Hi Sally and Tim,

Attached below are the economic snapshots for the applicable national monuments.

Also found under the shared drive: S:\WO400\Economic Resources\Final Resources\Interactive Economic Spreadsheets\EO Review National Monuments PDFs

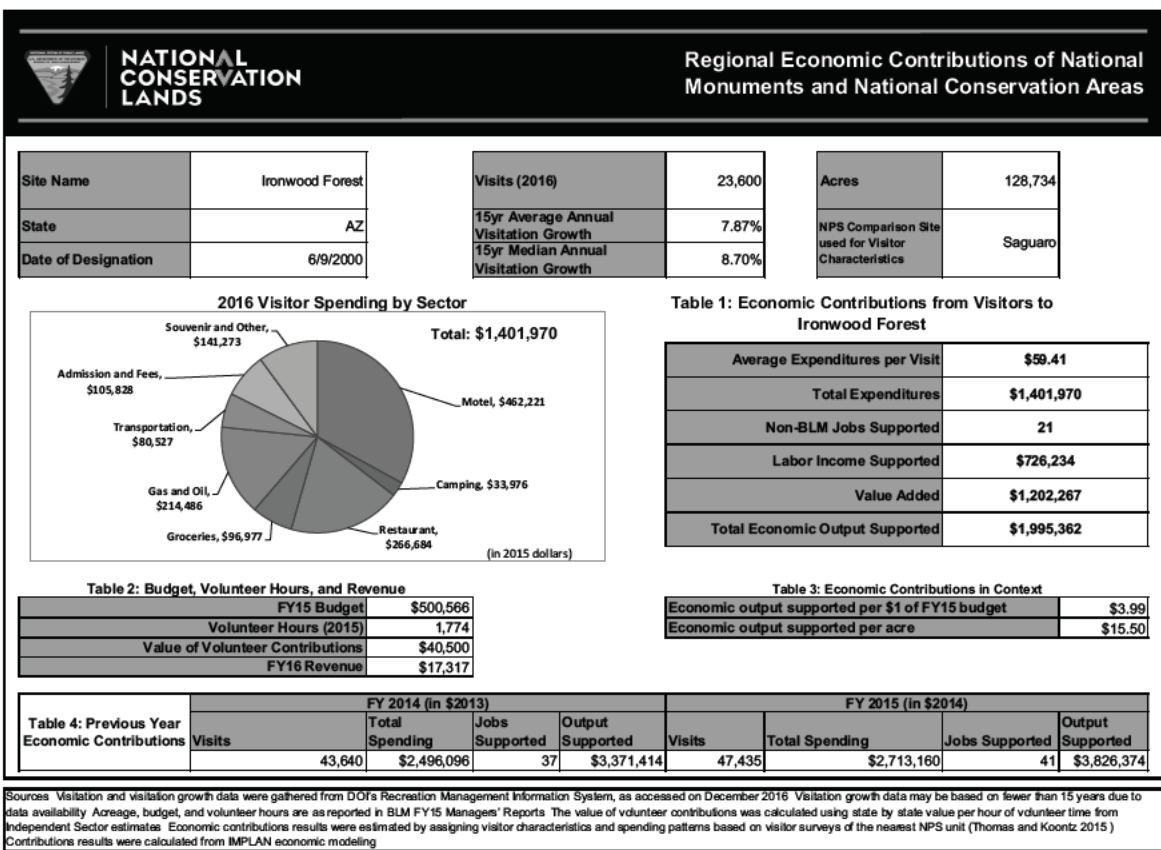

Please note that there was no information or limited information available for NMs created in 2016. There was no information for Gold Butte, so no snapshot is available. Sand to Snow had very limited information, and I don't recommend using the snapshot but am attaching for your review. Mojave Trails had a little more information, and seems okay to use but I also recommend your view.

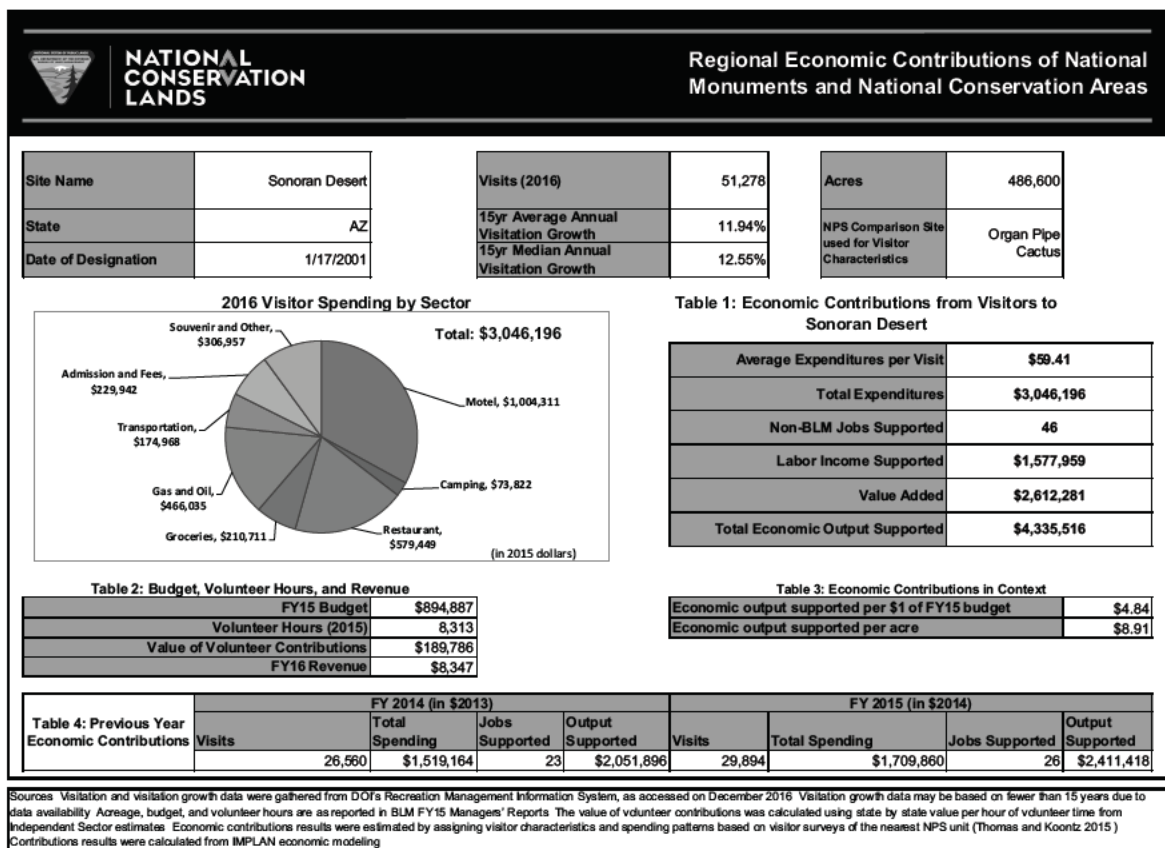

Let me know if you have any questions!

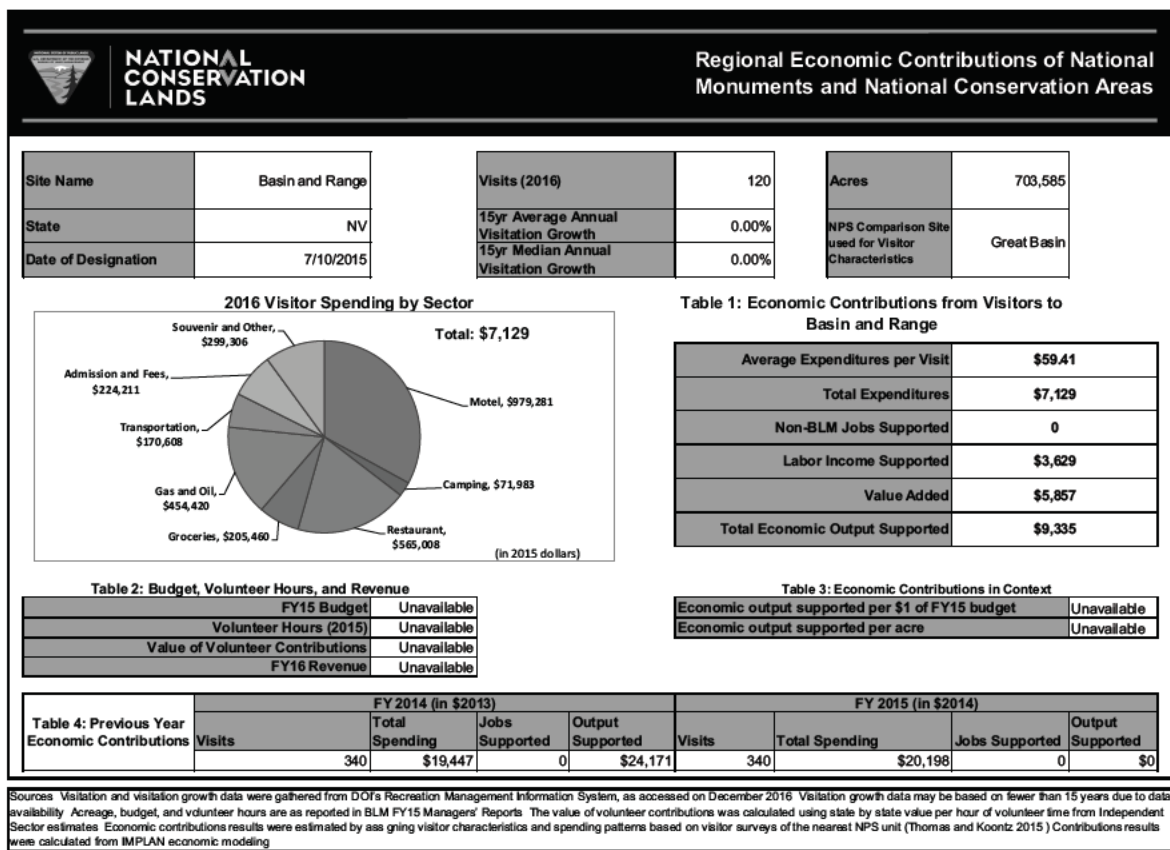

Best,
Cindy

Sources: Visitation and visitation growth data were gathered from DOI's Recreation Management Information System, as accessed on December 2016. Visitation growth data may be based on fewer than 15 years due to data availability. Acreage, budget, and volunteer hours are as reported in BLM FY15 Managers' Reports. The value of volunteer contributions was calculated using state by state value per hour of volunteer time from Independent Sector estimates. Economic contributions results were estimated by assigning visitor characteristics and spending patterns based on visitor surveys of the nearest NPS unit (Thomas and Koonitz 2015). Contributions results were calculated from IMPLAN economic modeling.
