Hi Areta,

Newt is out of the office today, so I'm sending this. I've attached an updated Biological Evaluation for Kirkland. The only changes were to make the use of Study Area consistent throughout in response to the BLM's comments, although there were a couple of places where I had to revise the context so that it still made sense. No other substantive changes were made, so I did not change the dates on the document. Thank you,

David Kahrs

Thanks, that leaves the updated Mining and Reclamation Plan of Operations received by June 22, then everything will be uploaded onto the project website and the letters can go out on June 23.
