Thanks.

We are just finalizing the clearances. Hopefully they start some time today. I have asked them to review the video once their clearances are complete.

The total # of Bears Ears comments is 59,559.

Yes, please - guess I was too optimistic yesterday. However, please do not have the students code all of the comments at this point - I want each of the team members to have some practice before we get into the more complicated comments on the other monuments. If the count by our people is still low tomorrow, I'll send an encouragement to them and their higher-ups. And I don't expect Jennifer to do much coding, as she has a huge job with the incoming mail.

Also, I was going to send you both an FYI that Jennifer has perhaps 8,000 written comments that were postmarked March 26 or before, held at Exec Sec because they were addressed to the Secretary and not the mail stop address in the FR notice, but just delivered to her today. The overwhelming majority still say "no changes", and 5,000 came together from one group.

I told her to count them (by sorting changes/no changes into piles, then measuring, not individual counting - 1" = x letters or postcards, and there are y inches = total) but NOT to enter them into Regs.gov., because I see no simple way to differentiate those from late-submitted comments once they were entered. We can then just add that count to the results of our coding, and she will retain the letters and post cards in boxes in case they are needed later. This will also save time for her and her helpers to be scanning and uploading comments on the other monuments. I will go through those few that are not form letters and postcards tomorrow to check for new information.

Lastly, what is the total number of Bears Ears comments entered into DiscoverText, including both singles and the form letters (i.e. how many form comments, not how many groups of comments). I will add Jennifer's count to this; need to report on it tomorrow, when most of our politicals will return from their Memorial Day travels. I know one or both of you have given me this before, but I can't find it.

Randy,

Slow start so far today. Should I get the students involved?

Stu
