Lets see with land status

On Thu, Oct 19, 2017 at 11:19 AM, Hanson, Joshua <joshua.hanson@sol.doi.gov> wrote:

I talked to BLM-UT this morning and I want to make sure that this is what you are looking for before he makes the rest of the maps. They could add land status (BLM, USFS, state, private), towns and roads, or whatever else you are looking for.

No problem.

Do you really want (b)(5) DPP (b)(5) ACP

Also, to be clear, you want the area within the boundary filled in? Or do you just want the boundary line with no cross-hatching, stippling, or shading within the boundary?

Thanks- know this is not your job. Just figure since you were already talking to them would be easy. But if not that's why I cc'd the BLM team.

Need 4 Maps.

- 1 with BENM as it exists
- 1 with BENM as it will look after proposed modification
- 1 with GSENM as it exists
- 1 with GSENM as it will look after proposed modification

Lets take out the charting of objects and the different color schemes for different land ownerships.  
Need to be very simple- boundaries should be filled in- no slant lines.
