Kent & Shauna-

In order to be consistent in our responses, we would like to have the same data pulled for GSENM. We do not need extremely specific information, but we do need to know the overall number of transmission lines, communication sites, and other approved ROWs within GSENM. It would be helpful to have the data separated to 1991-1996 and then from 1996-Present.

If you would like to have a call or a meeting to discuss, I am flexible all day tomorrow. The final numbers are due on Wednesday COB. This is a priority request- is it possible to run these figures within the next day or two?

Thank you (and we're sorry).

Shauna,

We are responding to an urgent DOI data request regarding national monuments. This information will be used as part of the President's ongoing review.

One of the items of information requested is the amount of energy transmission infrastructure on site from 1) the date of designation to present; and 2) during the 5 years prior to designation.

Could you please run an LR2000 report and gather information related to transmission lines and pipelines in Bears Ears National Monument, including the date of construction.

Cheers,
