Hi Christian,

Can you just go ahead and sort the sheet by state? It probably make sense to organize things that way.

Hi Ben,

I saw that you had created a Google sheet for the monuments that folks can use to take the lead for writing up summaries.

I wanted to make sure that you had seen this potential grouping (please see below), in case it's helpful for grouping similar monuments.

Bye for now,  
Christian

Greetings,

Please see below for an updated version of the timeline for the full analysis of National Monuments, including sending a sheet of I/O inputs to Josh S for his analysis. I've also added this to our Google Drive at National Monuments Review Data Call/PPA: "National Monuments Review 2017 - Gantt Charts".

We can come up with a few different approaches to dividing the monuments up among a group of authors. After Bears Ears and Grand Staircase (leaving out the marine monuments), we're left with 20 monuments. Grouping monuments by State and region we could try something like the following:

| Author No. | Location   | National Monument       | Managing Agency |
|------------|------------|-------------------------|-----------------|
| 1          | Arizona    | Grand Canyon-Parashant  | BLM, NPS        |
| 1          | Arizona    | Ironwood Forest         | BLM             |
| 1          | Arizona    | Sonoran Desert          | BLM             |
| 1          | Arizona    | Vermilion Cliffs        | BLM             |
| 2          | California | Berryessa Snow Mountain | USFS, BLM       |
| 2          | California | Carrizo Plain           | BLM             |
| 2          | California | Mojave Trails           | BLM             |
| 2          | California | Sand to Snow            | BLM, USFS       |
| 3          | California | Giant Sequoia           | USFS            |
| 3          | California | San Gabriel Mountains   | USFS            |
