Thanks. I will say something to Downey, as NOAA needs this for their part of the Monument review. Perhaps the letter could go later, with an informal copy now.

Kate had a number of areas where she wanted additional information added (just received her comments today). She also would like a transmission letter drafted that covers a number of specific issues added to the package. I am waiting to hear who she wants to sign - the surnaming process could take a while once it is decided. I am guessing that we are looking at multiple weeks if it is being signed by someone in the Secretary's Office.

Are you going to send this? I just spoke with Michael Weiss and he doesn't have it yet. If you want me to send it, could you get me a version that has a date on it?

As I expected, Downey wanted to take a look at this. She has now cleared it.

Since you have been working directly with them on this part of the overall review, do you want to send it to NOAA?
