Slide

River Flow on Image Date:  
3310 CFS

### Slide (V-VI @ 20,000+ cfs)

Note the massive rockslide on the left, shortly after the powerline crosses the river. This marks Slide Rapids, which ranges from barely a riffle at flows under 10,000 cfs to **Class V-VI at flows of 20,000 cfs and higher**. In very high water, these are the most dangerous rapids on the Lower Salmon River. These rapids cannot be lined or portaged without great difficulty. Scouting is mandatory and quite hard.

River Mile 4.8

### S-Turn II+

This long rapid requires maneuvering in lower water.

S-Turn

Flynn Creek

Mile 6

Flynn Creek

### Blue Canyon

Two camp spots are located at the entrance to this narrow and scenic canyon, which contains numerous rapids.
