OK. The issue for me is that I have both the summary and additional information documents open and move text from the add info to the summary, and I don't know how to do that on Docs. I will send you the merged documents in groups of 3 or 4 as I finish them.

Nope I was just curious if you were saving the results to the drive. We are keeping different versions sorted in a system so just wanted to make sure we had it right

In some cases I have converted those to Word, in others have used the word documents you sent. Is there a difference? I am not saving the results on the drive, if that is what you meant; that just didn't occur to me. I'll see what is involved in uploading them and let you know.

Ok makes sense - are you editing the versions on the google drive?

thanks. And FYI - when merging the Executive Summaries and the answers to the additional questions, I am deleting sections of the Executive Summaries that will be addressed in the Economic Report, but not editing the wording of the sections that remain, except for a few minor clarifications, such as replacing "A pdf document showing grazing allotments was uploaded to the drive" with "A map showing grazing allotments is on the next page".

Nikki, there is no Executive Summary, but rather 2 copies of the responses to the additional questions. Would you please see if there is an executive summary and forward it to me. FYI, I am merging the answers to the additional questions into the Executive Summary, and deleting items from there that will be addressed in the Economic report

Hi Randy,

We have completed our review of the initial responses provided in response to the April 26, 2017 Executive Order 13792 and initial data request for the Basin and Range National Monument. Please find attached an executive summary and data summary. These two summary documents along with the requested data and supporting sources of information have been uploaded to the respective Google Drive folder for the Basin and Range National Monument.

Per your request, I have also attached the responses to the new, additional information requested in a word document. ("Basin and Range_New Information Request_6_2_2017")
