Hi Ben,

I saw that you had created a Google sheet for the monuments that folks can use to take the lead for writing up summaries.

I wanted to make sure that you had seen this potential grouping (please see below), in case it's helpful for grouping similar monuments.

Bye for now,  
Christian

Greetings,

Please see below for an updated version of the timeline for the full analysis of National Monuments, including sending a sheet of I/O inputs to Josh S for his analysis. I've also added this to our Google Drive at National Monuments Review Data Call/PPA: "National Monuments Review 2017 - Gantt Charts".

We can come up with a few different approaches to dividing the monuments up among a group of authors. After Bears Ears and Grand Staircase (leaving out the marine monuments), we're left with 20 monuments. Grouping monuments by State and region we could try something like the following:

Author No.	Location	National Monument	Managing Agency
------------	----------	-------------------	-----------------

1	Arizona	Grand Canyon-Parashant	BLM, NPS
1	Arizona	Ironwood Forest	BLM
1	Arizona	Sonoran Desert	BLM
1	Arizona	Vermilion Cliffs	BLM
2	California	Berryessa Snow Mountain	USFS, BLM
2	California	Carrizo Plain	BLM
2	California	Mojave Trails	BLM
2	California	Sand to Snow	BLM, USFS
3	California	Giant Sequoia	USFS
3	California	San Gabriel Mountains	USFS
3	Nevada	Basin and Range	BLM
3	Nevada	Gold Butte	BLM
4	Idaho	Craters of the Moon	NPS, BLM
4	Montana	Upper Missouri River Breaks	BLM
4	Oregon	Cascade Siskiyou	(BLM?)
4	Washington	Hanford Reach	FWS, DOE
5	Colorado	Canyons of the Ancients	BLM
5	New Mexico	Organ Mountains-Desert Peaks	BLM
5	New Mexico	Río Grande del Norte	BLM
5	Maine	Katahdin Woods and Waters	NPS
	Utah	Bears Ears	BLM, USFS
	Utah	Grand Staircase-Escalante	BLM
