no need to set hard copies aside for my review, just put them in boxes or whatever else is convenient and store them in the empty area of room 5013

Good morning,

When I post the mail in comments from Bear's Ears, I'll set aside the hard copies if you want to review them before the deadline.

Marcia or I can run a Bulk Extract after the comment period ends on Friday. Once we get Texifter, hopefully this week, the Bulk Extract can be uploaded to Texifter. The system should be able to identify everything that belongs to Bear's Ears, mail in and ones posted through [regs.gov](https://www.regulations.gov). Is that correct Marcia or does mail in comments take longer to analyze in Texifter?

Jennifer

Between whenever we are able to start and June 10, we will need to focus entirely on Bears Ears comments, unless we are able to review all of those on hand at any given point before the deadline, so please be thinking on we can best cover those.

I will spend some time going through comments at random to see if there are common terms used in individually-written letters that would let the system group those together so we don't need to read every one - unless either of you have ideas on how that could be accomplished automatically.

If you think it worthwhile, I'm available for a discussion at almost any point today and tomorrow.
