**Subject:** Fwd: Bears Ears and Wild Horses

Hi, Wendy:

Hope all is well with you -- it's been while since I last saw you at MIB.

Kathy Benedetto mentioned that you are looking for background info on BLM's Wild Horse and Burro Program and Bears Ears National Monument. Attached please find a PowerPoint on the Wild Horse and Burro Program and a briefing paper on Bears Ears (I've also attached a checklist that's an attachment to the Bears Ears BP).

Have a great weekend, and let me know if you or Aurelia Skipwith need anything else.

Peter Mali

Subject: Bears Ears and Wild Horses

To: Kathleen Benedetto <[kathleen\\_benedetto@ios.doi.gov](mailto:kathleen_benedetto@ios.doi.gov)>

Cc: Jennifer Wyse <[jennifer\\_wyse@nps.gov](mailto:jennifer_wyse@nps.gov)>

I apologize for the last minute inquiry but by any chance does BLM have stock briefing papers on Wild Horses and Bears Ears? Aurelia is going on travel tomorrow to the West and will be heading to Arches National Park. Two items to be discussed during her time there are both Wild Horses and Bears Ears. We have a general paper from the Park but nothing on those two topics. I thought perhaps BLM may have something that you would hopefully not mind sharing.

Wendy

## WELCOME TO THE BLM'S NATIONAL CONSERVATION LANDS!

[www.blm.gov/programs/national-conservation-lands](http://www.blm.gov/programs/national-conservation-lands)

### ***NEW NATIONAL MONUMENTS & NCAs CHECKLIST – What to do right after designation***

**Primary Actions to be done immediately after designation** (Work closely with the Washington Office to complete these tasks):

- ☐ Identify an interim manager/point of contact for the new National Conservation Lands unit (e.g. Asst. Field Manager, Outdoor Rec Planner, etc.).
- ☐ Acquire acreage data for the new unit (total acres, BLM managed acres, other federal and state managed acres, inholdings, private).
- ☐ Find and collect high-quality photos of the areas/landscapes within the new unit boundaries and make them available to the WO.
- ☐ Prepare an itemized list of funding needs for the new unit (include labor, operations, facilities, and other start-up costs) to be made available for Budget Office requests and other information sharing.
- ☐ Develop a new webpage for the new unit; use designating language for content and use photos.
- ☐ Start serialized case file for the new unit.

Next steps:

#### ***1. Know your authorities***

- ☐ Get to know the proclamation that created the new unit.
- ☐ Identify and record the resources, objects, and values for which the unit was designated
- ☐ Identify management prescriptions and other relevant provisions in the designating language.
- ☐ Familiarize the team with Title II, Subtitle A: National Landscape Conservation System (Public Law 111-11 (Omnibus Public Land Management Act), FLPMA, and other relevant statutes.
- ☐ Read Secretarial Order 3308.

#### ***2. Know your policies***

- ☐ Read relevant BLM Manuals and consider how they relate to the new unit designation:
  - ☐ Manual Section 6100 (2012) – NLCS
  - ☐ Manual Section 6220 (2012) – National Monuments, NCAs, and Similar Designations
  - ☐ Other
- ☐ Read other program Manual Sections that may apply to your unit, including Recreation, Visual Resource Management, Realty, Solid Minerals, Range, etc.
- ☐ Review potentially relevant Instruction Memoranda (Refer to attached list of related National Conservation Lands IMs and IBs).

- ☐ Review relevant Resource Management Plans, activity plans, and other land use plans that apply and review for consistency with the designating authority.

### **3. *Take actions to implement law and policy***

- ☐ Identify and pursue relevant and needed training for employees (new and existing) For example volunteer coordination, partnerships, lands and realty, budget, etc.).
- ☐ Consider potential changes in land use policy and discretionary decisions to accomplish the purposes described in the unit's designating language.
- ☐ Review existing permits and authorized uses for compatibility with the designating authority.
- ☐ Initiate projects to educate the public about the new National Conservation Lands unit.
- ☐ Request to have a new organizational code assigned in FBMS for the new unit.
- ☐ Identify historical funding for management of the public lands that are now the unit.  
Include overhead costs (25-30%). Include FTEs, facilities, projects within the boundaries, etc.
- ☐ Initiate the process to re-program other subactivity funds into subactivity 1711, as applicable.
- ☐ Communicate the budget situation, including immediate needs, to your State and Washington Offices (via briefing paper).
- ☐ Read and get to know the 15-Year NLCS Strategy and the state's Step-down Strategy.
- ☐ Integrate the new unit into BLM's systems: RMIS, FBMS, FAMS, LR2000, MIS, PMDS, etc. RMIS should be a top priority so that visitation numbers can be tracked.
- ☐ Submit budget requests for resource management plan development or amendments.
- ☐ Gather and prepare the spatial data for your unit, including its boundary and recreation facility data, in order to submit it to the NOC's NM/NCA and recreation datasets. This ensures your unit will appear on BLM maps, be included in the recreation mapping project, etc.

### **4. *Know your players***

- ☐ Reach out to the cooperating agencies and entities identified in the designating language.
- ☐ Create a contact list of all relevant BLM, other federal, tribal, state, local, and interest group contacts.
- ☐ Participate in monthly National Monuments and NCAs Conference Calls on the third Thursday of each month.
- ☐ Engage partners – go to other organizations' meetings.
- ☐ Brief the State Office and Washington Office about the progress, events, related to the new unit.
- ☐ Develop an outreach strategy / communications plan in coordination with Public Affairs and National Conservation Lands Leads.

**INFORMATION/BRIEFING MEMORANDUM  
FOR THE ASSISTANT SECRETARY – LAND AND MINERALS MANAGEMENT**

**DATE:** July 7, 2017

**FROM:** Mike Nedd, Acting Director – Bureau of Land Management

**SUBJECT:** Key information on the Bears Ears National Monument, Utah

The purpose of this memo is to provide an overview of the Bears Ears National Monument.

**KEY FACTS**

- On December 28, 2016, the 1,351,849 acre Bears Ears National Monument in San Juan County, Utah, was designated by presidential proclamation and is jointly managed by the Bureau of Land Management (BLM) and the U.S. Forest Service (USFS).
- The new monument includes 1.063 million acres managed by the BLM and 290,000 acres managed by the USFS within the boundaries of the Manti-La Sal National Forest.
- Over 380,000 acres of the federal lands within the boundaries are currently managed by the BLM as 11 Wilderness Study Areas. The BLM-managed part of the monument also contains nine Special Recreation Management Areas, which are managed for their recreation opportunities. The USFS administers the 46,000-acre Dark Canyon Wilderness just north of the Bears Ears formation, as well as the Cliff Dwellers Pasture Research Natural Area.
- These areas provide great economic benefits to their surrounding communities. For every \$1 the National Monuments and National Conservation Areas program receives in funding, it generates approximately \$17 for local economies.<sup>i</sup>
- Overall, visitors to the BLM's National Monuments and National Conservation Areas Lands contributed an estimated \$630 million in economic activity in 2016.

**BACKGROUND**

The idea of a national monument in this area is not new: calls for protection of the Bears Ears began over 80 years ago. The land that is now the Bears Ears National Monument was part of a larger area proposed for designation as early as 1936 by then-Interior Secretary Harold L. Ickes. Other areas within the initial proposal were subsequently designated as Capitol Reef National Park and Canyonlands National Park, managed by the National Park Service.

The monument protects some of the most significant cultural, desert landscapes in the U.S., including abundant rock art, ancient cliff dwellings, ceremonial sites, and other places important to Native American tribes. Recognizing the importance of the area, tribes with ties to the region began working on a specific proposal six years ago to protect this area under the Antiquities Act. To reflect tribal expertise, the Bears Ears Commission has been created to enable tribes to share insight with federal land managers.

The proclamation for the Bears Ears National Monument also establishes a local advisory committee made up of interested stakeholders including state and local governments, tribes, recreational users, local business owners, and private landowners.

The monument preserves current uses of the land, including tribal access and traditional collection of plants and firewood, off-highway vehicle recreation, hunting and fishing, grazing, military training operations, utility corridors, and other valid and existing rights.

The BLM and the U.S. Forest Service will undertake a monument planning process for Bear Ears National Monument, including the opportunity for public input, according to the requirements of the National Environmental Policy Act (NEPA) and agency regulations and policy.

Bears Ears National Monument will add to the economic effects in Utah from the BLM's National Conservation Lands which contributed over \$105 million in economic output and supported nearly 1,200 non-federal jobs in Utah in 2016.

## **DISCUSSION**

The BLM will manage the monument according to the Bureau's relevant manual (BLM Manual 6220–National Monuments, National Conservation Areas, and Similar Designations, 7/13/2012). More specifically, the BLM will follow a checklist (see attached) that sets out steps that monument staff should take immediately (e.g., “Identify an interim manager/point of contact for the new National Conservation Lands unit”) as well as longer-term actions (e.g., “Reach out to the cooperating agencies and entities identified in the designating language”).

As mentioned above, the BLM and Forest Service will undertake a monument planning process that allows for generous public input and complies with NEPA as well as agency regulations and policy.

# Wild Horse and Burro Program Status

House Appropriations & Natural Resources Committee - June 27, 2017

U.S. Department of the Interior  
Bureau of Land Management

## Presentation Overview

- Take Away Messages
- Wild Horse and Burro Act (1971 as amended)
- Program Status
- Existing Management
- Management Challenges
- Management Options

U.S. Department of the Interior  
Bureau of Land Management

## Presentation Overview

### Take Away Messages

- Wild Horse and Burro Program Is Not Sustainable in Present State
- On-range overpopulation has grown uncontrolled to unprecedented levels
- No fertility control methods available that are affordable, easily applied and highly effective.
- WHB overpopulations are causing damage to rangeland health/productivity and wildlife habitat that affects livestock grazers & recreationists.
- Off-range holding too expensive
  - 50,000 animals in holding at cost of nearly \$50,000 million

U.S. Department of the Interior  
Bureau of Land Management

## Wild Horse & Burro Act (1971 as amended)

- Protect, Manage and Control
- Maintain a thriving natural ecological balance in combination with other multiple uses
- Maintain a current inventory (1978 PRIA)

U.S. Department of the Interior  
Bureau of Land Management

## Wild Horse & Burro Act (1971 as amended)

- Immediately remove excess animals and determine if AMLs are to be achieved by removal or destruction of excess animals or other means such as sterilization or natural controls (**The Public Rangelands Improvement Act (PRIA) of 1978**)
- Remove from private land when requested

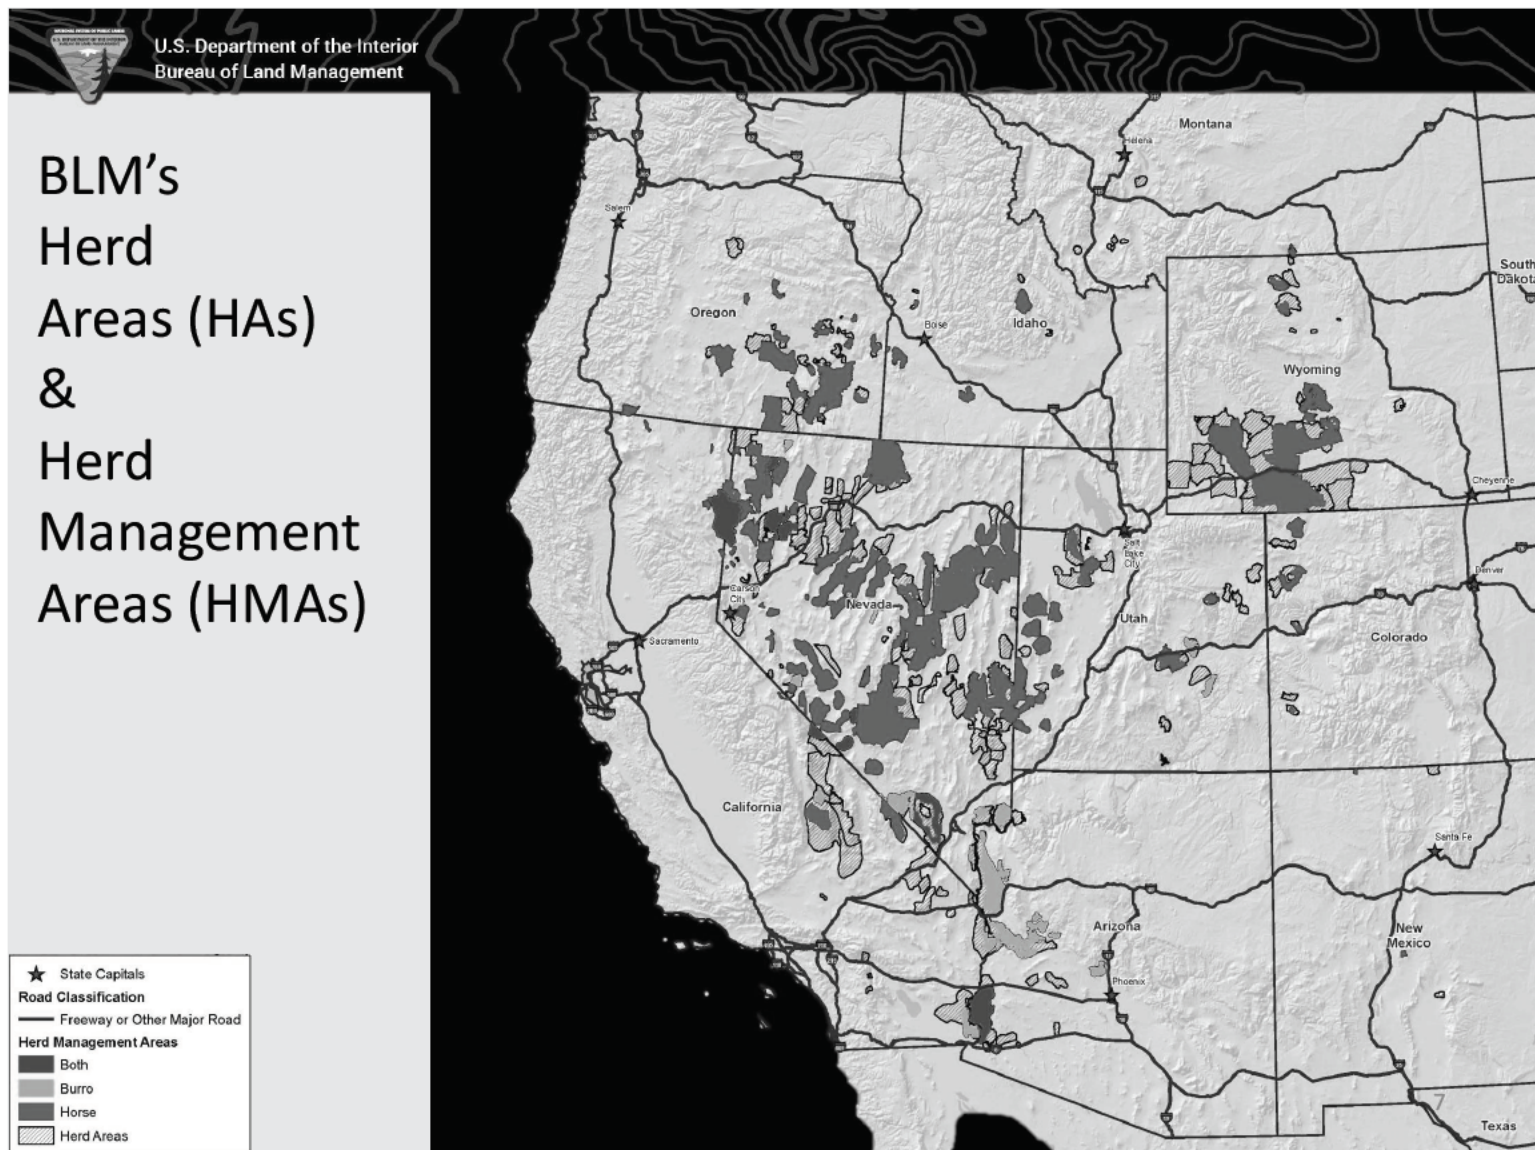

U.S. Department of the Interior  
Bureau of Land Management

## Wild Horse & Burro Act (1971 as amended)

- Excess animals made available for adoption (1978 PRIA)
- Destroy those for which no adoption demand exists (1978 PRIA)
- Sale w/o limitation (Consolidated Appropriations Act, 2005)
  - Offered unsuccessfully for adoption 3 times
  - Animals older than 10 years

- Since 2010, annual legislation has prohibited sale without limitation and destruction of healthy animals

U.S. Department of the Interior  
Bureau of Land Management

## Wild Horses and Burros (WH&B) by the Numbers

- **10** western states have WHBs
- **177** Herd Management Areas (HMA's)
- **26.9** million acres of public rangelands
- **26,715** animals is the Appropriate Management Level (AML)
- **72,674** animals on the range (as of March 2016)
  - 82% of HMAs are over populations 2 to 15 times AML
  - ½ in Nevada
- **45,223** animals in holding (May 2017)
  - 12,466 in 26 corrals (\$4.99 per day; \$28.4 million total in FY16)
  - 32,757 in 28 pastures (\$1.82 per day; \$21 million total in FY16)
- **3,116** adopted/sold in 2016 (\$2,367/animal adopted)
  - Adoptions have declined from 7,800 in 2002
- **3,038** removed from the range in 2016 (\$1,007/animal removed)

U.S. Department of the Interior  
Bureau of Land Management

## Current Management

- Removals currently being restricted to 3,500 to 4,500 per year depending on how many animals leave the system via adoption, sales and mortality attrition.
  - Removing more animals than leave the system would render the program financially insolvent.
  - e.g. Caring for 1,000 unadopted animals in corrals = \$1.8 million/yr.
  - e.g. Caring for 10,000 unadopted animals in corrals = \$18 million/yr.
- Increasing adoptions by offering more trained animals through partnerships with prisons and NGOs
  - Currently about 3,100/year placed in private care good homes
- Reducing holding costs by acquiring more pastures (\$1.82 per animal per day) to decrease animal numbers in expensive corrals (\$4.99 per animal per day).
- Research initiated (\$11 million) to develop more effective fertility control methods and management tools.

U.S. Department of the Interior  
Bureau of Land Management

# Management Challenges

- Overpopulations: 82% of HMAs (March 2016) have populations that exceed target management numbers (AML)
- Current tools to control populations are removals and 1 year effective contraceptive vaccines that have to be reapplied annually to maintain infertility
- Effects of over populations
  - Deteriorated rangeland health and loss habitat for wildlife
  - Livestock grazers and recreationists affected
  - Animal health affected
  - Animals moving out of HMAs
    - Onto private lands
    - Along highways into communities.

U.S. Department of the Interior  
Bureau of Land Management

## What happens when there are too many horses and burros on the range?

Horse impacts on Sheldon National Wildlife Refuge – no livestock grazing.

Overgrazing due to wild horses near Las Vegas – no livestock grazing (2007)

Horse impacts on Sheldon National Wildlife Refuge – no livestock grazing.

U.S. Department of the Interior  
Bureau of Land Management

# Management Challenges

- Increasing concerns from stakeholders
- Low adoptions and sales
  - Decreased from 7,800 (2002) to 3,100 (2016)
- High cost to maintain 46,000 unadopted animals.
  - About \$49 million/year; over 60% of budget
- Emergency conditions in some areas
  - Severe drought
  - Wildfire
  - Winter Mortality
- Litigation – multiple lawsuits challenge every aspect of management.

U.S. Department of the Interior  
Bureau of Land Management

## Way Forward

- Existing Situation is not sustainable
- All tools in the WHB Act are needed.
- The President's FY18 budget proposal includes a request to remove the rider prohibiting unrestricted sale and euthanasia of excess animals.
- The BLM will continue to look for creative and novel ways to:
  - Find new homes for excess animals, including forging effective partnerships for training animals
  - Development and application of fertility control methods
- Collaborate with Congress & stakeholders

Notes Summary:

Slide 7: '26.9 M acres of BLM lands in 10 Western States  
179 Herd Management Areas (HMA's)'

Slide 11: 'What happens when there are too many horses?

- Rangelands become overgrazed

- lack of forage for wild horse and other animals

- On-the-range mortality rates increase dramatically

- Severely damages upland vegetation and riparian areas which are critical  
to wild horse and burro health

- Significantly diminishes water quality and watershed stability

- Increases likelihood of exotic invasive weed species becoming established'
