I have been working on transferring comments on marine monuments from the Bears Ears project to a bucket for export to NOAA.

Twice now while transferring comments on "Northeast Canyons and Seamounts", the "add to bucket" text box that lets you pick an existing bucket has come up with an empty box - blue outlined rectangle that says "Add to bucket", and the word "cancel" - no list of buckets, no other text. Trying multiple times gets the same result.

Last time I exited and returned, it worked once and the problem then reappeared.
