

Mile 23

**Snowhole IV**  
This steep drop with huge boulders and holes is relatively straightforward if you're in the correct spot. It can be very dangerous if you're not. Scout from river-left.

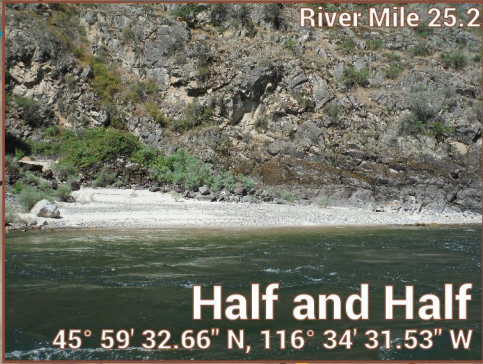

The big, vertical rock face below on the right means that Snowhole is only about 100 yards away.

Mile 24

**The Gobbler**

**The Gobbler II**  
This short but turbulent rapid is worth noting.

Mile 25

**Stone House Beach**  
Check out the classic Chinese miners stone house on river right, just below Half & Half Rapid.

**Half and Half**

**Half and Half III**  
So called because half the time you make it! There are some big holes to avoid and maneuvering is required. Scout from eddy on right.
