Hi Tim, from our discussion:

1- From M6220: 1. Where consistent with the designating legislation or proclamation, livestock grazing may occur within Monuments and NCAs. 2. Grazing management practices will be implemented in a manner that protects Monument and NCA objects and values unless otherwise provided for in law.
3. The BLM will use Monuments and NCAs as a laboratory for innovative grazing techniques designed to better conserve, protect, and restore NLCS values, where consistent with the designating legislation or proclamation. GSENM didn't consider the second tier and only considered the research/science tier as an alternative Utah decided not to review.
2- Preferred alternative considers use of non-native species.

Thanks Tim. Let me know if you would like me to set up a time to meet for Monday to bounce the questions.

Britta,

I am close with my comments and actually will probably bounce a couple of questions off of you first. I think it be best I wrap up my thoughts first thing Monday when I have a clear

head.

I have identified what I want to comment on.

Peace,

Timothy J Fisher, Program Lead
