

Ladder Creek III
This rapid cannot be seen from the highway. Lower flows expose rocks and holes from river-left to center.

Fiddle Creek

Mile 81

Fiddle Creek

Traps Creek

Traps Creek III-IV
Higher flows create a large wave train, but, as the water level drops, holes form and rocks are exposed which require some maneuvering.

Traps Creek

Chair Creek Wave

Chair Creek

Chair Creek

Chair Creek III
Between 28,000 and 35,000 cfs a large wave train is great fun. Below 27,000 cfs the entry wave becomes a hole.

Mile 82

Cherry Creek

Cherry Creek II
Waves form here at lower flows.
