Presidential Proclamation -- Northeast Canyons and Seamounts Marine National Monument

NORTHEAST CANYONS AND SEAMOUNTS MARINE NATIONAL MONUMENT

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION No. 9496

For generations, communities and families have relied on the waters of the northwest Atlantic Ocean and have told of their wonders. Throughout New England, the maritime trades, and especially fishing, have supported a vibrant way of life, with deep cultural roots and a strong connection to the health of the ocean and the bounty it provides. Over the past several decades, the Nation has made great strides in its stewardship of the ocean, but the ocean faces new threats from varied uses, climate change, and related impacts. Through exploration, we continue to make new discoveries and improve our understanding of ocean ecosystems. In these waters, the Atlantic Ocean meets the continental shelf in a region of great abundance and diversity as well as stark geological relief. The waters are home to many species of deep-sea corals, fish, whales and other marine mammals. Three submarine canyons and, beyond them, four undersea mountains lie in the waters approximately 130 miles southeast of Cape Cod. This area (the canyon and seamount area) includes unique ecological resources that have long been the subject of scientific interest.

The canyon and seamount area, which will constitute the monument as set forth in this proclamation, is composed of two units, which showcase two distinct geological features that support vulnerable ecological communities. The Canyons Unit includes three underwater canyons -- Oceanographer, Gilbert, and Lydonia -- and covers approximately 941 square miles. The Seamounts Unit includes four seamounts -- Bear, Mytilus, Physalia, and Retriever -- and encompasses 3,972 square miles. The canyon and seamount area includes the waters and submerged lands within the coordinates included in the accompanying map. The canyon and seamount area contains objects of historic and scientific interest that are situated upon lands owned or controlled by the Federal Government. These objects are the canyons and seamounts themselves, and the natural resources and ecosystems in and around them.

The canyons start at the edge of the geological continental shelf and drop from 200 meters to thousands of meters deep. The seamounts are farther off shore, at the start of the New England Seamount chain, rising thousands of meters from the ocean floor. These canyons and seamounts are home to at least 54 species of deep-sea corals, which live at depths of at least 3,900 meters below the sea surface. The corals, together with other structure-forming fauna such as sponges and anemones, create a foundation for vibrant deep-sea ecosystems, providing food, spawning habitat, and shelter for an array of fish and invertebrate species. These habitats are extremely sensitive to disturbance from extractive activities.

Because of the steep slopes of the canyons and seamounts, oceanographic currents that encounter them create localized eddies and result in upwelling. Currents lift nutrients, like nitrates and phosphates, critical to the growth of phytoplankton from the deep to sunlit surface waters. These nutrients fuel an eruption of phytoplankton and zooplankton that form the base of the food chain. Aggregations of plankton draw large schools of small fish and then larger animals that prey on these fish, such as whales, sharks, tunas, and seabirds. Together the geology, currents, and productivity create diverse and vibrant ecosystems.

The Canyons

Canyons cut deep into the geological continental shelf and slope throughout the mid-Atlantic and New England regions. They are susceptible to active erosion and powerful ocean currents that transport sediments and organic carbon from the shelf through the canyons to the deep ocean floor. In Oceanographer, Gilbert, and Lydonia canyons, the hard canyon walls provide habitats for sponges, corals, and other invertebrates that filter food from the water to flourish, and for larger species including squid, octopus, skates, flounders, and crabs. Major oceanographic features, such as currents, temperature gradients, eddies, and fronts, occur on a large scale and influence the distribution patterns of such highly migratory oceanic species as tuna, billfish, and sharks. They provide feeding grounds for these and many other marine species.

Toothed whales, such as the endangered sperm whale, and many species of beaked whales are strongly attracted to the environments created by submarine canyons. Surveys of the area show significantly higher numbers of beaked whales present in canyon regions than in non-canyon shelf-edge regions. Endangered sperm whales, iconic in the region due to the historic importance of the species to New England's whaling communities, preferentially inhabit the U.S. Atlantic continental margin. Two additional species of endangered whales (fin whales and sei whales) have also been observed in the canyon and seamount area.

The Seamounts

The New England Seamount Chain was formed as the Earth's crust passed over a stationary hot spot that pushed magma up through the seafloor, and is now composed of more than 30 extinct undersea volcanoes, running like a curved spine from the southern side of Georges Bank to midway across the western Atlantic Ocean. Many of them have characteristic flat tops that were created by erosion by ocean waves and subsidence as the magma cooled. Four of these seamounts -- Bear, Physalia, Retriever, and Mytilus -- are in the United States Exclusive Economic Zone. Bear Seamount is approximately 100 million years old and the largest of the four; it rises approximately 2,500 meters from the seafloor to within 1,000 meters of the sea surface. Its summit is over 12 miles in diameter. The three smaller seamounts reach to within 2,000 meters of the surface. All four of these seamounts have steep and complex topography that interrupts existing currents, providing a constant supply of plankton and nutrients to the animals that inhabit their sides. They also cause upwelling of nutrient-rich waters toward the ocean surface.

Geographically isolated from the continental platform, these seamounts support highly diverse ecological communities with deep-sea corals that are hundreds or thousands of years old and a wide array of other benthic marine organisms not found on the surrounding deep-sea floor. They provide shelter from predators, increased food, nurseries, and spawning areas. The New England seamounts have many rare and endemic species, several of which are new to science and are not known to live anywhere else on Earth.

The Ecosystem

The submarine canyons and seamounts create dynamic currents and eddies that enhance biological productivity and provide feeding grounds for seabirds; pelagic species, including whales, dolphins, and turtles; and highly migratory fish, such as tunas, billfish, and sharks. More than ten species of shark, including great white sharks, are known to utilize the feeding grounds of the canyon and seamount area. Additionally, surveys of leatherback and loggerhead turtles in the area have revealed increased numbers above and immediately adjacent to the canyons and Bear Seamount.

Marine birds concentrate in upwelling areas near the canyons and seamounts. Several species of gulls, shearwaters, storm petrels, gannets, skuas, and terns, among others, are regularly observed in the region, sometimes in large aggregations. Recent analysis of geolocation data found that Maine's vulnerable Atlantic puffin frequents the canyon and seamount area between September and March, indicating a previously unknown wintering habitat for those birds.

These canyons and seamounts, and the ecosystem they compose, have long been of intense scientific interest. Scientists from government and academic oceanographic institutions have studied the canyons and seamounts using research vessels, submarines, and remotely operated underwater vehicles for important deep-sea expeditions that have yielded new information about living marine

resources. Much remains to be discovered about these unique, isolated environments and their geological, ecological, and biological resources.

WHEREAS, the waters and submerged lands in and around the deep-sea canyons Oceanographer, Lydonia, and Gilbert, and the seamounts Bear, Physalia, Retriever, and Mytilus, contain objects of scientific and historic interest that are situated upon lands owned or controlled by the Federal Government;

WHEREAS, section 320301 of title 54, United States Code (the "Antiquities Act"), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Federal Government to be national monuments, and to reserve as a part thereof parcels of land, the limits of which shall be confined to the smallest area compatible with the proper care and management of the objects to be protected;

WHEREAS, it is in the public interest to preserve the marine environment, including the waters and submerged lands, in the area to be known as the Northeast Canyons and Seamounts Marine National Monument, for the care and management of the objects of historic and scientific interest therein;

WHEREAS, the well-being of the United States, the prosperity of its citizens and the protection of the ocean environment are complementary and reinforcing priorities; and the United States continues to act with due regard for the rights, freedoms, and lawful uses of the sea enjoyed by other nations under the law of the sea in managing the canyon and seamount area and does not compromise the readiness, training, and global mobility of the U.S. Armed Forces when establishing marine protected areas;

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by the authority vested in me by section 320301 of title 54, United States Code, hereby proclaim the objects identified above that are situated upon lands and interests in lands owned or controlled by the Federal Government to be the Northeast Canyons and Seamounts Marine National Monument (monument) and, for the purpose of protecting those objects, reserve as a part thereof all lands and interests in lands owned or controlled by the Federal Government within the boundaries described on the accompanying map entitled "Northeast Canyons and Seamounts Marine National Monument," which is attached hereto, and forms a part of this proclamation. The Federal lands and interests in lands reserved consist of approximately 4,913 square miles, which is the smallest area compatible with the proper care and management of the objects to be protected.

The establishment of the monument is subject to valid existing rights. All Federal lands and interests in lands within the boundaries of the monument are hereby appropriated and withdrawn from all forms of entry, location, selection, sale, leasing, or other disposition under the public land laws to the extent that those laws apply, including but not limited to, withdrawal from location, entry and patent under mining

laws, and from disposition under all laws relating to development of oil and gas, minerals, geothermal, or renewable energy. Lands and interest in lands within the monument not owned or controlled by the United States shall be reserved as part of the monument upon acquisition of title or control by the United States.

Management of the Marine National Monument

The Secretaries of Commerce and the Interior (Secretaries) shall share management responsibility for the monument. The Secretary of Commerce, through the National Oceanic and Atmospheric Administration (NOAA), and in consultation with the Secretary of the Interior, shall have responsibility for management of activities and species within the monument under the Magnuson-Stevens Fishery Conservation and Management Act, the Endangered Species Act (for species regulated by NOAA), the Marine Mammal Protection Act, and any other applicable Department of Commerce legal authorities. The Secretary of the Interior, through the United States Fish and Wildlife Service (FWS), and in consultation with the Secretary of Commerce, shall have responsibility for management of activities and species within the monument under its applicable legal authorities, including the National Wildlife Refuge System Administration Act, the Refuge Recreation Act, and the Endangered Species Act (for species regulated by FWS), and Public Law 98-532 and Executive Order 6166 of June 10, 1933.

The Secretaries shall prepare a joint management plan, within their respective authorities, for the monument within 3 years of the date of this proclamation, and shall promulgate as appropriate implementing regulations, within their respective authorities, that address any further specific actions necessary for the proper care and management of the objects and area identified in this proclamation. The Secretaries shall revise and update the management plan as necessary. In developing and implementing any management plans and any management rules and regulations, the Secretaries shall consult, designate, and involve as cooperating agencies the agencies with jurisdiction or special expertise, including the Department of Defense and Department of State, in accordance with the National Environmental Policy Act (42 U.S.C. 4321 et seq.) and its implementing regulations. In addition, the Secretaries shall work to continue advances in resource protection in the Monument area that have resulted from a strong culture of collaboration and enhanced stewardship of marine resources.

This proclamation shall be applied in accordance with international law, and the Secretaries shall coordinate with the Department of State to that end. The management plans and their implementing regulations shall not unlawfully restrict navigation and overflight and other internationally recognized lawful uses of the sea in the monument and shall incorporate the provisions of this proclamation regarding U.S. Armed Forces actions and compliance with international law. No restrictions shall apply to or be enforced against a person who is not a citizen, national, or resident alien of the United States (including foreign flag vessels) unless in accordance with international law. Also, in accordance with international law, no restrictions shall apply to foreign warships, naval auxiliaries, and other vessels

owned or operated by a state and used, for the time being, only on government non-commercial service, in order to fully respect the sovereign immunity of such vessels under international law.

Restrictions

Prohibited Activities

The Secretaries shall prohibit, to the extent consistent with international law, any person from conducting or causing to be conducted the following activities:

1. Exploring for, developing, or producing oil and gas or minerals, or undertaking any other energy exploration or development activities within the monument.
2. Using or attempting to use poisons, electrical charges, or explosives in the collection or harvest of a monument resource.
3. Introducing or otherwise releasing an introduced species from within or into the monument.
4. Removing, moving, taking, harvesting, possessing, injuring, disturbing, or damaging, or attempting to remove, move, take, harvest, possess, injure, disturb, or damage, any living or nonliving monument resource, except as provided under regulated activities below.
5. Drilling into, anchoring, dredging, or otherwise altering the submerged lands; or constructing, placing, or abandoning any structure, material, or other matter on the submerged lands, except for scientific instruments and constructing or maintaining submarine cables.
6. Fishing commercially or possessing commercial fishing gear except when stowed and not available for immediate use during passage without interruption through the monument, except for the red crab fishery and the American lobster fishery as regulated below.

Regulated Activities

Subject to such terms and conditions as the Secretaries deem appropriate, the Secretaries, pursuant to their respective authorities, to the extent consistent with international law, may permit any of the following activities regulated by this proclamation if such activity is consistent with the care and management of the objects within the monument and is not prohibited as specified above:

1. Research and scientific exploration designed to further understanding of monument resources and qualities or knowledge of the North Atlantic Ocean ecosystem and resources.
2. Activities that will further the educational value of the monument or will assist in the conservation and management of the monument.

3. Anchoring scientific instruments.

4. Recreational fishing in accordance with applicable fishery management plans and other applicable laws and other requirements.

5. Commercial fishing for red crab and American lobster for a period of not more than 7 years from the date of this proclamation, in accordance with applicable fishery management plans and other regulations, and under permits in effect on the date of this proclamation. After 7 years, red crab and American lobster commercial fishing is prohibited in the monument.

6. Other activities that do not impact monument resources, such as sailing or bird and marine mammal watching so long as those activities are conducted in accordance with applicable laws and regulations, including the Marine Mammal Protection Act. Nothing in this proclamation is intended to require that the Secretaries issue individual permits in order to allow such activities.

7. Construction and maintenance of submarine cables.

Regulation of Scientific Exploration and Research

The prohibitions required by this proclamation shall not restrict scientific exploration or research activities by or for the Secretaries, and nothing in this proclamation shall be construed to require a permit or other authorization from the other Secretary for their respective scientific activities.

Emergencies and Law Enforcement Activities

The prohibitions required by this proclamation shall not apply to activities necessary to respond to emergencies threatening life, property, or the environment, or to activities necessary for law enforcement purposes.

U.S. Armed Forces

1. The prohibitions required by this proclamation shall not apply to activities and exercises of the U.S. Armed Forces, including those carried out by the United States Coast Guard.

2. The U.S. Armed Forces shall ensure, by the adoption of appropriate measures not impairing operations or operation capabilities, that its vessels and aircraft act in a manner consistent so far as is practicable, with this proclamation.

3. In the event of threatened or actual destruction of, loss of, or injury to a monument resource or quality resulting from an incident, including but not limited to spills and groundings, caused by a component of the Department of Defense or the United States Coast Guard, the cognizant component

shall promptly coordinate with the Secretaries for the purpose of taking appropriate action to respond to and mitigate any harm and, if possible, restore or replace the monument resource or quality.

4. Nothing in this proclamation or any regulation implementing it shall limit or otherwise affect the U.S. Armed Forces' discretion to use, maintain, improve, manage or control any property under the administrative control of a Military Department or otherwise limit the availability of such property for military mission purposes, including, but not limited to, defensive areas and airspace reservations.

Other Provisions

Nothing in this proclamation shall be deemed to revoke any existing withdrawal, reservation, or appropriation; however, the monument shall be the dominant reservation.

Warning is hereby given to all unauthorized persons not to appropriate, excavate, injure, destroy, or remove any feature of this monument and not to locate or settle upon any lands thereof.

IN WITNESS WHEREOF, I have hereunto set my hand this fifteenth day of September, in the year of our Lord two thousand sixteen, and of the Independence of the United States of America the two hundred and forty-first.

BARACK OBAMA

The White House
Office of the Press Secretary
For Immediate Release
August 26, 2016

Presidential Proclamation -- Papahānaumokuākea Marine National Monument Expansion

PAPAHĀNAUMOKUĀKEA MARINE NATIONAL MONUMENT EXPANSION

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA
A PROCLAMATION

Through Proclamation 8031 of June 15, 2006, as amended by Proclamation 8112 of February 28, 2007, the President established the Papahānaumokuākea Marine National Monument (Monument), to protect and preserve the marine area of the Northwestern Hawaiian Islands and the historic and scientific objects therein. As stated in Proclamation 8031, the area, including the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve, the Midway Atoll National Wildlife Refuge, the Battle of Midway National Memorial, and the Hawaiian Islands National Wildlife Refuge, supports a dynamic reef ecosystem with more than 7,000 marine species, of which approximately one quarter are unique to the Hawaiian Islands. This diverse ecosystem is home to many species of coral, fish, birds, marine mammals, and other flora and fauna, including the endangered Hawaiian monk seal, the threatened green sea turtle, and the endangered leatherback and hawksbill sea turtles. In addition, this area has great cultural significance to the Native Hawaiian community and a connection to early Polynesian culture worthy of protection and understanding.

An area adjacent to the Monument, and that will constitute the Monument Expansion as set forth in this proclamation, includes the waters and submerged lands to the extent of the seaward limit of the United States Exclusive Economic Zone (U.S. EEZ) west of 163° West Longitude, and extending from the boundaries depicted on the map accompanying Proclamation 8031 as amended by Proclamation 8112 (adjacent area).

As required by the Antiquities Act, the adjacent area contains objects of historic and scientific interest that are situated upon lands owned or controlled by the Federal Government; they are geological and biological resources that are part of a highly pristine deep sea and open ocean ecosystem with unique

biodiversity and that constitute a sacred cultural, physical, and spiritual place for the Native Hawaiian community.

This unique ecosystem has many significant features. Important geological features of the adjacent area include more than 75 seamounts, as well as a non-volcanic ridge that extends southwest towards the Johnston Atoll. Together, these features form biodiverse hotspots in the open ocean that provide habitat for deep-sea species, including sponges, other invertebrates, fish, and colonies of corals many thousands of years old. Recent science demonstrates that seamounts harbor a multitude of species with unique ecological traits, some newly discovered. Seamounts, ridges, and other undersea topographic features are important stepping stones that enable marine organisms to spread throughout the Hawaiian Archipelago, and between Hawaii and other archipelagoes. Undisturbed seamount communities in the adjacent area are of significant scientific interest because they provide opportunities to examine the impacts of physical, biological, and geological processes on ecosystem diversity, including understanding the impacts of climate change on these deep-sea communities. These seamounts and ridges also provide the opportunity for identification and discovery of many species not yet known to humans, with possible implications for research, medicine, and other important uses.

Recent scientific research, utilizing new technology, has shown that many species identified as objects in Proclamation 8031 inhabit previously unknown geographical ranges that span beyond the existing Monument, and in some cases the adjacent area also provides important foraging habitat for these species. For example, the endangered Hawaiian monk seal forages well beyond the existing Monument. Scientific research on Hawaiian monk seal foraging behavior has shown that monk seals may travel 80 miles and dive to depths of almost 2,000 feet while feeding.

Important bird species abound in the Monument and the adjacent area. Birds from the world's largest colonies of Laysan albatross, Black-footed albatross, and Bonin petrels, as well as significant populations of shearwaters, petrels, tropicbirds, the endangered Short-tailed albatross, and other seabird species forage in the adjacent area. We now know that albatrosses and Great Frigatebirds rely on the adjacent area during chick-brooding periods, when their foraging is focused within 200 miles of the nesting colonies on the Monument's islands and atolls. At other times, these wide-ranging species use a much broader range (over 1,600 miles) for foraging.

The adjacent area is a foraging and migration path for five species of protected sea turtles. While green and hawksbill turtles use the near-shore waters of the Monument for nesting, these species -- along with the endangered leatherback turtle and threatened loggerhead and olive ridley turtles -- migrate through the adjacent area to reach high-productivity foraging areas.

Twenty-four species of whales and dolphins have been sighted in the adjacent area. Three of these species are listed under the Endangered Species Act as threatened or endangered: sperm whales, fin whales, and sei whales. Cetacean use of the Monument Expansion varies; resident species such as

spinner dolphins, false killer whales, and rough-toothed dolphins utilize the area year-round, whereas other species, such as humpback whales, use it as a wintering area. A wide variety of tropical and temperate water dolphin species inhabit the Monument Expansion, including pantropical spotted dolphins, spinner dolphins, striped dolphins, rough-toothed dolphins, and bottlenose dolphins. Several rarely sighted species of dolphin inhabit the area, including Risso's and Fraser's dolphins. Both of these species are primarily oceanic and found in waters deeper than 1,000 meters. Acoustic evidence also shows that endangered blue whales -- the largest animals on Earth -- visit the area and may migrate past the Hawaiian Islands twice a year.

Sharks, including tiger sharks and Galapagos sharks, are key species in the ecosystems of the Monument and adjacent area. These large and highly mobile predators have expansive home ranges and regularly move across the boundaries of the current Monument into the adjacent waters. Additionally, blue sharks, three species of thresher sharks, and two species of mako sharks inhabit the open ocean environment of the adjacent area.

The Monument and adjacent area are part of the most remote island archipelago on Earth. This biological and geographic isolation, coupled with unique oceanographic and geological conditions, has resulted in an ecosystem critical for new species formation and endemism. These forces result in some of the most unique and diverse ecological communities on the planet.

Importance to Native Hawaiian Culture

The ocean will always be seen as an integral part of cultural identity for the Native Hawaiian community. The deep sea, the ocean surface, the sky, and all the living things in the area adjacent to the Monument are important to this culture and are deeply rooted in creation and settlement stories. Native Hawaiian culture considers the Monument and the adjacent area a sacred place. This place contains the boundary between Ao, the world of light and the living, and Pō, the world of the gods and spirits from which all life is born and to which ancestors return after death. Long-distance voyaging and wayfinding is one of the most unique and valuable traditional practices that the Native Hawaiian community has developed and continues to advance. Once on the verge of cultural extinction, new double-hulled sailing canoes, beginning with the Hōkūle'a in the 1970s, are bringing voyaging and wayfinding to new generations. This traditional practice relies on celestial, biological, and natural signs, such as winds, waves, currents and the presence of birds and marine life. The open ocean ecosystem and its natural resources in the adjacent area play an important role within the cultural voyaging seascape within the Hawaiian Archipelago.

Shipwrecks

World War II shipwrecks and aircraft in the adjacent area, though not identified as objects under the Antiquities Act in this proclamation, are of great historic interest. The naval portion of the Battle of

Midway, one of the most important naval battles of World War II, occurred approximately 200 miles to the northeast of Midway Atoll, in the adjacent area. Deep-sea technologies have enabled the *USS Yorktown*, an aircraft carrier torpedoed during the battle, to be found at more than 16,000 feet below the ocean's surface. Eyewitness accounts and historical records tell the stories of the destroyer *USS Hammann*, five Japanese vessels (the four aircraft carriers *Hiryu*, *Soryu*, *Kaga*, and *Akagi*, and the cruiser *Mikuma*), and several hundred aircraft that were also lost during the battle in this area. The locations of these vessels have yet to be identified. All told, the adjacent area serves as a final resting place for the more than 3,000 people lost during the battle.

WHEREAS, the waters and submerged lands adjacent to the Monument (west of 163° West Longitude and seaward from the boundaries delineated in Proclamation 8031 as amended by Proclamation 8112 out to the limit of the U.S. EEZ) contain objects of historic and scientific interest that are situated upon lands owned or controlled by the Federal Government;

WHEREAS, section 320301 of title 54, United States Code (the "Antiquities Act"), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon lands owned or controlled by the Federal Government to be national monuments, and to reserve as a part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected;

WHEREAS, it is in the public interest to preserve the marine environment, including the waters and submerged lands in the U.S. EEZ west of 163° West Longitude adjacent to Papahānaumokuākea Marine National Monument for the care and management of the historic and scientific objects therein;

WHEREAS, the well-being of the United States, the prosperity of its citizens and the protection of the ocean environment are complementary and reinforcing priorities; and the United States continues to act with due regard for the rights, freedoms, and lawful uses of the sea enjoyed by other nations under the law of the sea in managing the Papahānaumokuākea Marine National Monument and adjacent areas, and does not compromise the readiness, training, and global mobility of the U.S. Armed Forces when establishing marine protected areas;

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by the authority vested in me by section 320301 of title 54, United States Code, hereby proclaim the objects identified above that are situated upon lands and interests in lands owned or controlled by the Federal Government to be part of the Papahānaumokuākea Marine National Monument Expansion (Monument Expansion) and, for the purpose of protecting those objects, reserve as a part thereof all lands and interests in lands owned or controlled by the Federal Government within the boundaries described on the accompanying map entitled "Papahānaumokuākea Marine National Monument Expansion" attached hereto, which forms a part of this proclamation. The Monument Expansion comprises the

waters and submerged lands in the U.S. EEZ west of 163° West Longitude adjacent to the Monument. The Federal lands and interests in lands reserved consist of approximately 442,781 square miles, which is the smallest area compatible with the proper care and management of the objects to be protected.

All Federal lands and interests in lands within the boundaries of the Monument Expansion are hereby appropriated and withdrawn from all forms of entry, location, selection, sale, leasing, or other disposition under the public land laws to the extent that those laws apply, including but not limited to, withdrawal from location, entry, and patent under mining laws, and from disposition under all laws relating to development of oil and gas, minerals, geothermal, or renewable energy. Lands and interest in lands within the Monument Expansion not owned or controlled by the United States shall be reserved as part of the Monument Expansion upon acquisition of title or control by the United States.

Management of the Marine National Monument

Nothing in this proclamation shall change the management of the Papahānaumokuākea Marine National Monument or any of the provisions specified in Proclamations 8031 and 8112. Terms used in this proclamation shall have the same meaning as those defined in Proclamation 8031. The Secretaries of Commerce and the Interior (Secretaries) shall share management responsibility for the Monument Expansion. The Secretary of Commerce, through the National Oceanic and Atmospheric Administration (NOAA), and in consultation with the Secretary of the Interior, shall have responsibility for management of activities and species within the Monument Expansion under the Magnuson-Stevens Fishery Conservation and Management Act, the Endangered Species Act (for species regulated by NOAA), the Marine Mammal Protection Act, and any other applicable Department of Commerce legal authorities. The Secretary of the Interior, through the United States Fish and Wildlife Service (FWS), and in consultation with the Secretary of Commerce, shall have responsibility for management of activities and species within the Monument Expansion under its applicable legal authorities, including the National Wildlife Refuge System Administration Act, the Refuge Recreation Act, and the Endangered Species Act (for species regulated by FWS), and Public Law 98-532 and Executive Order 6166 of June 10, 1933.

Additionally, the Secretary of Commerce should consider initiating the process under the National Marine Sanctuaries Act (16 U.S.C. 1431 *et seq.*) to designate the Monument Expansion area and the Monument seaward of the Hawaiian Islands National Wildlife Refuge and Midway Atoll National Wildlife Refuge and Battle of Midway National Memorial as a National Marine Sanctuary to supplement and complement existing authorities.

The Secretaries shall prepare a joint management plan, within their respective authorities and after consultation with the State of Hawaii, for the Monument Expansion within 3 years of the date of this proclamation, and shall promulgate as appropriate implementing regulations, within their respective

authorities, that address any further specific actions necessary for the proper care and management of the objects and areas identified in this proclamation. The Secretaries shall revise and update the management plan as necessary. In developing and implementing any management plans and any management rules and regulations, the Secretaries shall consult, designate, and involve as cooperating agencies the agencies with jurisdiction or special expertise, including the Department of Defense and Department of State, in accordance with the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*), and its implementing regulations. If the Secretaries deem it beneficial, they may prepare a joint management plan for the entire Monument and Monument Expansion area, consistent with the provisions of the respective proclamations.

The Secretaries shall coordinate and work cooperatively with the Department of Defense, through the United States Navy, to protect, under the Sunken Military Craft Act, Public Law 108-375, 118 Stat. 1811, and any other applicable legal authorities, United States sunken military vessels and aircraft that are found within the geographic boundaries of the Monument Expansion. Any sunken craft of a foreign state found within the geographic boundaries of the Monument Expansion may be protected to the extent authorized under U.S. law, consistent with the President's Statement on United States Policy for the Protection of Sunken Warships (January 19, 2001).

This proclamation shall be applied in accordance with international law. The management plans and their implementing regulations shall impose no unlawful restrictions on innocent passage or otherwise unlawfully restrict navigation and overflight and other internationally recognized lawful uses of the sea in the Monument and Monument Expansion and shall incorporate the provisions of this proclamation regarding U.S. Armed Forces actions and compliance with international law. No restrictions shall apply to or be enforced against a person who is not a citizen, national, or resident alien of the United States (including foreign flag vessels) unless in accordance with international law. Also, in accordance with international law, no restrictions shall apply to foreign warships, naval auxiliaries, and other vessels owned or operated by a state and used, for the time being, only on Government non-commercial service, in order to fully respect the sovereign immunity of such vessels under international law. The Secretary of State, in consultation with the Secretaries of Commerce and the Interior, shall take steps to protect the Monument Expansion as it does with respect to the Monument as specified in Proclamation 8031.

Restrictions

Prohibited Activities

The Secretaries shall prohibit persons from conducting or causing to be conducted the following activities:

1. Exploring for, developing, or producing oil, gas, or minerals, or any energy development activities within the Monument Expansion;
2. Using or attempting to use poisons, electrical charges, or explosives in the collection or harvest of a Monument Expansion resource;
3. Introducing or otherwise releasing an introduced species from within or into the Monument Expansion;
4. Removing, moving, taking, harvesting, possessing, injuring, disturbing, or damaging, or attempting to remove, move, take, harvest, possess, injure, disturb, or damage, any living or nonliving Monument Expansion resource, except as provided under regulated activities below;
5. Drilling into, dredging, or otherwise altering the submerged lands, or constructing, placing, or abandoning any structure, material, or other matter on the submerged lands, except for scientific instruments;
6. Anchoring on or having a vessel anchored on any living or dead coral with an anchor, anchor chain, or anchor rope;
7. Deserting a vessel at anchor or adrift within the Monument Expansion; and
8. Commercial fishing and possessing commercial fishing gear except when stowed and not available for immediate use during passage without interruption through the Monument Expansion.

Regulated Activities

Subject to such terms and conditions as the Secretaries deem appropriate, the Secretaries may permit any of the following activities regulated by this proclamation if such activity is consistent with the care and management of the objects within the Monument Expansion and is not prohibited as defined above:

1. Native Hawaiian practices, including exercise of traditional, customary, cultural, subsistence, spiritual, and religious practices within the Monument Expansion;
2. Research and scientific exploration designed to further understanding of Monument Expansion resources and qualities;
3. Scientific research and development by Federal agencies that cannot be conducted in any other location;

4. Activities that will further the educational value of the Monument Expansion or will assist in the conservation and management of the Monument Expansion;
5. Anchoring scientific instruments; and
6. Non-commercial fishing, provided that the fish harvested, either in whole or in part, cannot enter commerce through sale, barter, or trade, and that the resource is managed sustainably.

Regulation of Scientific Exploration and Research

The prohibitions required by this proclamation shall not restrict scientific exploration or research activities by or for the Secretaries, and nothing in this proclamation shall be construed to require a permit or other authorization from the other Secretary for their respective scientific activities.

Emergencies and Law Enforcement Activities

The prohibitions required by this proclamation shall not apply to activities necessary to respond to emergencies threatening life, property, or the environment, or to activities necessary for law enforcement purposes.

U.S. Armed Forces Actions

1. The prohibitions required by this proclamation shall not apply to activities and exercises of the U.S. Armed Forces, including those carried out by the United States Coast Guard.
2. The U.S. Armed Forces shall ensure, by the adoption of appropriate measures not impairing operations or operation capabilities, that its vessels and aircraft act in a manner consistent, so far as is practicable, with this proclamation.
3. In the event of threatened or actual destruction of, loss of, or injury to a Monument Expansion resource or quality resulting from an incident, including but not limited to spills and groundings, caused by a component of the Department of Defense or the United States Coast Guard, the cognizant component shall promptly coordinate with the Secretaries for the purpose of taking appropriate action to respond to and mitigate any harm and, if possible, restore or replace the Monument resource or quality.
4. Nothing in this proclamation or any regulation implementing it shall limit or otherwise affect the U.S. Armed Forces discretion to use, maintain, improve, manage, or control any property under the administrative control of a Military Department or otherwise limit the availability of such property for military mission purposes, including, but not limited to, defensive areas and airspace reservations.

Other Provisions

Nothing in this proclamation shall be deemed to diminish or enlarge the jurisdiction of the State of Hawaii.

The Monument Expansion shall be the dominant reservation.

Nothing in this proclamation shall be deemed to revoke any existing withdrawal, reservation, or appropriation.

Warning is hereby given to all unauthorized persons not to appropriate, excavate, injure, destroy, or remove any feature of this Monument Expansion and not to locate or settle upon any lands thereof.

This proclamation is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-sixth day of August, in the year of our Lord two thousand sixteen, and of the Independence of the United States of America the two hundred and forty-first.

BARACK OBAMA

Office of the Press Secretary
For Immediate Release
September 25, 2014

Presidential Proclamation --- Pacific Remote Islands Marine National Monument Expansion

PACIFIC REMOTE ISLANDS MARINE NATIONAL MONUMENT EXPANSION

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

Through Proclamation 8336 of January 6, 2009, the President established the Pacific Remote Islands Marine National Monument ("Monument") to protect and preserve the marine environment around Wake, Baker, Howland, and Jarvis Islands, Johnston and Palmyra Atolls, and Kingman Reef for the care and management of the historic and scientific objects therein. The Monument is an important part of the most widespread collection of marine- and terrestrial-life protected areas on the planet, sustaining many endemic species including corals, fish, shellfish, marine mammals, seabirds, water birds, land birds, insects, and vegetation not found elsewhere. The Monument includes the lands, waters, and submerged and emergent lands of the seven Pacific Remote Islands to lines of latitude and longitude that lie approximately 50 nautical miles from the mean low water lines of those seven Pacific Remote Islands. The islands of Jarvis, Howland, and Baker were also the location of notable bravery and sacrifice by a small number of voluntary Hawaiian colonists, known as Hui Panalā'au, who occupied the islands from 1935 to 1942 to help secure the U.S. territorial claim over the islands.

The area around the Monument includes the waters and submerged lands to the extent of the seaward limit of the United States Exclusive Economic Zone ("U.S. EEZ") up to 200 nautical miles from the baseline from which the breadth of the territorial sea of these seven Pacific Remote Islands is measured. The U.S. EEZ areas adjacent to Wake and Jarvis Islands and Johnston Atoll ("adjacent areas") contain significant objects of scientific interest that are part of this highly pristine deep sea and open ocean ecosystem with unique biodiversity. These adjacent areas hold a large number of undersea

mountains ("seamounts") that may provide habitat for colonies of deepwater corals many thousands of years old. These adjacent areas' pelagic environment provides habitat and forage for tunas, turtles, manta rays, sharks, cetaceans, and seabirds that have evolved with a foraging technique that depends on large marine predators.

A significant geological feature of the adjacent areas is the undersea mountains. A seamount is a mountain rising from the seabed that does not reach the sea surface. Most often seamounts occur in chains or clusters. Nearly all of the seamounts in the adjacent areas are volcanoes: some are still erupting actively, and others stopped erupting long ago. The

Monument includes 33 seamounts; the adjacent areas include approximately 132 more. The additional seamounts provide important opportunities for scientific exploration and study. Estimates are that 15 to 44 percent of the species on a seamount or seamount group are found nowhere else on Earth. Roughly 5 to 10 percent of invertebrates found on each survey of a seamount are new to science. Some seamounts have pools of undiscovered species. The approximately 132 seamounts in the adjacent areas provide the opportunity for identification and discovery of many species not yet known to humans, with possibilities for research, medicines, and other important uses.

The adjacent areas also provide an important ecosystem for scientific study and research. The pristine waters provide a baseline comparison for important scientific research that monitors and evaluates impacts of global climate change, including benchmarking coral bleaching and ocean acidification. The scale of the adjacent areas significantly enhances opportunities for such scientific research beyond the Monument boundaries established in Proclamation 8336.

The available scientific information indicates that the adjacent areas include important deep-coral species. For example, sampling from the U.S. Line Islands has identified deep-sea coral species not previously recorded from the central Pacific. Tropical coral reefs and associated marine ecosystems are among the most vulnerable areas to the impacts of climate change and ocean acidification. Protection of the ecosystem in the adjacent areas will provide the scientific opportunity to identify and further study the important deep sea corals.

The adjacent areas provide significant habitat and range for species identified in Proclamation 8336. They include waters used by five species of protected turtles. In addition to the Green and Hawksbill turtles that use the near-shore waters of the Monument, the adjacent areas include waters used by the endangered leatherback, loggerhead, and Olive Ridley turtles. All five species use the adjacent areas for their migratory paths and feeding grounds.

The adjacent areas provide the foraging habitat for several of the world's largest remaining colonies of Sooty Terns, Lesser Frigatebirds, Red-footed Boobies, Red-tailed Tropicbirds, and other seabird species. Many of these wide-ranging species make foraging trips of 300 miles or more from their

colonies on the Monument's islands, atolls, and reefs. For example, since the Monument was established, U.S. Fish and Wildlife Service biologists have documented the return of seabird populations once absent at Johnston Atoll, including Great Frigatebirds, Sooty Terns, Red-tailed Tropicbirds, and other species that are known to feed as much as 300 to 600 miles offshore. Jarvis Island alone has nearly three million nesting pairs of Sooty Terns, which forage more than 300 miles from shore even when rearing chicks on the island. These seabirds forage, in part, by seeking schools of tuna and other large marine predators that drive prey fish to the surface. Black-footed and Laysan Albatross, species that forage across the entire North Pacific, recently recolonized Wake Atoll, making it one of the few northern albatross colonies outside of the Hawaiian archipelago. At Jarvis Island, the Monument and its adjacent area provide an important undisturbed ecosystem that supports many rare seabird species, including the endangered White-throated Storm-petrel.

Manta rays are abundant around the Monument's reefs. Since the Monument was established, scientific research on manta ray movement has shown that manta rays frequently travel over 600 nautical miles away from the coastal environment, and well outside of the Monument boundaries established in Proclamation 8336. Scientific study of the multi-species ecological cycle at the Monument illustrates a very diverse and balanced habitat used by manta rays, many of which are found in the adjacent areas.

The ecosystem of the Monument and adjacent areas also is part of the larger Pacific ecosystem. The Monument land and atoll groups and the adjacent areas share geographic isolation, as well as climate, bathymetric, geologic, and wildlife characteristics that define them as individual biogeographic regions. However, the Pacific Remote Islands area, including the adjacent areas, is tied together by regional oceanographic currents that drive marine species larval transport and adult migrations that shape the broader Pacific ecosystem.

WHEREAS the waters and submerged lands surrounding Jarvis and Wake Islands and Johnston Atoll from the lines of latitude and longitude depicted on the maps accompanying Proclamation 8336 to the seaward limit of the U.S. EEZ of the three Pacific Remote Islands contain objects of historic or scientific interest that are situated upon lands owned or controlled by the Government of the United States;

WHEREAS section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431) (the "Antiquities Act"), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon lands owned or controlled by the Government of the United States to be national monuments, and to reserve as a part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected;

WHEREAS it is in the public interest to preserve the marine environment, including the waters and submerged lands, in the U.S. EEZ adjacent to the Monument at Jarvis and Wake Islands and Johnston Atoll for the care and management of the historic and scientific objects therein;

WHEREAS the security of the United States, the prosperity of its citizens, and the protection of the ocean environment are complementary and reinforcing priorities; and the United States continues to act with due regard for the rights, freedoms, and lawful uses of the sea enjoyed by other nations under the law of the sea in managing the Pacific Remote Islands Marine National Monument and adjacent areas, and does not compromise the readiness, training, and global mobility of U.S. Armed Forces when establishing marine protected areas:

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by the authority vested in me by section 2 of the Antiquities Act, do hereby proclaim the objects identified above that are situated upon lands and interests in lands owned or controlled by the Government of the United States to be part of the Pacific Remote Islands Marine National Monument Expansion ("Monument Expansion") and, for the purpose of protecting those objects, reserve as a part thereof all lands and interests in lands owned or controlled by the Government of the United States within the boundaries described on the accompanying maps entitled "Pacific Remote Islands Marine National Monument Expansion" attached hereto, which form a part of this proclamation. The Monument Expansion includes the waters and submerged lands of Jarvis and Wake Islands and Johnston Atoll that lie from the Pacific Remote Islands Marine National Monument boundary established in Proclamation 8336 to the seaward limit of the U.S. EEZ (as established in Proclamation 5030 of March 10, 1983) of Jarvis and Wake Islands and Johnston Atoll. The Federal lands and interests in lands reserved consist of approximately 308,316 square nautical miles, which is the smallest area compatible with the proper care and management of the objects to be protected.

All Federal lands and interests in lands within the boundaries of the Monument Expansion are hereby appropriated and withdrawn from all forms of entry, location, selection, sale, leasing, or other disposition under the public land laws to the extent that those laws apply. Lands and interests in lands within the Monument Expansion not owned or controlled by the United States shall be reserved as a part of the Monument Expansion upon acquisition of title or control by the United States.

Management of the Marine National Monument

Nothing in this proclamation shall change the management of the Pacific Remote Islands Marine National Monument as specified in Proclamation 8336. The Secretary of the Interior, in consultation with the Secretary of Commerce, shall have primary responsibility for management of the Monument Expansion pursuant to applicable legal authorities. The Secretary of Commerce, through the National Oceanic and Atmospheric Administration, and in consultation with the Secretary of the Interior, shall within the Monument Expansion have primary responsibility with respect to fishery-related activities

regulated pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.), and any other applicable legal authorities. The Secretaries of the Interior and Commerce shall not allow or permit any appropriation, injury, destruction, or removal of any object of the Monument Expansion except as provided for by this proclamation and shall prohibit commercial fishing within the boundaries of the Monument Expansion.

The Secretaries of the Interior and Commerce shall take appropriate action pursuant to their respective authorities under the Antiquities Act, the Magnuson-Stevens Fishery Conservation and Management Act, and such other authorities as may be available to implement this proclamation, to regulate fisheries, and to ensure proper care and management of the Monument Expansion.

The United States shall continue to preserve the freedom of the seas (i.e., all of the rights, freedoms, and lawful uses of the sea recognized in international law enjoyed by all nations, including the conduct of military activities, exercises, and surveys in or over the exclusive economic zone), and to protect the training, readiness, and global mobility of U.S. Armed Forces as U.S. national interests that are essential to the peace and prosperity of civilized nations.

The Secretary of Defense shall continue to manage Wake Island and Johnston Atoll as specified in Proclamation 8336.

Regulation of Scientific Exploration and Research

Subject to such terms and conditions as the Secretary of the Interior or Commerce, as appropriate, deems necessary for the care and management of the objects of the Monument and Monument Expansion, the Secretaries may permit scientific exploration and research within the Monument Expansion, including incidental appropriation, injury, destruction, or removal of features of the Monument Expansion for scientific study, and the Secretary of Commerce may permit fishing within the Monument Expansion for scientific exploration and research purposes to the extent authorized by the Magnuson-Stevens Fishery Conservation and Management Act. The prohibitions required by this proclamation shall not restrict scientific exploration or research activities by or for the Secretaries of the Interior or Commerce, and nothing in this proclamation shall be construed to require a permit or other authorization from the other Secretary for their respective scientific activities.

Regulation of Fishing and Management of Fishery Resources

The Secretaries of the Interior and Commerce may permit noncommercial fishing upon request, at specific locations in accordance with this proclamation and Proclamation 8336. The Secretaries shall provide a process to ensure that recreational fishing continues to be managed as a sustainable activity in the Monument and Monument Expansion, in accordance with this proclamation, Proclamation 8336, and consistent with Executive Order 12962 of June 7, 1995, as amended, and other applicable law.

Monument Management Planning

The Secretaries of the Interior and Commerce shall, within 2 years of the date of this proclamation, prepare management plans, using their respective authorities, for the Monument and Monument Expansion and promulgate implementing regulations that address any further specific actions necessary for the proper care and management of the objects and areas identified in this proclamation and those in Proclamation 8336. The Secretaries shall revise and update the management plans as necessary. In developing and implementing any management plans and any management rules and regulations, the Secretaries shall consult and designate and involve as cooperating agencies the agencies with jurisdiction or special expertise, including the Department of Defense and Department of State, in accordance with the National Environmental Policy Act (42 U.S.C. 4321 et seq.), and its implementing regulations.

This proclamation shall be applied in accordance with international law. The management plans and their implementing regulations shall impose no restrictions on innocent passage in the territorial sea or otherwise restrict navigation and overflight and other internationally recognized lawful uses of the sea in the Monument and Monument Expansion and shall incorporate the provisions of this proclamation regarding Armed Forces actions and compliance with international law. No restrictions shall apply to or be enforced against a person who is not a citizen, national, or resident alien of the United States (including foreign flag vessels) unless in accordance with international law. Also, in accordance with international law, no restrictions shall apply to foreign warships, naval auxiliaries, and other vessels owned or operated by a state and used, for the time being, only on Government non-commercial service, in order to fully respect the sovereign immunity of such vessels under international law.

Emergencies, National Security, and Law Enforcement Activities

1. The prohibitions required by this proclamation shall not apply to activities necessary to respond to emergencies threatening life, property, or the environment, or to activities necessary for national security or law enforcement purposes.
2. Nothing in this proclamation shall limit agency actions to respond to emergencies posing an unacceptable threat to human health or safety or to the marine environment and admitting of no other feasible solution.

Armed Forces Actions

1. The prohibitions required by this proclamation shall not apply to activities and exercises of the Armed Forces (including those carried out by the United States Coast Guard).

2. The Armed Forces shall ensure, by the adoption of appropriate measures not impairing operations or operational capabilities, that its vessels and aircraft act in a manner consistent, so far as is reasonable and practicable, with this proclamation.

3. In the event of threatened or actual destruction of, loss of, or injury to a Monument Expansion resource or quality resulting from an incident, including but not limited to spills and groundings, caused by a component of the Department of Defense or the United States Coast Guard, the cognizant component shall promptly coordinate with the Secretary of the Interior or Commerce, as appropriate, for the purpose of taking appropriate actions to respond to and mitigate any actual harm and, if possible, restore or replace the Monument Expansion resource or quality.

4. Nothing in this proclamation or any regulation implementing it shall limit or otherwise affect the Armed Forces' discretion to use, maintain, improve, manage, or control any property under the administrative control of a Military Department or otherwise limit the availability of such property for military mission purposes, including, but not limited to, defensive areas and airspace reservations.

The establishment of this Monument Expansion is subject to valid existing rights.

This proclamation is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

Nothing in this proclamation shall be deemed to revoke any existing withdrawal, reservation, or appropriation; however, the Monument Expansion shall be the dominant reservation.

Warning is hereby given to all unauthorized persons not to appropriate, excavate, injure, destroy, or remove any feature of this Monument Expansion and not to locate or settle upon any lands thereof.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-fifth day of September, in the year of our Lord two thousand fourteen, and of the Independence of the United States of America the two hundred and thirty-ninth.

BARACK OBAMA
