

River Mile 1.0

Many Bedrooms
45° 51' 39.55" N, 116° 46' 31.92" W

River Mile 1.5

Buzzards Roost
45° 51' 46.01" N, 116° 46' 1.68" W

River Mile 1.9

Birthday Beach
45° 52' 0.17" N, 116° 45' 38.91" W

Birthday Beach
Only appears at low water and changes in size from year to year.

Mile 1
River Flow on Image Date:
3310 CFS

Checkerboard

Checkerboard II+
A long wave train with some rocks at the bottom.

Mile 2

Sluicibox

Sluicibox II+
A long, steep rapid with big waves in lower water.

Bighorn Sheep Area
Bighorn sheep are commonly seen around this area, typically on river-right throughout Blue Canyon and on both sides of the Snake River.

Mile 3

Por Creek

Slide (V-VI @ 20,000+ cfs)
Note the massive rockslide on the left, shortly after the powerline crosses the river. This marks Slide Rapids, which ranges from barely a riffle at flows under 10,000 cfs to **Class V-VI at flows of 20,000 cfs and higher**. In very high water, these are the most dangerous rapids on the Lower Salmon River. These rapids cannot be lined or portaged without great difficulty. Scouting is mandatory and quite hard.

H-hole

H-hole II
This rock garden is followed in quick succession by staircase rapids, three more Class II drops.

Slide
