**NOTE TO MAP USERS**

The surface and mineral management status overprints are published as general planning and management tools. Some of the lands, surface and mineral rights, may have been shown as potential lands due to the lack of information available to BLM with respect to the nature of acquisition. No warranty is made by the BLM for use of the map for purposes intended by BLM. The official land records in the respective offices of the Bureau of Land Management or other responsible Federal agencies should be checked for up-to-date status on any specific tract of land. Inquiries in the BLM maps should be reported to the respective Bureau of Land Management office from which the maps were obtained.

**PUBLIC ACCESS**

Roads crossing public lands may be traveled by the public unless closed by signing or notice by the land management agency. Public lands interlocked by private lands may not have public access. Permission is required from the private landowner to cross private land, unless access is provided by a Federal, State or County road, or a BLM road with legal access.
