01 - SOW - Bears Ears Heritage Resource Assessment_DKHedits.docx

I provided a few comments/edits.

I also added an overall question that may seem quite odd based on the discussions that you all have already had, but (b) (5) - DPP

Konnie, Signa,

I would hate for you to have to take a call why you are driving. Maybe we can just finalize this by email. Here are my final questions:

1. (b) (5) - DPP
[REDACTED]
2. Could we add a bullet point or a budget line item that includes working with Dine Bikeyah to improve our tribal participation?

Could we wrap this up by early next week?

OK, Friday morning we'll be driving from Tucumcari to Alibates Flint Quarry, so that would probably be the best time that works for me on Friday, assuming I don't hit dead zone for cell coverage. So maybe 9 am Mtn? If you could arrange a call-in that would be great and I

can get that from my email. What did we do prior to Smart phones? Don't answer...

Next week is still a good option for me too depending on your schedules and how quickly this needs to move forward. Again as you review if you have questions just ping my email.

Thanks!
Konnie

Nate and Konnie,
I'm finally back in the office this week. Friday would work for me, either in the morning before 10 a.m. or afternoon.

That'll give me a chance to review the proposal.

I'm also in all next week, but in all day meetings on Monday and Tuesday, Apr 3 and 4. The rest of the week is pretty open.

Talk with you soon--

Hello, sorry I was out last week. I'm open all of tomorrow and Friday. I can squeeze a meeting in Wednesday and Thursday too. Do we want to reschedule?
Konnie, I just got your voicemail. Did you still want to talk by phone or will this meeting suffice? I still need a little time to review the proposal.

Hello Nate and Konnie,

I would be available for a call on Monday afternoon. I'm in PHoenix all next week but will be in meetings after Monday.

Good morning Nate,

Just checking in to see if you want to have a call to discuss. I am in today, and also available Monday afternoon and all day Tuesday next week. I'm on travel Wedn/Thur, back in office Friday and out the week of Mar 27.

Nate and Signa,

Here are some tweaks to a clean version (from Signa's last markup) and a first cut budget. We should discuss the Solar Regional Mitigation Strategy text that got worked into the CLA. The assessment and RRD will get you to baseline conditions and a mitigation potential model that could help identify future candidate mitigation site locations, but as far as "residual impacts," warranting mitigation, goals and objectives, mitigation fee setting, and mitigation monitoring, the CLA alone won't get you there. Those are dependent on an action taking place (like solar development) and an evaluation of what needs mitigation. So I guess I am unclear where you are thinking of going with that. If it's the planning activities for the Monument you will be analyzing I think it will be a ways down the road, and advise against including it here. I think the data in the CLA will set you up nicely for when you get there though. Let's talk when you both have a moment.
