I think the PMNM bullets are ready to go to Earl.

I also found 2 minor wording issues, in red, on the New England bullets. I have several concerns on the New England memo and will send those shortly.

Papahānaumokuākea Marine National Monument

- The Papahānaumokuākea Marine National Monument (Monument) was established by Presidential Proclamation 8031 of June 15, 2006, as amended by Proclamation 8112 of February 28, 2007, and was expanded by Presidential Proclamation 9478 of August 26, 2016.
- The Monument as expanded went from 139,818 to 582,578 square miles and is located in and around the Northwest Hawaiian Islands.
- The Monument is managed through the DOI U.S. Fish and Wildlife Service's National Wildlife Refuge System, the DOC National Oceanic and Atmospheric Administration, and the State of Hawaii.
- State lands and waters are within the outer boundary of the Monument and are managed as part of the Monument pursuant to a management agreement between the three parties.
- The Proclamations state that Monument was established to protect geologic features, natural resources, primarily fish and wildlife, and to promote Native Hawaiian cultural practices.
- Commercial fishing is prohibited in both the original monument and the expansion. The initial 2006 Proclamation provided a five-year phase-out period for certain fisheries.
- [Commerce insert bullets on Secretary Ross's trade concerns]

Northeast Canyons and Seamounts

- The Northeast Canyons and Seamounts Marine National Monument (NCSNM) was established by Presidential Proclamation No. 9496 on September 15, 2016.
- The NCSNM spans 3,972 square miles and is located approximately 130 miles southeast of Cape Cod, Massachusetts.
- The NCSNM is managed through the DOI U.S. Fish and Wildlife Service National Wildlife Refuge System and the DOC National Oceanic and Atmospheric Administration.
- The Proclamation stated that NCSNM was established to protect geologic features, natural resources, and species.
- Fishing commercially is also prohibited with the exception of red crab and American lobster fisheries, which can continue for up to 7 years.
