[JUNE 13 COUNT.docx](#)

Thank you. I was so focused on the issue I mentioned until after 1, and then on finishing my counts this afternoon that I didn't even notice you that attached the totals until now.

Here are the individual numbers from the other sets of comments. All multiplication, addition and subtraction was done on the calculator if the result would be higher than 30. Two documents, one from everything except June 13 and ones you did from July 20, and the other for June 13. I will recheck the input numbers in the morning, but thought I would give you a chance to look them over and then ask questions. I am emailing these in the thought you might be able to cut and paste from the document to your spreadsheet rather than type them in.

Although I used them on the "worksheet" to keep myself organized, we do not need the multipliers going forward, just the count of opposed, supports and uncodable for each set of comments (i.e. each date) and then the overall totals.

Send me a note when you have gone over these and I'll come and answer any questions, also fill you in on the outcome of the other issue.

do you need back in today? I've been working on the other matter I mentioned this morning, and am about to go to lunch. I will need access for several hours to finish, but not necessarily today.

Had an unavoidable errand. Do you need to be in Discovertext to finish, or are

you on your spreadsheet?
