Okay, great. I know I can't produce 3-4 analyses like Bears Ears by July 3, but likely can do something much more abbreviated.

Hi Kristin,

Correct. We can only put information together on activities that are currently occurring on the monuments, or where BLM has indicated that there might be some potential. And for potential activities, there is only so much one can say.

Ben

Hi Ben:

I think I can handle looking at:

Craters of the Moon
Upper Missouri River Breaks
Cascade Siskiyou
Hanford Reach

as long as I'm correct that the review doc can be minimized (following the template) because of the lack of activity in the timber and mining sectors. Is that your take?  
Thanks. KS
