bond Surety Backup Tapes. Electronic file of data identical in physical format to the master file and retained in case the master is damaged or inadvertently erased. Location: NOC, SO.	<i>Former Authority:</i> TEMPORARY. Delete after the identical records are deleted, or when replaced by a subsequent security backup file. GRS 20/8b.
<b>9f</b>	Bond Surety Input/Source Documentation. Documents and forms designed and used solely to create, update, or modify the records in an electronic medium and not required for audit or legal purposes. Examples include nonrecord, annotated abstracts and data input sheets. Location: SO (bond), NOC (surety).	<i>Former Authority:</i> TEMPORARY. Destroy after the information has been converted to an electronic medium and verified, or when no longer needed to support the reconstruction of, or serve as the backup to, the master file (item d), whichever is later. GRS 20/2a.

<b>9g</b>	Bond Surety Outputs. Information generated for reference purposes by computer and placed on an outside medium such as paper or electronic storage medium. Excludes outputs that become a part of official files; disposition of such outputs is governed by the disposition authority for the files to which they relate. Location: May be found at all organizational locations.	<i>Former Authority: TEMPORARY. Destroy or delete when no longer needed for current business. (N1-49-94-1, 30/9g)</i>
<b>10</b>	<b>MASTER NAME SYSTEM.</b> Electronic file used to eliminate redundant entry and storage of name and address data among the various BLM authorized systems. Categories of data include the name identification number (NID) and name and address data. The NID is a unique number assigned to a name. Name and address data consists of the name of the entity, mailing street address, city, state, zip code, and category code of the entity. Authority: 43 CFR 1813. Confidentiality: Non-public record category 3; Privacy Act System Interior/LLM-33. Essential (Vital): Rights and interest records. Exclusions: Records used to test, update, and monitor the system (Schedule 20/1); records associated with the Data Element Dictionary (metadata) (Schedule 20/25); reference copies of any system files which may be destroyed when no longer needed for reference or convenience. NOTE: This system will be accessed by the ALMRS (Schedule 30/1).	<b>NOTE:</b> Master Name System is now a component of Legacy Rehost System (LR2000), see Schedule 4, item 34.  This schedule item is maintained for historic purposes.
<b>10a</b>	Master Name Project History. Documenting the history of the conception, planning, and development and/or improvement of the system, excluding system documentation (item b). Consists of the concept of operations, official record designation documentation (aka records transition plan), quality assurance plans, project feasibility studies, cost benefit analyses, charters, approvals, budgets, life cycle management documentation, training plans, briefing and issue papers, and other project history information. Files may be subdivided by subject as volume warrants. Location: NOC.	<i>Former Authority: TEMPORARY. Cutoff end of FY in which Master Name is terminated or replaced by a new system. <b>11</b>	<b>NEW MEXICO AUTOMATED HISTORICAL INDEX SYSTEM (NMHIS).</b> An Oracle software application that provides a summary and index of all past and present actions which have affected the title, use, or availability of New Mexico public lands and resources as illustrated on the New Mexico State Office (NMSO) master title plats (Schedule 4/10a) and use plats (Schedule 4/10b). The application resides on the New Mexico State Office PRIME minicomputer and interfaces with NMPLATS (Schedule 30/12) and GCDB (Schedule 30/8). The NMHIS will replace the paper NMSO Historical Index Masters (Schedule 4/10c). Records in this system will transition to a state specific application. Authority: 43 CFR 1813. Confidentiality: During development, Non-public record category 2; after installation and certification as an official records system, public record category 1A. Essential (Vital): Considered vital due to cost of reconstructing data. Exclusions: Records used to test or update the system (Schedule 20/1) and reference copies of any system files which may be destroyed when no longer needed for reference or convenience.	See sub-items below.
<b>11a</b>	NMHIS Project History. Record copies of files that document the conception, planning, and development and/or improvement of the NMHIS Project, excluding system documentation (item b). 12	<p><b>NEW MEXICO MASTER TITLE AND USE PLAT SYSTEM (NMPLATS).</b>                      An Oracle software application that produces geo-referenced Master Title Plats and Use Plats for New Mexico public lands and resources. The Master Title Plats depict lands granted to states, acquired lands, lands that have been patented with reservations to the U.S., public domain lands with surface and subsurface rights noted, withdrawals, classifications, and rights-of-way. Use Plats show land status, use, and other information necessary to adjudicate applications for entry and use of public lands and resources. The plats are produced in township and range format and portray such information as land line data (township boundary, section lines and numbers, lot ticks, numbers and acreage), rights-of-way authorizations, lease information (oil and gas, coal, geothermal, potash), patents, withdrawals, U.S. rights and title, and corresponding serial numbers. The application resides on the New Mexico State Office PRIME minicomputer and interfaces with NMHIS (Schedule 30/15) and GCDB (Schedule 30/9). The NMPLATS will replace the mylar NMSO Master Title Plat Masters (Schedule 4/13a) and NMSO Use Plat Masters (Schedule 4/13b). Records in this system will transition to the UNIX platform (ArcInfo). Schedule 31 - Texas Acquired Minerals Project (TAMP) Records

Introduction

This schedule describes automated systems developed to modernize BLM’s land and mineral records unique to New Mexico’s jurisdiction of Texas.

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

DRS/GRS/BLM Combined Records Schedules

Schedule 32 - Helium Records

Introduction

This schedule describes records associated with the administration of helium resources primarily located at the Amarillo Field Office (AMFO), New Mexico.

**\*Per NARA GRS Transmittal 31: Agencies must offer any records created prior to January 1, 1921, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule.**

[NOTE: When the General Records Schedule (GRS) Disposition Authority is more current than the Departmental Records Schedule (DRS) Disposition Authority, the GRS takes precedence. However, if the DRS retention period is longer, the BLM will use the longer DRS retention period, and must cite the GRS as the authority.]

Item	Series Description	BLM Disposition Authority (*See intro for records prior to January 1, 1921)
<b>1</b>  <b>DRS</b>  <b>1.1A</b>	<b>HELIUM PROGRAM GENERAL CORRESPONDENCE FILES [3745].</b> Helium program subject files including incoming and outgoing letters and memoranda, internal memoranda, related documents, and any indexes to these subject correspondence files, including files documenting the development, clearance, and processing of proposed and final rules published in the Federal Register, routine, administrative, and housekeeping matters. Arranged alphabetically by subject. Confidentiality: Non-public record category 2. Location: AMFO	TEMPORARY. Cutoff EOFY. <b>Use DAA-0048-2013-0001-0001.</b> Destroy 3 years after cutoff. ----- <i>Former Authority:</i> BLM 32/1 Destroy 3 years after cutoff. (N1-49-00-3, 32/1)
<b>2</b>	<b>HELIUM STORAGE PROGRAM AND OPERATION FILES NOT DESCRIBED ELSEWHERE [3745].</b> Confidentiality: Non-public record category 2. Location: AMFO	See sub-items below.
<b>2a</b>	Records on helium field production, maintenance, storage, land, transportation, etc.	TEMPORARY. Cutoff EOFY. <b>Use BLM 32/2a.</b> Transfer to FRC when records are 5 years old. FRC will destroy when they are 25 years old. (N1-49-00-3, 32/2a)
<b>2b</b>	Private Helium Plant Automated Storage Records. The system that is being used is called the Supervisory Control and Data Acquisition (SCADA) system (an industry-wide term for telemetering equipment). The system downloads and stores flow data from the private helium plants along the BLM pipeline into a dedicated computer.	See sub-items below.
<b>2b(1)</b>	Automated data (compiled and used for billing).	TEMPORARY. <b>Use BLM 32/2b(1).</b> Destroy individual data when 2 years old. (N1-49-00-3, 32/2b(1))
<b>2b(2)</b>	Hardcopy printouts	TEMPORARY. <b>Use BLM 32/2b(2).</b> Destroy when superseded or when no longer needed for current business. (N1-49-00-3, 32/2b(2))

2c	Private Helium Plant Meter Inspections. The metering equipment along the pipeline is inspected on a regular basis.	See sub-items below.
2c(1)	Record copies of calibration data	TEMPORARY. <b>Use BLM 32/2c(1).</b> Destroy when records are 2 years old. (N1-49-00-3, 32/2c(1))
2c(2)	Reference copies	TEMPORARY. <b>Use BLM 32/2c(2).</b> Destroy when no longer needed for convenience or reference purposes. (N1-49-00-3, 32/2c(2))
3	<b>HELIUM PIPELINE RECORDS [3745].</b> Confidentiality: Non-public record category 2. Location: AMFO	See sub-items below.
3a	Easements/Rights of Way - One file for each landowner	PERMANENT. Cutoff EOFY in which the rights are relinquished by the grantee or terminated by the BLM and appeal rights are exhausted. <b>Use BLM 32/3a.</b> Transfer to FRC 2 years after cutoff. FRC transfers to NARA 25 years after cutoff. (N1-49-00-3, 32/3a) ERA disposition authority: Pending: to be established
3b	Test, Survey and Inspection Data - filed by pipeline section. Ref: 49 CFR 192.491(c) - DOT regulations.	TEMPORARY. Cutoff EOFY. <b>Use BLM 32/3b.</b> Destroy 5 years after cutoff. (N1-49-00-3, 32/3b)
3c	Maintenance Records - separate file for each legal land description. Includes internal and external corrosion control monitoring records. Ref: 49 CFR 192.465 (a) and (e) and 192.475(b) – DOT regulations.	TEMPORARY. Cutoff EOFY in which pipeline is abandoned or leaves the BLM ownership. <b>Use BLM 32/3c.</b> Destroy 5 years after cutoff. (N1-49-00-3, 32/3c)
3d	Engineering/Design Drawings. Ref: 49 CFR 491(b).	TEMPORARY. Cutoff EOFY in which pipeline is abandoned or leaves the BLM ownership. <b>Use BLM 32/3d.</b> Destroy 5 years after cutoff. (N1-49-00-3, 32/3d)
3e	Standard Operating Procedures - provided by the contractor. Authority: 49 CFR 192.605(a).	TEMPORARY. Cutoff EOFY in which pipeline is abandoned or leaves the BLM ownership. <b>Use BLM 32/3e.</b> Destroy 5 years after cutoff. (N1-49-00-3, 32/3e)

3f	Underground Crossings of other Pipelines and Utilities - one page documentation re: who, what, where, how of all instances where pipelines, utilities, etc. cross the pipeline - separate file for each legal description. Ref: 49 CFR 192.325.	TEMPORARY. Cutoff EOFY in which pipeline is abandoned or leaves the BLM ownership. <b>Use BLM 32/3f.</b> Destroy 5 years after cutoff. (N1-49-00-3, 32/3f)
4	<b>CONSERVATION PROGRAM WELL FILES [3745]</b> One file per well - includes original drilling information, all data, casing information, all workovers, drawing of well bore, drilling rights. Includes only wells at the Cliffside storage field. Confidentiality: Non-public record category 2. Location: AMFO	TEMPORARY. Cutoff when no longer using well. <b>Use BLM 32/4.</b> Destroy 10 year after cutoff. (N1-49-00-3, 32/4)
5	<b>HELIUM STORAGE CONTRACTS [3745]</b> Contracts with companies located along pipeline to store and redeliver helium. They are filed by contract number and billed monthly. They are 20-year contracts beginning in 1995 with a 5-year extension option. Agencies must offer any records created prior to January 1, 1933, to the National Archives and Records Administration (NARA) before applying disposition instructions in this schedule. Confidentiality: Non-public record category 2. Location: Amarillo Field Office	See sub-items below.
DRS 1.3A	5a Contract Case Files. The case file contains correspondence, contract meeting notes, amendments, etc., relating to preparation of billing and collection records for each storage contract.	TEMPORARY. Cutoff EOFY in which the contract expires or is terminated. <b>Use DAA-0048-2013-0001-0010.</b> Destroy 3 years after cutoff. ----- <i>Former Authority:</i> <i>BLM 32/5a</i> <i>Destroy 2 years after cutoff.</i> <i>(N1-49-00-3, 32/5a)</i>
DRS 1.3B	5b Contract Accounting Files - These records are used for monthly billing and collection for storage and redelivery of helium. They are maintained by the Helium Storage Analyst.	TEMPORARY. Cutoff EOFY. <b>Use DAA-0048-2013-0001-0011.</b> Destroy 7 years after cutoff. ----- For records at FRC prior to 10/1/2014: GRS 1.1, item 010, DAA-GRS-2013-0003-0001. Destroy 6 years after final payment or cancellation. ----- <i>Former Authority:</i> <i>GRS 6/1a</i> <i>Destroy 6 years, 3 months after cutoff.</i> <i>(N1-GRS-91-3)</i>

<b>6</b>	<b>IN-KIND AND CRUDE HELIUM SALES [3745].</b> Confidentiality: Non-public record category 2. Location: AMFO	See sub-items below.
<b>DRS 1.3B</b>	<b>6a</b> In-Kind Crude Helium Sales Contract Files - Five-year contracts with distributors who report sales of refined helium to federal agencies. Helium distributors are then billed quarterly for the in-kind amount of helium they have sold to federal agencies. Files contain billing and payment information.	TEMPORARY. Cutoff EOY in which the contract expires, is terminated, or when final payment is received, whichever is later. <b>Use DAA-0048-2013-0001-0011.</b> Destroy 7 years after cutoff. ----- <i>Former Authority:</i> <i>BLM 32/6a</i> <i>Destroy 6 years, 3 months after cutoff.</i> <i>(N1-49-00-3, 32/6a)</i>
<b>DRS 1.3B</b>	<b>6b</b> Open Market Crude Helium Sale Files. Public Law 104-273 requires the sale of crude helium on the open market between 2005 and 2015 to reduce the helium stockpile to 600 million cubic feet.	TEMPORARY. Cutoff EOFY. <b>Use DAA-0048-2013-0001-0011.</b> Destroy 7 years after cutoff. ----- <i>Former Authority:</i> <i>BLM 32/6b</i> <i>Destroy 6 years, 3 months after cutoff.</i> <i>(N1-49-00-3, 32/6b)</i>
<b>7</b>	<b>HELIUM RESOURCE EVALUATION [3745].</b> Confidentiality: Mixed: Category 1A (public) and category 2 (Non-public). Location: AMFO	See sub-items below.
	<b>7a</b> Published reports - Helium Resources of the U.S., Analyses of Natural Gases, etc.	PERMANENT. One copy of published document. Cutoff EOFY in which issued. <b>Use BLM 32/7a.</b> Transfer to FRC when records are 5 years old. FRC transfers to NARA when records are 10 years old. <i>(N1-49-00-3, 32/7a)</i> ERA disposition authority: Pending: to be established
	<b>7b</b> Internal reports and raw data, including copies of signed and unsigned copies of release form - used to create reports, do research, and track trends.	TEMPORARY. <b>Use BLM 32/7b.</b> Destroy when no longer needed for reference. <i>(N1-49-00-3, 32/7b)</i>
	<b>7c</b> Helium Field Survey Database (a.k.a. Gas Analysis Database). The Helium Survey Database is a compilation of natural gas analyses performed by the United States Government dating back to about 1917. Helium is not normally a constituent of the gas stream analyzed and reported by independent laboratories. This was started and is continued to identify sources of helium in natural gas in the United States. The helium concentration obtained from the analysis is used to determine the helium reserves on a field-by-field basis. This information is used to estimate the decline of helium availability into the future, and track the discovery of new fields containing helium. Location: AMFO	See sub-items below.

Schedule 32 - Helium Records

Item	Series Description	BLM Disposition Authority (*See intro for records prior to January 1, 1921)
7c(1)	Project History. Record copies of files that document the conception, planning, and development and/or improvement of the project. Consists of the concept of operations, project charter, approvals, official record designation documentation, quality assurance plans, briefing and issue papers, and other project history information of continuing value. Also consists of feasibility studies, cost benefit analyses, plans, approvals, life cycle management documentation, inreach and outreach plans, training plans, security plan, and other project history information of temporary value.	TEMPORARY. Cutoff EOFY in which system is certified as an official records system. <b>Use BLM 32/7c(1).</b> Transfer to FRC 1 year after cutoff. FRC destroys 25 years after cutoff. (N1-49-00-3, 32/7c1)
7c(2)	System Documentation Necessary for Servicing and Interpreting the System. Technical description of the electronic records being described, consisting of data modeling documentation, data system specifications, file specifications, data element descriptions, code books, record layouts, user guides, output specifications, version description document, and similar documentation (regardless of media) necessary for servicing and interpreting the system.	TEMPORARY. <b>Use BLM 32/7c(2).</b> Destroy or delete upon authorized destruction of the master file (item 7c(5)). (N1-49-00-3, 32/7c2)
7c(3)	Data Verification and Quality Control Files. Includes data sampling and audit trails. In the event of litigation, the records in this series may be required as evidence that the system is trustworthy, accurate, and reliable. Exclusions: Quality assurance plans which are part of the project history files.	TEMPORARY. Cutoff EOFY in which document is created. <b>Use BLM 32/7c(3).</b> Transfer to FRC 4 years after cutoff. FRC destroys 25 years after cutoff. (N1-49-00-3, 32/7c3)
7c(4)	Software. Application software necessary to use or maintain the system.	TEMPORARY. <b>Use BLM 32/7c(4).</b> Delete when superseded by newer version or upon authorized destruction of the master file (item 7c(5)). (N1-49-00-3, 32/7c4)
7c(5)	Master Data File.	TEMPORARY. <b>Use BLM 32/7c(5).</b> Delete when system is replaced by and data transitioned into a new system and the new system is certified as an official records system. (N1-49-00-3, 32/7c5)
DRS 1.4A1	Backup Tapes. Electronic files of data identical in physical format to the master file created in case the master is damaged or inadvertently erased.	TEMPORARY. Cutoff when the identical records have been deleted, or replaced by a subsequent backup file. <b>Use DAA-0048-2013-0001-0013.</b> Destroy no later than 3 years after cutoff. ----- <i>Former Authority:</i> <i>BLM 32/7c(6)</i> <i>Delete after the identical records are deleted, or when replaced by a subsequent security backup file.</i> <i>(N1-49-00-3, 32/7c6)</i>
