Ed,

So we are working together again! I am going to be heading up Monument review going forward and the next one on the list is Grand Staircase Escalante as I mentioned on the phone earlier this week. Can your folks put together a few maps for me? I'd like to see maps showing the following things:

1. All of the federal designations within the current monument boundary (i.e. -WSAs or other protections)
2. archaeological resources and mineral resources. This can be whatever is available. Whether that is known locations or whether Utah BLM or others believes these resources are somewhere but have not been explored.

Aside from recreation and grazing and the two uses mentioned above, are there other known or historic uses for this land?

I'd also like to see management plans and any info you have on annual visitors, revenue, etc...

If any of this is readily available, just send it right over. If it needs to be created (particularly the maps) Let me know.

The folks upstairs would like this review to get going pretty quickly. So, as soon as you can get this to me, that would be great.

Right now, I'm just collecting information and getting up to speed and then next week we can talk about what the review will look like and who from Utah BLM should be involved etc...

Thanks Ed!
