[FY2017 Tracking Spreadsheet.xlsx](#)
[Monthly Hot Topic Snapshot for week of May 8.docx](#)

Hi Chris and Nikki, the Monthly Hot Topic Snapshot for the week of May 8 is attached. Also attached is the WO410 tracking spreadsheet.

Please let me know if you have any questions. Thanks.

Britta Nelson, M.P.A., Program Analyst
National Conservation Lands (WO-410)
Bureau of Land Management

RE: 214

Hi Niki and Peter, Krista's recommendation for 2024-2025, NMA for the Southeastern States PRMP/FIS. WDCSD reviewed the RMP and there are no outstanding issues. The planning area contains the higher value Lighthouse Channel, WSA, and NDA. The WDCSD IP can be found at: <https://doi.gov/engr.com/>

Comments provided on the Federal Register Notice include the notice should state the RMP establishes National Trail Management Corridors for segments of the Potomac, National Heritage Scenic Trail and the Washington-Rochester Revolutionary Route National Historic Trail, and suggested adding to the notice that it other notice package materials.

The MANCA program reviewed and doesn't have comments on the notice package. The NDAF program concurs with the PRM comments. Call ID is not a comment based on the WSA program but it should be fine with the language added to the PRM in the stipulations described above. No wayway meet the WSA at

Please let me know if additional information is needed.

Hi Krista,
WSA comments were addressed and the final was done. So, all briefing took place. There were some issues regarding overlapping designations between NMA and ACSC. Additionally making sure that the purpose and need statement captures the spirit and content is also essential. I think Eastern States is working intensively to complete it when the Federal Register package is. I'll send you the information that the issues raised at the AD briefing are addressed. We will need help and support from AOS to work this out. We will keep you in the loop regarding any further developments.
I will keep you updated.
All the best,
Shirley

To: Niki Nelson (nikin@blm.gov)

Hi Niki, I hope you are well. WDCSD has the NMA for the Southeastern States PRMP/FIS in 2024. There are remaining issues that were to be worked out by Eastern States, WDCSD, and WDCSD but these discussions have not occurred yet. Should we set something up to discuss or is that something you will handle?

• One unit (8, 2

- One unit (8,310 acres) would not be impacted under the RFD farthingale and is not prioritized for protection. Full protection of wilderness characteristics and development of that lease is consistent with the sets.

- The other two units (10,000 acres) would be open to all
- ii) 34,000 acres would be available for wildlife
- Protections of the DWS include closing the area to

- Rationale provided: 1) the RLM concluded that careful management of the watershed is necessary to protect the ORV, given the need to balance environmental protection with energy development. A designation limited to 0.25 mile on both sides of the stream segments may not be fully protective for the health of the ORV; and 2) the Wild and Scenic River proposals were not part of the Settlement Agreement. Relying on the premise that Alternative IV is based on the settlement agreement decision, it is reasonable to assume that the settlement agreement prevents WSR segments from being determined

Comments: BLM NV, currently is recommended for DISE 2018, NDI for the proposed Deep South Expansion Project. Peter contacted with Dave Menegay who indicates that BLM NV will update the relevant wilderness characteristics inventories before writing the DSE for the mine expansion, and they will incorporate the updates were made to the NDI press release to wilderness characteristics as an issue, and to a NDI briefing paper to state: "In 2017, the Battle Mountain District will update its wilderness characteristics inventories as part of revising the District's NWRP. In the process, staff will review wilderness characteristics units and update inventory information to reflect the NWRP analysis."

These documents have been uploaded into DTS and are attached. Please let me know if you need additional information. Thank

Britta Nelson, M.P.A., Program Analyst

al. Peter qualified, gave some

Dave and I spoke, and attached are slightly revised versions of the news release and briefing paper for the proposed Deep South Expansion Project (NSC).

In short, BLM NV will update the relevant wilderness characteristics inventories before writing the EIS for the mine expansion, and they will incorporate the updated info into the NEPA analysis.

Let me know if you have questions, or would like to discuss further:

Hi Dave, Happy Friday! I have a follow up question for OTSM 1216. Was a wilderness characteristics inventory been completed for the expansion area? If not, will one be completed or does the area being impacted

These questions have been noted in the DTS NOX briefing

Britta Nelson, M.P.A., Program Analyst
National Conservation Lands (NCL-832)

Thanks David

Subject: Question on DTS# 1316—Notice of Intent to Prepare an Environmental Impact Statement for the Proposed Deep South Expansion Project Amendment, Lander and Eureka Counties, Nevada

Hi Dave, I hope you are well. We received a NCE package (attached) for an EIS for the Proposed Deep South Expansion Project Amendment. Can you let us know if there are lands with wilderness characteristics or National Conservation Lands in the project area?

Kenneth, Kelly
Dec 17 10:46 AM

To: NWS, me, Heather, Sally
Many thanks NWS and BWS!

To: Kelly, NWS, Heather, Sally
Hi Kelly, we received your letter from NWS and provided a comment to DTS.

(b)(5) DPP

Comment: Britta Nelson
Hi NWS and Sally, comments are recommended for DTS 1207 NWS of 10/10 for the Proposed Gold Butte Mine Project, White Pine County, NV. Per the Notice BP, there are no lands with wilderness characteristics or units of the National Conservation Lands in the project area. I've noted this in a comment in DTS.
The Notice BP Item #12 states: "There are no natural monuments, national conservation areas, or other designations, national scenic or historic trails, wild and scenic rivers, wilderness study areas, wilderness areas or lands with Wilderness Characteristics located within the proposed project area. The BLM and BLM's National Wetlands of the proposed project area in the Nevada-Texas National Forests (N-TNF). The remaining four wilderness areas located within the proposed project area include: Gold Butte, Gold Butte, Current Mountains, and the Mountains. Portions of each of the four wilderness study areas (WFSAs) are located within the proposed project area."
The Notice documents are attached. Please let me know if additional information is needed.

To: me, NWS
NWS, NWS,

I don't quite remember the specifics of our request for the NWS but provide the following as a quick response.
The Proposed BLM FWSA candidate for NWS to be eligible for potential designation as WFS and Scenic Rivers, but the NWS do not determine them to be suitable for designation as WFS and Scenic Rivers, instead protecting them through other means.
Thanks!

Call: 505
Comment: Britta Nelson
My BLM - WFSA B has submitted the NWS for DTS NCA.

Hi Kelly, I have submitted the NWS for DTS NCA.

On Thu, Nov 29, 2011 at 12:33 PM, Nelson, Britta (brittan@blm.gov) wrote:
Hi NWS and Sally, with the following feedback, comments of DTS 1207 NWS of 10/10 for the Domingue-Escalante NCA is recommended. I reviewed the package and found it is consistent with our latest BP on the FRM/VEIS (attached). I haven't sent the package to the programs for review but can if you'd like.

The Communication plan addresses WFS, NWS, wilderness, lands with wilderness characteristics and other management of the NCA.

The FRM is clear on these areas and I added a comment: "These include in the FRM that the Approved BLM makes suitability determinations for WFS, establishes a national trail management corridor for the DTS Spanish NWS, and makes decisions on the protection of lands with wilderness characteristics."

The BP does not address the target shooting closures but we can use that as a compelling reason not to highlight it. Do ahead and update with the recommendation to add it then I can submit. Thanks!

The BP identifies all units except for NWS as I added a comment to: "These include in the briefing paper that a national trail management corridor will be established for the Domingue NWS."

The only other item is some of the NWS notice materials address the public utility corridor along (connecting Campfire Hwy 141) so wasn't sure if we should note that this should be included in the notice briefing documents or FRM.

The notice documents have been shared with you. I haven't updated them this DTS yet so I can make sure to include your feedback and the programs I noted. Let me know how you would like to proceed.

Call: 527

Comment: Britta Nelson:

With all records show that under the proposed plan, a NCL stipulation would be applied to the suitable W&B segments along the Colorado and Green Rivers (25,347 acres), and the Montezuma W&B Segment 3 along the Colorado River which is closed to mineral leasing (752 acres). Have there been changes for W&B since

to Patrick, Mr. Ryan, NREL, GALT

My understanding is that no changes will be made between the Montezuma W&B/BLM documents and the NCL/Approved BLM documents related to some of W&B and areas closed to mineral leasing. Pam, please correct me if I'm wrong.

to Brett, Emily, Mr. Ryan, Sally, NREL, GALT
Correct, there are no changes to acreages between proposed and approved.

 Subject: Question re: DISE 1233--Notice of Intent to Prepare an Environmental Impact Statement for the Amber Mining District Industrial Access Project
 To: Timothy LaMar (tlamar@lin.gov)
 C: Nikki Moore (nmoore@lin.gov), Sally Butts (sbutts@lin.gov), Robert Wick (rwick@lin.gov), Peter Mall (pmall@lin.gov)

Hi Tim, WO#10 received the NDI to prepare an EIS for the Ambler Mining District Industrial Access Project for same name and has some follow up questions. I am reaching out to you because your name is listed as the point of contact for the project in the DITS system.

The Answer NO (attached) indicates that wilderness characteristics are a key issue. Can more information be provided about this including if the wilderness characteristics inventory is current, if the current RMP addresses lands with wilderness characteristics, and if the project is consistent with the plan?

Also are there National Conservation Lands units such as wildland scenic rivers or NCA's in the project area?

Please let me know if we need to discuss.

Hi Peter and Rob, we received OFCE 1333 NCR for an ES for the Ambler-Wilshire District Access Project. There are no NLEIS units but there are lands with wilderness characteristics in the project area. The FO has indicated a lands with wilderness characteristics inventory has been completed but this has not been added to the inventory.

Hi Butts: The short answer to your followup question is "no". We are currently drafting alternatives for our RMP revision, in which we will make those decisions on (NCE), but decisions on (NCE) have not been made for this area at this point because our RMP is still (NCE) for the area of the Andeer Road project.

Summary Recommended: OTC-410-NCL-010101 Notice of Availability of Final Environmental Impact Statement and Notice of Decision for Proposed Land Exchange between the Bureau of Land Management and Agua Caliente Band of Calukula Indians, CA
Title:
x

Arthur, Britta (britta@nps.gov)
Recommended on 2/13/17 by user

As part of this process, a recommendation of OTC-410-NCL-010101 for the OLC of the Proposed Land Exchange with the Agua Caliente Band of Calukula Indians within the Santa Rosa and San Jacinto Mountains National Monument. No action has been made to the notice package (attached). With this action, the BLM or appropriate, and facilitate more efficient land management.

Tim reviewed the package and found the following:

- 1) The land exchange moves BLM lands to the Agua Caliente Band of Calukula Indians within their reservation boundary that is also within the OLC-410-NCL-010101 boundary. The land exchange provides key reservation lands outside the reservation boundary but within the monument boundary to the BLM providing a larger core.
- 2) The current BLM lands being exchanged are isolated and the only way to gain access is through reservation lands and Agua Caliente permission. The exchange will allow more consistent jurisdiction of the lands by the Agua Caliente, but do not change how the lands will be managed in the future. These lands are
- 3) The new BLM acquired lands will provide a larger tract of land considered as lands having wilderness character of within the monument. These lands will also have a more consistent recreation use and improves management of these lands as identified in the OLC-410-NCL-010101.
- 4) These new acquired lands will prevent any potential development within the monument boundary. There is a currently a road connecting these lands but no right of way.
- 5) The Monument Manager nor the OLC see any negative long term impacts from this Land Exchange.

In addition Doug Herrera indicated that such an exchange was mentioned in the legislation that created Santa Rosa & San Jacinto Mountains National Monument in 2000.

Please let me know if additional information is needed.

Review of the Land Exchange and possible comments:

- 1) The land exchange moves BLM lands to the Agua Caliente Band of Calukula Indians within their reservation boundary that is also within the OLC-410-NCL-010101 boundary. The land exchange provides key reservation lands outside the reservation boundary but within the monument boundary to the BLM providing a larger core.
- 2) The current BLM lands being exchanged are isolated and the only way to gain access is through reservation lands and Agua Caliente permission. The exchange will allow more consistent jurisdiction of the lands by the Agua Caliente, but do not change how the lands will be managed in the future. These lands are
- 3) The new BLM acquired lands will provide a larger tract of land considered as lands having wilderness character of within the monument. These lands will also have a more consistent recreation use and improves management of these lands as identified in the OLC-410-NCL-010101.
- 4) These new acquired lands will prevent any potential development within the monument boundary. There is a currently a road connecting these lands but no right of way.
- 5) The Monument Manager nor the OLC see any negative long term impacts from this Land Exchange.

Let's exchange package - let me know if you require any additional information or questions for the briefing.

Exchange Overview:

- * This exchange involves disposing of 2,560 acres of Federal land to the Agua Caliente Band of Cahuilla Indians in exchange of 1,471.24 acres of non-Federal lands.
- * All of the lands involved in the exchange are located within the Santa Rosa and San Jacinto Mountains National Monument, Southern California Desert District.
- * The Agua Caliente serial number is CA-6296SP1(SD).

16

Nelson, Britta Nelson@blm.gov
Attached: Feb 23 (1 day ago)

to Sally Peter, Timothy

Hi Sally and Peter, here's a recommendation of 07/14/2015 for the FWS of the Proposed Land Exchange with the Agua Caliente Band of Cahuilla Indians within the Santa Rosa and San Jacinto Mountains National Monument. No edits have been made to the entire package (attached). With this action, the BLM is negotiating, and building on, the current management.

16

16. The current BLM land being exchanged is not owned and not only is to be protected through the current BLM land use plan, but also through the current BLM land use plan. The exchange will allow more consistent protection of the land by the Agua Caliente Band, but do not change the land use plan or the current BLM land use plan.

17. The new BLM acquired land will provide a larger tract of land considered as lands having wilderness character of within the monument. These lands will also have a more consistent recreation use and improve management of these lands as identified in the 06/08/2015 LUP.

18. These new acquired lands will provide a larger tract of land considered as lands having wilderness character of within the monument. There is a currently a road connecting these lands but no right of way.

19. The Monument Manager can use the FWS on any negative long term impacts from this Land Exchange.

In addition Doug Herrera indicated that such an exchange was mentioned in the legislation that created Santa Rosa & San Jacinto Mountains National Monument in 2003.

Please let me know if additional information is needed.

Hi Britta and Sally!

I hope this finds you both doing well. Just noticed that this land exchange is in 01/16, so I thought I'd reach out and ask if you had any questions about it or if there's anything holding it up. It's an exchange between BLM and the Agua Caliente Band of Cahuilla Indians right here in Palm Springs.

I'm also at the Agua Caliente monument manager, and I'm sure you'll get some more info.

Thanks!

Best,

Doug

Correction was made to a NCR201 reference in the briefing memo.
Make a comment in the briefing memo to please identify the public mapping and overall engagement process that will focus on parties interested in GBMM.
Make a comment in the briefing memo asking if placement issues had been identified by the GBMM and if they should be fixed.
As a reminder, as agreed at the March 22 meeting with Nevada and NCR201.
A proposed Briefing Document for the Federal Register NCR package will be sent to the NCR and will include a specific section highlighting the public mapping and overall engagement process with a focus on parties interested in GBMM and will note the NCR201/NCR202/Nevada meeting held to discuss the
Completion of the District-wide RMP will incorporate GBMM issues with the Special Designation section of a RMP.
GBMM will have a separate Record of Decision.
Additional field work for lands with wilderness characteristics will occur in the Gold Butte area.

National Conservation Lands, your review of DTEP 1517, NCR of the Cedar City BLM/RP (DCL), is requested. Please provide feedback by April 22 in the documents shared with you in google drive using the "suggestions" mode. For reference, the NCR201BEP for Cedar has also been shared with you.
I reviewed the NCR package and added a comment to the NCR BP (item # 12), asking the BP to identify the units of the National Conservation Lands located in the planning area and to specify that lands with wilderness characteristics are in the planning area. Also, the NCR specifically addresses lands with wilderness c
Thanks,
Britta Nelson

Hi Ryan, I hope you are well. W04 10 has the NGA for the Southeastern States PMPT/ETS in OYS. There are remaining issues that were to be worked out by Eastern States, W02 10, and W04 10 but those discussions have not occurred yet. Should we set something up to discuss or is that something 210 will coordinate?

Thanks,

is NKKI included in the meeting with Eastern States? Since the ONK is a National Conservation Lands unit, NKKI should be included in discussions on: the ACEC overlap

National Conservation Lands, I will submit review of the GSDM DMAP ADDS is scheduled for January 30 through February 20 with a kick-off briefing scheduled for January 11. After reviewing the review files from WDC101 I will share them along with a WDC102 comment form on google drive. WDC102 comment previously
Allison and Rob, can you provide answers to each of the following questions from your review of the GSDM DMAP ADDS to help guide WDC101's review?

General

Are all National Conservation Lands units and other related areas that are located within the planning area identified and the management addressed in the BMP alternatives? If not, is there a stand alone plan for that unit?

Are mitigation conditions identified for future land use activities that impact National Conservation Lands units and other related special areas?

Are appropriate land use alternatives and/or management actions identified in the BMP that link or exclude land use activities that are incompatible with the management of National Conservation Lands units and other related special areas?

[REDACTED]

Are all of the following elements that the BLM must implement: distribution plan and schedule for the ongoing presentation for BLM of ongoing your assessment for BLM?

Are new utility corridors or RPOs in the BLM/CA identified as avoidance or avoidance areas?

Lands with wilderness characteristics

Does the FO have a complete, updated inventory of lands with wilderness characteristics?

Is an inventory report included in the BLM/CA?

Are decisions made for all lands with wilderness characteristics within the planning area?

Is a table included for decisions to (1) emphasize other multiple uses (2) emphasize other multiple use while applying management restrictions to reduce impacts to wilderness characteristics, and/or (3) protect wilderness characteristics over other multiple uses?

Is a table included that summarizes some inventory, some found to have wilderness characteristics, some and the percentage of lands that fall within each of the categories described in BLM Manual 630, which include: 1) protection of lands with wilderness characteristics as a priority over other uses, 2) emphasize using other values impacts to wilderness characteristics? will occur and wilderness character will be maintained?

Eligible and Suitable WMA

Did the FO complete WMA eligibility inventories consistent with current policy requirements (BLS 6400)?

Did the FO complete suitability, suitability and determination for eligible streams using factors and criteria from MMS07?

Are suitability/unusable decisions made for all WMA eligible streams in the planning area?

Is the WMA Study Report included in an Appendix with its contents with current policy?

For segments determined not suitable, do other resource allocations protect the river values, and/or is a table provided for not protecting the river values especially if implementation of the BMA will degrade or eliminate those river values?

National Lands and Resource Trade

Is the National Land Management Council alternative included in the alternative?

Does the plan include objectives and associated management actions, allowable uses, and restrictions to safeguard the nature and purpose of the land?

Other BMA Issues

Does the BMA include any unique issues (e.g., associated settlement agreement or background (e.g., anomalies included in a National Monument proclamation) that affect the alternative?

Comments have the values issue or background affect the alternative.

Please let me know if you want to start discuss. Thanks. Bette

Comment: Brita Nelson:

To summarize, here is the status of what "I think" encompasses NCL programs (but not cure):

- WSK - just found the original WDC comment and have provided it to Tom Wickhamkus (State NCL + Rec Lead)
- NHIF - just found the original WDC comment and have provided it to Tom Wickhamkus (State NCL + Rec Lead) and Kevin Keeler (battered NHIF lead)
- LWC - we are sending our alternatives per our State Director's direction. Rob Wick and Tom Wickhamkus could not reach resolution, so it went to the SD and Chris Macalino's level. As a result, there will be no responses to these comments.

Review A16-01 briefing: October 10-14 2016

Call history
Call 017

Comments
National Convention Links, W01 email review of the GISSM DRMP A16-01 is scheduled for January 10 through February 20 with a kick-off briefing scheduled for January 11. After receiving the review from W01201 I will share them with a W01612 comment form on google drive. W01102 commented previously about A16-01, can you provide email to each of the following questions from your review of the GISSM DRMP A16-01 to help guide W01612's review?

General
Can all National Convention Links and all other related needs that are involved within the planning be identified and the management identified in the RMP alternatives? If not, is there a stand alone plan for that?
An emergency decision that has to be made that affects more than one National Convention Link and all other related special needs?
The National Convention Links and all other related special needs identified in the RMP that are not included but are activities that are not compatible with the National Convention Links and all other related special needs?
Does the RMP identify the resources, objects, and values (R01) for which the MNRCA was designated, and how these R01s will be managed?
Are there any planning decisions in the RMP consistent with the purpose and objectives of the designating authorization for Act of Congress that are established in this R01?
Are new utility corridors or R01s in the MNRCA identified as exclusion or avoidance areas?

National Monuments/National Conservation Lands and Wildlife Designations
Is this a combined R01, is there a range of options specific to the MNRCA?
Does the RMP identify the resources, objects, and values (R01) for which the MNRCA was designated, and how these R01s will be managed?
Are there any planning decisions in the RMP consistent with the purpose and objectives of the designating authorization for Act of Congress that are established in this R01?
Are new utility corridors or R01s in the MNRCA identified as exclusion or avoidance areas?

Links with wilderness characteristics
Does the RMP include a complete, updated inventory of links with wilderness characteristics?
Is an inventory report included as an appendix?
Does the RMP include a table with wilderness characteristics within the planning area?
Is a table included for decision 1 to emphasize other multiple uses, (2) emphasize other multiple uses with applying management decisions to reduce impacts to wilderness characteristics, and/or (3) protect wilderness characteristics on other multiple uses?
Is a table included that addresses any environmental issues based on wilderness characteristics, and the percentage of lands that fall within each of the categories described in the National MNRCA, which include: (1) protection of wilderness characteristics at priority over other uses, (2) emphasize other multiple uses, (3) wilderness characteristics will not occur, and wilderness character will be maintained?

Options and Analysis
Did the RMP include an ability to manage impacts consistent with current policy requirements (B01 A001)?
Did the RMP consider wilderness evaluation and determination for multiple uses using Decision and Criteria from MNRCA?
An additional/alternative decision made for the R01 multiple uses in the planning area?
Is the R01 R01s R01s included as an Appendix which is consistent with current policy?

For segments determined not suitable, other resource allocation projects for the review, and/or is a table provided for the protection of the new uses especially if implementation of the RMP will require or eliminate those new uses?

National Forests and National Trails
Is the national trail management plan (including the alternative) included in the alternative?
Does the plan include objective and associated management actions, alternatives, and, and restrictions to safeguard the nature and purpose of the trail?

Other RMP uses
Does the RMP include any unique items (e.g., associated environmental, agricultural, or biological) (e.g., a resource) included in a National Monument/protection that affect the alternative?
Is there a table that includes the unique items or background affect the alternative.

Please see below if you need any other details. Thank you.

National Conservation Lands, a WD0 interim review of the GSENM DRMP A-DEIS is scheduled for January 30 through February 20 with a kick-off briefing scheduled for January 31. After receiving the review file from WD210 I will share them along with a WD030 comment form on google drive. WD10 commented previously Allison and Rob, can you provide answers to each of the following questions from your review of the GSENM DRMP A-DEIS to help guide WD030's review?

General

Are all National Generation Lands units and other related areas that are located within the planning area identified and the management addressed in the BLM alternatives? If not, is there a stand alone plan for that unit?

Are all display standards identified for future land use activities that occur within National Generation Lands units and other related special areas?

Are appropriate land use allocations and/or management actions identified in the BLM that limit or exclude land use activities that are incompatible with the management of National Generation Lands units and other related special areas?

How does the State Director best address BLM alternatives and decisions regarding National Generation Lands, lands with wilderness characteristics, eligible and suitable (see designations) Wild and Scenic River segments, and trails under study or recommended as suitable for designations?

National Marine

Does the RMP identify the resources, objects, and values (ROVs) for which the NMA/NCA was designated, and how these ROVs will be managed?

Are all land use planning decisions in the RMP consistent with the purposes and objectives of the designating proclamation or Act of Congress that established the NMA/NCA?

Are new utility corridors or ROVs in the NMA/NCA identified as exclusion or avoidance areas?

Lands with will

Does the FO have a complete, updated inventory of lands with wilderness characteristics?

Is an inventory report included as an Appendix?

Are decisions made for all lands with wilderness characteristics within the planning area?

Is rationale included for decisions to (1) emphasize other multiple uses; (2) emphasize other multiple uses while applying management restrictions to reduce impacts to wilderness characteristics; and/or (3) protect wilderness characteristics over other multiple uses?

Is a table included that summarizes acre inventoried, acre found to have wilderness characteristics, acres and the percentage of lands that fall with in each of the categories identified in BLM Manual 4200, which include: (1) protection of lands with wilderness characteristics as a priority over other uses; (2) emphasizing other multiple uses to wilderness characteristics; will occur and wilderness character will be maintained?

Eligible and Sur

Did the FO complete WSR eligibility inventories consistent with current policy requirements (NYS 6400)?

Did the FO complete suitability evaluations and determinations for all eligible streams using factors and criteria from M6400?

Are suitability/habitat decisions made for all WSR-eligible streams in the planning area?

Is the WSR Study Report included as an Appendix and is consistent with current policy?

and/or is/are needed for not meeting the decision criteria (Implementation of the RAS will depend on whether these are needed)

Does the plan include objectives and associated management actions, allowable uses, and restrictions to safeguard the nature and purposes of the trail?

Summarize the

Please let me know if you would like to discuss. Thanks, Britta

09-09-16, Re

^a As the NMP-450s were forward (high development), impact studies, the NMP-450s will participate to ensure that the National Conservation Lands are adequately considered.

- The RMP-A p

• Land use planning-level decisions for other resources are outside the scope of this RMP-A (per to 2014 NCE). However, all other affected resources and uses will be analyzed (e.g., National Conservation Lands units that may be affected by amended oil and gas decisions).

• Potential impacts to the Old Spanish NW were identified during the scoping period in 2013 (see Scoping Report).

• The RMP-A/EIS will account for this accordingly (through alternatives development, impact assessment, etc).

• The 2005 amended NOI announces that the BIA is joining the effort as a joint lead AND that the BIA intends to use the EIS to inform decisions related to BIA-managed minerals.

(b) (5) [REDACTED] IT RM5006 Lowlands Conference Room

[illegible][illegible]

Comments: (1/12) Nelson: Allison Cameron, LSA, a WFO admin review of the GSWND MMP-ADGSS is scheduled for January 30 through February 10 with a kick-off briefing scheduled for January 31. After receiving the review files from W0210 I will share them along with a W0410 comment form on google drive. W0410 commented previously Nelson and Rob. Can you please answer to heads of the following questions from your review of the GSWND MMP-ADGSS to help guide W0410's review?

[illegible]

Does the FO have a complete, updated inventory of lands with wilderness characteristics?
Is an inventory report included as an Appendix?
Are decisions made for all lands with wilderness characteristics within the planning area?
Is resource included for decisions to (1) evaluate other multiple uses; (2) evaluate other multiple uses while seeking management restrictions to reduce impacts to wilderness characteristics; and/or (3) protect wilderness characteristics over other multiple uses?

Thank you, Sally. I'm sharing your clarification with the Monument staff.

Nelson, Brian <brian@blm.gov>

Apr 14 (7 days ago)

To: Timothy, Sally

Looking like it is at the latest in GSDNM "Incubators" language since our discussion on this yesterday. Sorry again for not copying Tim on my original note to Ryan.

Batts, Sally

Apr 14 (7 days ago)

Hi, Mr. Batts if you want assistance...

Batts, Sally

Apr 14 (7 days ago)

To: Ryan, Andrew, Matthew, Cynthia, Mr. Nelson, Ryan, Timothy

Thanks, Ryan. Just wanted to let you know "Incubator" is the closing of my email. I wasn't "Incubator" fairly about that...must be time for the weekend!

Have a good one, Sally

Matthew, Cynthia

Apr 14 (7 days ago)

To: Sally, Ryan, Andrew, Matthew, Mr. Nelson, Ryan, Timothy

All

We would like to propose language for the Drafting Paper and section 3.6.1 of the EIS that would easily clarify the issue. This involves changing the words "Incubator" to "Incubation with". Throughout the document, including the Program and Bond, section 3.6.1 and section 3.6.2 we use the w

The statement in the BP and 3.6.1 would read:

Given that the Proclamation provides the BLM with the discretion to coordinate landward grazing consistent with managing objects identified in the Proclamation, Alternative C provides a balance of landward grazing that recognizes the importance of working to the local custom and culture with managers

Let me know if this will work with everyone.

Thanks!

Cheryl Kasek

Chat with Ryan Matthews

Friday, April 14, 2017 10:25 AM

Ryan Matthews

Can you and Sally meet Monday to go over GSDNM with the field?

Brian Nelson:

About our comments?

Ryan Matthews:

Brian Nelson:

Hi Cheryl

We have a meeting on Monday evening. If there's discussion about the "Incubator" issue, we should have a separate meeting with the regional GSD, also. The Value Statement should be included in the meeting notes. Thanks!

Ryan Matthews:

Good!

Monday, April 17, 2017 11:47 AM

Brian Nelson:

Do you think we will need to meet this afternoon or GSDNM? It looks like there's just one item left but not sure we need to meet about it.

Ryan Matthews:

I will call you, call the back whenever!

Brian Nelson:

on the line with Sally, will call after

Ryan Matthews:

Ok, if you don't need a call and are good with it? In response, I'm good to wait

Brian Nelson:

We are good with GSDNM's responses. Thanks Ryan!

Ryan Matthews:

No problems, meeting canceled!

Ryan Nelson:

To: Eric Johnson <erjohn@blm.gov>, Kelly Crawford <kccrawford@blm.gov>
Cc: Leah Quenberry <lquenberry@blm.gov>

Kelly and I, I rearranged and edited the response to NMA's question on the 430 comments document. I don't know if this helps anyone understand our response, but I just felt the need to do it after the briefing today. I haven't sent it to Andrew or NMA.

2. We would like to better understand how over 50% of the soil can be damaged by wildfire and at a level to reduce the breeding habitat for sage grouse by 30%, but grazing is only being reduced in the preferred alternative by a few hundred AUMs. We would like to see stronger rationale on how we can "lose and still not lose"?

Regarding this, this does not imply of "increasing wildlife response time" and "success rates of restoration efforts." These were goals in the original 2007 Plan and the National Fire Health Plan, and these are still in effect. But they are outside the scope of this currently focused plan amendment. Restoration efforts are usually more AUMs, reduction in breeding grazing is required to focus in not closed our planning tool decision. Grazing management after a fire is a site-specific decision, and is not appropriate for a landscape scale LUP decision. This work is done under the guidelines of Emergency Stabilization and Restoration Plans and is outside the grazing strategy required after the stabilization work and is not allowed on a burned area until desirable grasses and/or forbs have been re-established, typically two or more growing seasons. To date, previously burned areas have been seeded if the native plant community was not able to recover naturally. Once feedback is not

While efforts to plan protection of the Monument do both riparian, habitat grazing is not the causal factor for this. Removing habitat would not have the effect of returning riparian. Please see the discussion on Vegetation Condition in Chapter 3 of the FES.

Planning efforts are always contingent on available funding. There is never any guarantee of funding, but there is an understanding there will be agreed facts effort to implement any plan the BLM selects and publishes.

Hope I'm inaccurate on any of this.
Thanks,
Eric

Comments

Nelson, Darryl Chiswick@blm.gov

Apr 27/15 4:04 AM

To Timothy

I dug through the attachments and don't see a direct relationship between fire and Ashby (per Kelly's question). But there are a few places where an association is described:

Ch. 3 Special Forest Systems, p. 133-134

Recent fire has killed or injured approximately 94,800 acres of the Monument, including areas

identified as providing suitable components of several sagebrush habitat. Adjustments to habitat delineations as a consequence of these fires has not been completed. Adjustments to habitat delineations were not completed because BLM lacks the site-scale data assessments to substantiate changes in herbaceous components.

Wildfire has resulted in a loss of sagebrush cover, and is largely responsible for habitat not meeting the essential requirements for sage grouse in many areas of the monument. Specifically, the areas identified as suitable (94 of suitability) for breeding habitat in the Monument, 74.3% of the area were found to be unsuitable only because sagebrush cover was lacking, and a lack of sagebrush was a contributing factor (in an

within the Monument identified as unsuitable for breeding habitat, 1.0% of the area were solely due to low herbaceous cover, and a lack of herbaceous cover was a

contributing factor in 17% of unsuitable sites, including the aforementioned 94%.

Land-use grazing, "Active Antagonist Effect"

Ch. 3, p. 285-286. Future design of brushback grazing in the Monument are likely, as both the BLM's and operator's management shift over time, based on resource considerations and business needs. Some reasonably foreseeable scenarios that may change brushback grazing for the question are changes in permitted use, c

temperatures and wet springs, or changes that may need to occur due to monitoring and data collection.

Within the Monument, vegetation communities are influenced by brushback grazing management, wildfire, rehabilitation efforts, fuel load projects, and climate. All contribute either direct or indirect effects to brushback grazing. These influences all interact to affect changes in the vegetation communities, and thus the longer term for brushback grazing.

AGM for reference purposes. The guidance in this document is consistent with the Idaho National Monument Final Plan Amendment attachment.

For

vegetation and successful establishment of seeded species within brushback areas, all new seedlings of grasses and forbs should not be treated until at least the end of the second growing season, and longer as needed to allow plants to mature and develop robust root systems which will stabilize the site, compete effectively against pathogens and other invasive animals, and remain sustainable under long term grazing management. Adjust other management activities, as appropriate, to meet ESQ objectives.

NO FWS ESQ. Adjust, as appropriate, brushback management on adjacent unburned areas to

mitigate the effect of the burn on local ESQ objectives.

NO FWS ESQ. Adjust, as appropriate, brushback management on adjacent unburned areas to

mitigate the effect of the burn on local ESQ objectives.

NO FWS ESQ. Monitor existing areas designated as suitable or unsuitable for brushback grazing

during active fires for brushback grazing within the growing year of fire to be changed

as the local ESQ. Through the number of Ashby available on an adjustment may be adjusted

based on the specific conditions to meet management objectives during the growing season, ESQ

development, or other appropriate management planning, including, temporary

Revised final draft ROD for the Transborder Transmission Project and the WMA package sent for review by Sharon Knowlton on 05-18-16. Comments requested by CDB, 5-24-16. National Trails comments on ROD provided on 05-24-16. 05-26-17. Followed up on the Mitigation and Monitoring appendix which is missing details on projects. It will most likely contain several options including the purchase of riparianly designated allotments. The WMA has drafted a plan and is now waiting our Director's approval. Once ready, it can be shared internally with the larger BLM group.

Hi Molly, Molly, and Terry - I hope you are all well and have had a great week. I wanted to check in with you on the Verde Transmission project BWP amendments/CDS. I am hoping you can keep me updated on the progress of this project and let me know if support is needed from WMA as the draft is being prep.
Our records show the following project issues:
1) The project area includes eligible and suitable WMA resources including additional segments of the Rio Grande. The proposed route crosses the Rio Grande River. Section 7 of the WMA and Scientific Monuments Act requires looking at "crosscut" projects that are upstream, downstream or on a tributary of a designated river. Based
2) The project would cross two National Historical Trails (the Camino Real de Tierra Adentro & Old Spanish NHT). The project needs to be considered per BLM NAC200.
3) There are no lands with wilderness characteristics per existing inventories. Inventories may have been conducted as part of the BLM's, Tucson Field Office BWP Amendment of 2012. Additional inventories may need to be conducted to prepare a complete and defensible CDS for this project.
Additional project information follows:

Hi Kelly, Mary, and I hope you all had a great last weekend. I wanted to check in with you on the Nevada Transportation project amendments. I'm hoping you can keep me updated on the progress of the project and the next steps for the project. I need to provide a response to WSDOT as the draft is being sent out.

Our research shows the following project:

- The project includes adding and updating Nevada's existing rules including additional segments of the Nevada. The proposed route crosses the Nevada State. Section 7 of the WSD and Nevada. An existing building or "structure" projects that are upstream, downstream or on a tributary of a designated river.
- The project would cross two historical historical sites (the Nevada State and Nevada State). The project would cross the Nevada State and Nevada State. The project would cross the Nevada State and Nevada State.

The project is not a new historical historical site (the Nevada State and Nevada State). The project is not a new historical historical site (the Nevada State and Nevada State). The project is not a new historical historical site (the Nevada State and Nevada State).

Subject: Here are the TransWest Express draft Final RSD, RSDM and RSDA package for review in 3 emails

Hello everyone this is the first of 3 emails providing the draft Final package described above. We are pleased to provide the revised draft RSD for the TransWest Transmission Project and the RSDA package for review. The body of the RSD is attached, along with the Mitigation and Monitoring appenda, which is at the end of the RSD. Appendix 1: Mitigation and Monitoring with the regulatory appenda, Appendix 2: Requirements for grantee's consistency and RSD comments, Appendix 3: Alternatives eliminated from further analysis and Appendix 4: NPS requirements for access to TransWest Express. Appendix 5 is the Plan of Development and

All comments received on the draft RSD and RSDM grant that for have been submitted except those noted here or call highlighted in the document. For those who have previously reviewed documents, please verify we've adequately addressed your comments. The purpose of this review is to identify show stopping Our Wyoming External Affairs Office will be working directly with other states and the WDO to finalize the RSDA package.

We anticipate finalizing the grantee stage process and regulatory first mitigation after the technical advisory group completes its task in the first half of June. We'll add that mitigation then. When WDO provides the bonds with wilderness characteristics details for inclusion in the mitigation and monitoring appenda,

In order to maximize our efficiency and allow for robust review and comment we are providing this package out now for final review and comment. Still pending completion are the Final RSD and the PA.

Please respond with any suggested revisions by close of business May 18th, 2016. Subsequent emails will contain a courtesy copy of the TNE Plan of Development in 3 parts due to size limitations.

Regards,
Sharon

RE: 12-17,
Mazur, Mike
Jan 12 (2 days ago)

To Tamara, Stephen, Sally, Deborah, Christopher, Georganna, me

To Mazur, Steve, and Georganna- thank you for sending us the BCD-RD2 for a quick review. We did notice that the WCD language used for other transmission projects appears to be missing. To meet policy requirements, we recommend the following language be added to the National Conservation Lands NHT section on

To meet the policy and purposes of the National Trails System Act (NTSIA Sec. 100), to prevent a project which will not substantially interfere with the nature and purposes of the trail (NTSIA Sec. 7)(3), and to safeguard the nature and purposes of the National Scenic and Historic Trails (NSHT), BLM MS-4388 1.A.A.3.a.3),

Analysis and consultation measures to mitigate impacts to National Trails System components, including the Oregon National Historic Trail (Oregon NHT), will be applied for the duration of the impacts from the Project. For residual (i.e. unavoidable) effects to the values and settings of the Oregon NHT, that were National Trails System components, and will be required to be applied for the duration of the impacts. Mitigation measures will be feasible, additional, timely, consistent, adaptive, integrated, and reported upon.

The terms and conditions within the permit will include all identified NHT-related avoidance, minimization, and compensatory mitigation measures, which may include, but are not limited to, proposed mitigation measures (e.g. design features), including the associated monitoring, adaptive management, and reporting requirement.

Please let me know if you have any questions!

Hi Britta, Kelly, and Terry - I hope you are all well and have had a great week. I wanted to check in with you on the Verde Transmission project BWP amendments/SES. I am hoping you can keep me updated on the progress of this project and let me know if support is needed from WOIS as the draft is being prep.
Our review shows the following project items:
1) the project will include eligible and suitable WOIS resources including additional segments of the Rio Grande. The proposed route crosses the Rio Grande River. Section 7 of the WMA and BLM's Waters Act requires looking at "Treatment" projects that are upstream, downstream or on a tributary of a designated river. Based
2) The project would cross two National Historical Trails (the Camino Real de Tierra Adentro & Old Spanish NHT). The project needs to be considered per BLM NHTS.
3) There are no lands with wilderness characteristics per existing inventories. Inventories may have been conducted as part of the BLM's, Tucson Office's BWP Amendment of 2013. Additional inventories may need to be conducted to prepare a complete and defensible SES for this project.
Additional project information follows.

To: Teresa, Harkis, Julie, Deborah, Christopher, Gales, etc

Teresa, Julie, and Deborah - thank you for sending us the BHP IIS for a quick review. We did notice that the BHP language used for other transmission projects appears to be missing. To meet policy requirements, we recommend the following language be added to the National Conservation Lands IIS section on

To meet the policy and purposes of the National Trails System Act (NTSIA, 16 U.S.C. 1201) to permit a project which will not substantially interfere with the nature and purposes of the trail (NTSIA, 16 U.S.C. 1201), and to safeguard the nature and purposes of the National System and Historic Trails (NHS, 16 U.S.C. 1201).

Avoidance and minimization measures to mitigate impacts to National Trails System components, including the Oregon National Historic Trail (ONHT), will be applied for the duration of the impacts from the Project. For residual (i.e., unavoidable) effects to the values and settings of the Oregon NHST, that show National Trails System components, and will be required to be applied for the duration of the impacts. All mitigation measures will be feasible, additional, timely, monitored, adaptively managed, and reported upon.

The terms and conditions within the permit will include all identified NHST-related avoidance, minimization, and compensatory mitigation measures, which may include appropriate proposed mitigation measures (e.g., design, structure), including the associated monitoring, adaptive management, and reporting requirement. Please let me know if you have any questions!

Hi Niki,

The attached BHP document has incorporated the BHP IIS into the app. IIS and IIS under National Conservation Lands, National Historic Trails.

Additionally we have added a new sentence under Decision, Right of Way Authorization and Selected Alternative public Review (Public) request.

Please post this version to DLS.

Thanks much!

- Teresa

Hi Nikki, Molly, and Terry - I hope you are all well and have had a great week. I wanted to check in with you on the Verde Transmission project BLM amendments (BLM). I am hoping you can keep me updated on the progress of this project and let me know if support is needed from WFOIS in the draft, being a map. Our records show the following project items:
1) The project area includes rights and interests in BLM resources including additional components of the WFOIS. The proposed route crosses the WFOIS Route. Section 7 of the WFOIS and Section 1000 of the National Trails System Act requires looking at "historic" projects that are significant, distinctive or on a site of a designated area. Based
2) The project would cross two National Historic Trails (the Central Road to Fort Adams & Old Spanish NHT). The project needs to be avoided per BLM NHP-200.
3) There are no lands within the project area that are National Historic Trails (the Central Road to Fort Adams & Old Spanish NHT). Additional inventory may need to be conducted to properly complete and defend the BLM for this project.

Subject: Re: Draft of the Verde Transmission Project BLM amendments (BLM)
The Verde project. Thanks for keeping me updated and letting me know what WFOIS support might be needed as you move forward. I do have a question - I saw this project is identified on the priority project list (https://www.blm.gov/press-releases/2024/09/24/blm-priorities-2024-2025) and I am wondering if it is a priority project for the BLM.

Hi Mike, Mike, and Terry - I hope you are all well and have had a great week. I wanted to check in with you on the Verde Transmission project RMP amendment/DLS. I am hoping you can keep me updated on the progress of this project and let me know if support is needed from WDCIS as the Draft is being prep.

Our records show the following project team:

- 1) The project area includes eligible and suitable WDCIS resources including additional segments of the Rio Grande. The proposed route crosses the Rio Grande near Section 7 of the WMA and hence, Waters Act requires looking at "technical" projects that are upstream, downstream or on a tributary of a designated river. Based on the project area, the project would cross two National Historical Trails (the Camino Real de Tejas National & Old Spanish NHT). The project needs to be considered per NHPA 106.280.
- 2) There are no lands with wilderness characteristics per existing inventories. Inventories may have been conducted as part of the BLM's Tenth Field Office RMP Amendment of 2013. Additional inventories may need to be conducted to prepare a complete and defensible DLS for this project.

Additional project information follows.

Thanks,

Calli V

To: Kelly, Peter
Hi Kelly and Peter, I met with Georgetown Lewis and Michael earlier this morning about the WFO review of the Section 303 Energy Corridor Region 1 draft review report. The report focuses on review of energy corridors in southern California, southern Nevada, and western Arizona.

WFO review of draft report is scheduled for March 14-16. A review kick-off webinar is planned for March 15. The review will be a synchronous 10/10/10 review. Information has been gathered from the USFWS, other agencies, stakeholders, and others for the report. The draft review report includes a summary of public comment on policy issues and if the decision or recommendations in the draft review report are supported. The 31% with the review package will follow the review.

As a refresher, here is a press release about the Section 303 Energy Corridor Regional Review: https://www.blm.gov/wh/press/2018/09/28/section303_09_28_2018.html

I'll send you a heads up to the programs if that works.

I am hoping you can keep me updated on the progress of this project and let me know if support is needed from WDCD as the draft is being a prep.

Our records show the following project items:

1) The project was included in the National Conservation Lands (NCL) inventory including additional segments of the Rio Grande. The proposed route crosses the Rio Grande River. Section 7 of the WMA and BLM's River Act requires looking at "success" projects that are upstream, downstream or on a tributary of a designated river. Based

2) The project would cross the National Historical Trail (the Camino Real de Tierra Adentro & Old Spanish NHT). The project needs to be considered per BLM NAC200.

3) There are no lands with wilderness characteristics (WCA) existing. Inventories may have been conducted as part of the RMP's. Two Draft DLS/RMP Amendment of 2012. Additional inventories may need to be conducted to prepare a complete and defensible DLS for this project.

National Conservation Lands Programs, a quick heads up about the WO review of the Section 108 Energy Corridor Region 1 draft review report. The report focuses on review of energy corridors in southern California, southern Nevada, and western Arizona.

WO review of the draft report is scheduled for March 14-15. A review kick-off webinar is planned for March 15. The review will be a continuous 10/100 review. Information has been gathered from the 10/100, other agencies, stakeholders, and others for the report. The draft review report includes a summary of public comment on policy issues and if the decisions or recommendations in the draft review report are requested. The 10/100 with the review package will follow the review.

As a reference, here is a press release about the Section 108 Energy Corridor Regional Review: https://www.blm.gov/wh/press/pressroom/2013/section108_2013_03_14.html

Please let me know if you have any questions at this point. Thanks.

Thank you for your input.

1) The project area includes eight and includes WO412 stream including additional segments of the Rio Grande. The proposed route crosses the Rio Grande River. Section 7 of the WO412 and Section 8 of the WO412 requires building a "flooded" project that is upstream, downstream or on a tributary of a designated river. Based on the project area, the project would cross two National Historical Trails (the Central Trail and the Santa Fe Trail). The project would be considered per BLM WO412.

2) There are no lands within the characteristics per existing inventories. Inventories may have been conducted as part of the BLM's Tule Creek Office RMP Amendment of 2013. Additional inventories may need to be conducted to prepare a complete and defensible DO for the project.

This non-NEPA corridor resolution recommendation report product is the result of the recent Section B&E Westwide Energy Corridor - Region

Please provide your review comments and suggested revisions within the attached document comment review form by COB Friday, April 19th, 2013. This provides authors (2) week review period.

Identified Region 1 "Panel 2" reviewers include:

Region 1 (JL, CL, WY) B&E Field Office, District Office and State Office program and line management;
Region 1 URS, Inc., Southern Region program and line management in cooperation;
B&E M&D, W&D and W&D-W&D program staff;
Region 1 Consulting Agency program and line management within the B&E, B&E, W&D, W&D and W&D;
The Section B&E Interagency Work Group

You have been assigned to review through a recent calendar event of a planned Region 1 "Panel 2" Review Webinar scheduled for this coming Wednesday, March 20th at 1:00 PM (PST) to 3:00 PM (PST) B&E PT. It will provide an overview of the Draft Region 1 Recommendation Report, address review concerns

It is important note, that the Draft Report is comprised of two (2) separate file sets as follows:

Draft Report in Microsoft Word (attached to B&E file) and as received on the B&E file below;

Appendix A in Microsoft Excel (attached to B&E file) and as received on the B&E file below;

Appendix B - Part 1 in a PDF file (B&E file) and as received on the B&E file below;

Appendix B - Part 2 in a PDF file (B&E file) and as received on the B&E file below;

Revised Corridor Abandonment Review file (not to be received on the B&E file below).

Revised Corridor Abandonment Review file (not to be received on the B&E file below).

Revised Corridor Abandonment Review file (not to be received on the B&E file below).

Revised Corridor Abandonment Review file (not to be received on the B&E file below).

Revised Corridor Abandonment Review file (not to be received on the B&E file below).

To view your review and comment effort, please first focus your initial attention on Section 2, Section 3 and respective B&E State or URS Corridor Recommendations. If time allows, review Section 1.0 which provides background on the 2009 Inc. B&E F&O and R&O, subsequent lawsuit / settlement agreement

(After you've had a chance to familiarize yourself with the Draft Report, I believe you'll see the very comprehensive and high quality product that Argonne and the Region 1 Core Team has developed that is intended for use by Region 1 B&E / URS' land use planners in the future. 505.236.0129

To: Kelly, Peter; Timothy, Robert; Cathy, Del Norte

National Conservation Lands Program, another couple updates on the Section 308 Energy Corridor Region 1 Recommendations Report follow. First, the BLM Corridor Team has indicated we can expect to see the draft report for review on March 20.

Next, in response to Kelly's question about GIS layers, the corridors and National Conservation Lands which have been mapped on the on the BLM map are found at: <http://dnap.blm.gov/section308/park/>, or we can request the GIS layers. If you would like the layers, please let me know and I will follow up.

National Conservation Lands Program, a few updates on the Section 308 Corridor review.

A meeting for the review of the Section 308 Energy Corridor Region 1 Recommendations Report is scheduled for March 20.

A three week review of the Draft Report by NM-12000 State Management, WOTAP Program Leads and Corridor/holder Federal Agency leads/Region is planned for March 20th through April 15th.

Following is an early suggestion for the review of the Draft Report by the BLM State Office of the corridor.

Please let me know if you have any questions. Thanks.

National Conservation Lands Programs, a quick heads up about the WD review of the Section 268 Energy Corridor Region 1 draft review report. The report focuses on review of energy corridors in southern California, southern Nevada, and western Arizona.

WD review of the draft report is scheduled for March 14-30. A review kick-off webinar is planned for March 15. The review will be a simultaneous SO/WD review. Information has been gathered from the SO/WDs, other agencies, stakeholders, and tribes for the report. The draft review report includes a summary of public comment on policy issues and if the decisions or recommendations in the draft review report are supported. The OTS with the notice package will follow the review.

* Update: WO432 sent on April 4 to address questions raised for how National Trusts were addressed in the draft revenue report (medium potential for conflict). Clarification was provided that it is a draft revenue report used for pre-application screening criteria from WO 2011-061. The screening criteria used to assess the MS202 policy, draft R-14 use permit use that will not substantially interfere with the restoration and purpose of the National Trust. The first four and third rule 910 (C) 208-323 provides screening criteria for categorizing color and water quality. The first rule was not specifically include National Trusts without a Solar and Wind farm because they are outside the National Conservation Lands.

Our records show the following project issues:
1) the project area includes eligible and suitable WFS streams including additional segments of the Rio Grande. The proposed route crosses the Rio Grande River. Section 7 of the WSA and Section 9 of the Act requires looking at "increment" projects that are upstream, downstream or on a tributary of a designated river. Based
2) The project would cross two National Historical Trails (the Camino Real de Tierra Adentro & Old Spanish NHT). The project needs to be considered per BLM 160205.
3) There are no lands with wilderness characteristics per existing inventories. Inventory may have been conducted as part of the BLM's Tenth Census RMP Amendment of 2012. Additional inventories may need to be conducted to prepare a complete and defensible GIS for this project.

Additional project information follows.

Thanks,

W0410 Comments on Section 368 Corridor Region 1 Recommendations Report

1

Nelson, Britta <bnelson@lin.gov>
Attachments: Apr 14 (7 days ago)

Journal of Case Management

202.226.0539

On Mon, Mar 27, 2017 at 1:37 PM, Gazewood, James [Jim] <jgazewoo@tln.gov> wrote:

This email forwards for the planned BLM, USFS and cooperating agency "level 2" review, the attached DRAFT Section 368 Energy Corridor Region 2 Recommendations Report. This non-NEPA corridor revision recommendation report product is the result of the recent Section 368 West-wide Energy Corridor - Region

Please provide your review comments and suggested revisions within the attached document comment review form by COB Friday, April 16th, 2017. This provides a three (3) week review period.

Identified Region 1 "Level 2" reviewers include:
 Region 1 (AZ, CA, NV) BLM Field Office, District Office and State Office program and line management;
 Region 1 USFS Pacific Southwest Region program and line management as appropriate;
 BLM WO-100, WO-300 and WO-400 program staff;
 Region 1 cooperating agency program and line management within the FWS, BOR, NPS, BIA and DoD;

You have been previously notified through a recent calendar event of a planned Region 1 "Level 2" Review Webinar scheduled for this coming Wednesday, March 28th at 1:00 PM ET/1:00 AM MT/10:00 AM PT that will provide an overview of the Draft Region 1 Recommendation Report, address review coordination

It is important note, that the Draft Report is comprised of five (5) separate file sets as follows:

Appendix A in Microsoft Excel (attached 12-KB file) or accessed via the Box link below:

Appendix B - Part 2 as a PDF file (84-MB to large to attach) to be accessed via the Box link below:

For Level 2 reviewers who may experience email problems with receiving the large Draft Report Attachment, all five file sets can be accessed and download using Argonne National Laboratory's Box Sec. 368 Project file site at the following link:

http://app.box.com/file/0/1/225199320466/03-Region_1_Corridor_Recommendations_Report_-_For_Level_2_Review

Revised Corridor Abstracts for each Region 1 BLM State and the USFS can be accessed and downloaded using the ANL Box 368 Project file site as follows:

https://app.box.com/file/0j7f22526224829/Conislar_Abstracts

To ease your review and comment effort, please first focus your initial attention on Section 2, Section 3 and respective BLM State or USFS Corridor Recommendations. If time allows, review Section 1.0 which provides background on the 2009 Sec. 368 PGIS and RCD, subsequent lawsuit / settlement agreements

After you've had a chance to familiarize yourself with the Draft Report, I believe you'll see the very comprehensive and high quality product that Argonne and the Region 1 Core Team has developed that is intended for use by Region 1 BLM / USFS land use planners in the future. We look forward to the next steps in the process.

Again, please provide your review comments using the attached comment form to me and/or Georgann Snake, WFO Transition / Sec. 368 Program Lead by COB Friday, April 14th.

If you should have any questions or need further assistance, please contact me as provided below, or contact Georgeann Smale at (202) 912-7219 or Connie Wiscum, Project Manager, Argonne NS, (630) 252-5788.

Start with the Level 2 Review.

Hi Britta,

No bother at all on adding about the status of our response. I appreciate you keeping it on your radar.

We have decided to go ahead and include the end user greenhouse gas emissions (GHG) estimate into the RMP and this effort is taking some time due to the complexity involved in generating current and forecast all-gas production in your field office. We are close to having the production estimate sent to us.

With the upcoming holidays it may be a few weeks before we are able to have this done.

If you have any other questions I would be glad to answer them.

Thanks,
Chad

Cell: C3

Comment: Britta Nelson:

Cohen, Ilana

Dec 20 (9 days ago)

Hi Nikki,

I think this package looks good. In the initial BLM section of the Order (on page 2), I would like to request the following change:

Replace this:

"BLM's 32 million-acre National Conservation Lands System."

With this:

"BLM's 35 million-acre National Conservation Lands."

Thank you,

-Ilana

On Dec 20, 2016, at 6:43 PM, Salt, Deborah <debsalt@blm.gov> wrote:

Nikki, Britta:

Thanks for the opportunity to review the BLM's response/strategy to the Secretarial Order signed by Secretary Jewell in October.

I see no red flags in the response/strategy. Surname is recommended from my perspective.

There may be future opportunities for us to also formulate ways to work with Tribes leading up to the 50th anniversaries of the Wild and scenic Rivers Act and National Trails System Act (2018) based on this SO; however, we are not prepared at this time to offer such an initiative in the response, given the imminent deadline. We could consider this idea as we develop our 50th strategies, as appropriate.

**May 2017
Monthly Hot Topic Snapshot
WO-410 RMP and EIS Review
Updated 05/08/17**

Chris McAlear
Acting Assistant Director
Assistant Director (WO-400)

RMPS AND PROJECTS WITH ISSUES TO ELEVATE/DIRECTORS PRIORITIES

- **Sonoran Desert National Monument PRMP-A/FEIS. Arizona.**
 - **Update:** Three week WO review is scheduled for the week of May 15.
 - Amendment is focused on target shooting. **This amendment has a court ordered deadline.**
- **Grand Staircase-Escalante National Monument administrative draft MMP-A/DEIS. Utah.**
 - **No issues.**
 - **Update:**
 1. WO410 coordinated with the UTSO and WO210 about the use of "in balance" language and agreed the notice briefing paper and section 2.6.1 of the EIS would be updated to change the words "in balance" to "consistent with".
 2. GSENM clarified that per the MMP, nothing in the land use plan amendment prevents the use of livestock as a vegetation management tool.
 - WO410 surmised DTS# 1471, NOA for the GSENM MMP-A/DEIS, on April 14. **NOA package has not reached WO400.**
- **Craters of the Moon National Monument Proposed RMP Amendment/FEIS. Idaho.**
 - **No issues.**
 - **Update:** It was agreed to move the amendment forward as-is.
 - **This amendment has a court ordered deadline** (ROD by July 2017).
 - DTS# 1515, NOA of the Craters of the Moon NM PRMP-A/FEIS was surmised by WO410 on May 1. **NOA package reached WO400 on May 8.**
- **Challis, Salmon, Upper Snake RMP Prep Plan. Idaho.**
 - **Update:** WO410 received the responses to WO feedback on the prep plan on May 8. Responses are under WO410 review.
- **Browns Canyon RMP Prep Plan. Colorado.**
 - **Update:** WO410 received the responses to WO feedback on the prep plan on May 3. Responses are under WO410 review.
- **DTS# 1527. NOA of the DRMP and DEIS for the Cedar City Field Office Planning Area. Utah.**
 - **Update:**
 1. Surmised by WO410 on May 2. **NOA package has not reached WO400.**
 2. Received the response to WO comment on April 19. Provided feedback to WO210 on April 24 re: establishing WSA as ROW avoidance areas. Checking with WO210 to confirm acceptance of comment.

- **DTS# 1542. NOI to Amend the RMP for the Ukiah Field Office, California and Prepare an Associated Environmental Assessment for the Berryessa Snow Mountain National Monument.** California.
 - Surnamed by WO410 on May 2. **NOI package has not reached WO400.**
- **DTS# 1560, Notice of Temporary Closure and Temporary Restrictions for the Burning Man event.** Nevada.
 - Surnamed by WO410 on April 18. **Notice package has not reached WO400.**
- **DTS# 1545. NOA of the Draft RMP and DEIS for the BLM Carlsbad Field Office,** New Mexico.
 - **Update:** WO210 is holding the NOA while the Carlsbad FO revisits the alternatives. Updates to the DRMP/DEIS will come to the WO for review.
- **DTS# 1401. NOA of the Boardman to Hemingway ROD.** Oregon.
 - **NOA package has not reached WO400.** NOA not routed at Division level.
 - WO410 provided updated language for NSHT for the ROD to the Project Manager and WO210 (Jan 12, 2017).
- **Section 368 Energy Corridor Region 1 draft review report.** Southern California, southern Nevada, and western Arizona.
 - **Update:** Checked in with WO301 to determine if follow up is needed re: WO410 comments (submitted April 14, 2017) or the updated conflict maps. WO301 indicated no follow up needed at this time.
 - **Issues:** The draft review report addresses National Trails in accordance with outdated policy. This issue has been addressed with WO301 with follow-up occurring.
- **Donlin Natural Gas Pipeline.** Alaska.
 - **No update.**
 - Meeting with BLM Alaska was held on February 27 to discuss State Patent lands of concern within the Donlin project, specific to the Iditarod National Historic Trail. Although it is not feasible to get a ROW reservation for affected townships, BLM Alaska is working to get comments into NEPA for the project, including mitigation for impacts to the NHT.
- ~~**Verde Transmission ADEIS.**~~ New Mexico.
 - **Issues:** Potential impacts to WSR and National Trails.
 - Proposed route crosses Rio Grande River. Eligible and suitable WSR streams in area including additional segments of the Rio Grande WSR.
 - Project would cross the Camino Real de Tierra Adentro NHT and Old Spanish NHT.
 - **Next milestone is review of ADEIS (TBD). Any review is to be coordinated through New Mexico as amendment is not on WO210 priority list for WO review.**
 - **Update:** Scoping Report is being prepared. Scoping indicates opposition to project.
- **Mancos Shale RMP-A NOI, Farmington,** New Mexico.
 - **Issues: Unknown** but WO410 is tracking because the RMP-A proposes to amend four decision types including lands with wilderness characteristics and will analyze potential impacts from oil and gas decisions to the Old Spanish NHT (RMP decisions for the NHT will not be made).
 - **As the RMP-A/EIS moves forward (alts development, impact analysis, etc.). WO410 will participate to ensure that the National Conservation Lands units are adequately considered.**

- **Update:** draft alternatives will be completed this summer. Public release of the DRMP/DEIS is not anticipated until calendar year 2018. NMSO will coordinate with WO210 on WO review.

UPCOMING BRIEFINGS (NEXT 30 DAYS)

- **Sonoran Desert National Monument PRMP-A/FEIS.**
 - **WO review staff briefing is scheduled for May 15, 2017.**
 - **No issues.** WO410 met with AZ on 11-29-16 to discuss resolution of WO410 comments. The SDNM monitoring protocol will use the Limits of Acceptable Change methodology to determine if additional actions are needed to avoid impacts. Subsequent NEPA would be conducted for those actions.
 - This is a targeted amendment. Lands with wilderness characteristics were inventoried and identified for protection in the monument RMP.
- **Grand Staircase-Escalante National Monument administrative draft MMP-A/DEIS. Utah.**
 - **AD Brief TBD.** Staff pre-brief was held April 25.
 - **No issues.** 471,700 acres contain wilderness characteristics. The draft MMP did not specifically address management of lands with wilderness characteristics, however these lands receive incidental management in the following zones:
 - The primitive zone (281,800 acres) allows for an undeveloped, primitive, and self-directed visitor experience without mechanized or motorized access.
 - The outback zone (149,600 acres) is intended for an undeveloped, primitive, and self-directed visitor experience, while allowing motorized and mechanized access on designated routes. Facilities are rare and are provided only when needed for resource protection.
 - The remaining lands with wilderness characteristics (40,300 acres) are in the front country and passage zones which contain more facilities and are the focal points for visitation.
- **Cedar City DRMP/DEIS. Utah.**
 - **TBD.**
 - **No issues.** 259,975 acres contain wilderness characteristics (16 areas).
 - Prioritize other uses on 190,545 acres (73%) while not protecting wilderness characteristics based on mining claims with anticipated development and other resource management priorities, mainly multiple vegetation treatments for restoring habitat from pinion/juniper encroachment.
 - 69,430 acres (27%) would be managed to protect wilderness characteristics as a priority over other multiple uses. Protective allocations include VRM class II, ROW exclusion, NSO for leasable minerals, recommended withdrawal for locatable minerals.
- **Lewistown DRMP/DEIS. Montana.**
 - **TBD.**
 - **No issues.** 202,730 acres contain wilderness characteristics.
 - 1) Prioritize other uses on 70,000 acres while not protecting wilderness characteristics. Underlying prescriptions include open to mineral material sales, non-energy leasables, cross-country mechanized travel, fluid minerals with minor constraints (CSU), and livestock; limited to designated routes yearlong; 400 acres of ERMA prescription (potentially); and mostly VRM III.

- 2) 30,000 acres would be managed to minimize impacts to wilderness characteristics while managing for other uses (13,000 acres of ACECs and approximately 15,000-20,000 acres where actions are in place to protect GRSG).
- 3) 100,410 acres (49%) would be managed to protect wilderness characteristics as a priority over other multiple uses.

- **Carlsbad Field Office DRMP/DEIS.** New Mexico.

- **TBD.**
- **Issue:** Discrepancies in acreages for lands with wilderness characteristics was found in DRMP/DEIS and range from 24,072 to 41,772 acres. **Carlsbad FO is revisiting the alternatives.**
- **WSR rationale:** The Delaware River segment was not included in the Preferred Alternative because this area has been identified as an area with high oil/gas development potential. Portions of the Delaware River segment are currently leased for oil and gas development and are surrounded by state lands. Much of the Delaware River segment carries protective allocations associated with the proposed Gypsum Soils ACEC which is included in the

- **Rio Puerco PRMP/FEIS.** New Mexico.

- **TBD.**
- **No issues.** There are seven areas totaling 37,524 acres of wilderness characteristics.
 - 1) Prioritize other uses on 1,663 acres (4%) while not protecting wilderness characteristics.
 - 2) 6,920 acres (18%) would be managed to minimize impacts to wilderness characteristics while managing for other uses. Travel limited to designated routes, closed to leasable minerals, avoid for saleable minerals and ROW, minimizing impacts and requiring use of existing routes for forest product removal, and VRM III.
 - 3) 28,941 acres (77%) would be managed to protect wilderness characteristics as a priority over other multiple uses. Travel would be closed except as authorized, closed to leasable and saleable minerals, no new ROWs, closed to forest product removal, and VRM II.

Hi Nikki, Sally, and Tim (acting), the Monthly Hot Topic Snapshot for the week of May 8 is attached. I am taking leave on Monday so won't be able to go over it with you unless you want to do it later in the week. Otherwise, let me know if you have any feedback or if I should send to Chris.

The WO410 tracking spreadsheet is also attached.

Thanks.

Hi Mike and Peter, certainly I recommended for CDFR 2014. NGA for the Southwestern States PREPARED. WOODS reviewed the RFP and there are no outstanding issues. The planning was the higher tiered lightweight DYNALISC, NGA, and NGA. The WOODS RFP can be found at: <https://www.nga.gov/>

Comment provided for the Federal Highway Institute include the notice also include the RFP available National Task Management Groups for the regions of the National National Heritage Sites, Trail and the Washington-Colorado-Nevada-Nevada National Heritage Sites, Trail, and suggested adding to the notice that there are a page reference.

The NGA/NGA program reviewed and doesn't have comments on the notice package. The NGA/NGA program concurs with the HHS comments. Call to use it as it's based on the NGA program but it should be fine with the language added to the HHS on the stipulations described above. No warranty need the NGA of

Hi Shiva, I was hoping you could provide comment information on the Southwestern States PMRP/FIS. WFO10 has the NDA for the Southwestern States PMRP/FIS in DTS. There are remaining issues that were to be worked out by Eastern States, WFO20, and WFO10 but those discussions have not occurred yet. Should we set something up to discuss or is that something DTS will handle

Your office (WFO-010) has been assigned a task assigned.

Hi Ilana, your name is recommended for DISE 1128 Notice of Proposed Supplementary Rules for Canyon of the Ancients National Monument. The NM/NCA and Wilderness programs reviewed the Notice package and responded with no comment.

The proposed supplementary rules would result in changes to some currently authorized activities related to collecting geological and biological materials, commercial filming and photography, recreational shooting activities, geocaching, climbing, camping in archaeological sites, and travel management.

Comment: Britta Nelson
Niki and Peter, comment is recommended of DTS 101-162 Transmission line Project EIS/ground amendments.

The Wilderness program reviewed with no comments.

The WMA program provided a comment on page 12 of the HR. Instead of stating that the agency preferred alternative in segment C's "smaller" the WMA stated (underline blue), the HR states that the alternative "minimizes impacts" to it. As of the HR's review, findings, and discussion, it had been "smaller".

The updated documents are attached and have been updated into DTS.

Please let me know if there is anything else needed at this point. Thanks.

Hi Folia, I am working on the EIS package for the NCL for St. George/Thomas/Don/Whit/Red/COFF and can't tell from the notice package what the decisions are. Were there changes between the PRMP and approved plan for the NCLs, both with wilderness characteristics, or NMT?

Thanks,

Britta Nelson, M.P.A., Program Analyst

Nov 02 12:45:45 pm

to: Patricia, Heather, me
We can't say with 100% certainty if there's a change between the PRMP and the NCL, since project resolution hasn't concluded and the Governor's Appeal period hasn't ended yet (ends Dec. 15).

That said, Pat, I can you photos for Britta know (and copy me) if the both NCLs as they currently stand contain any changes between the PRMP and NCLs for the NCLs, both with wilderness characteristics, or NMT?

Thanks,

[REDACTED]

to: Patricia, Heather, me

Hi Fariba, we wanted to let you know W450 provided a comment in OTS.

(b)(5) DPP

Comments: In Niles Lake, I surmise a recommended for DYS 1802/1803 for the Proposed Gold Mine Project, White Pine County, NV. For the Nutsin BF, there are no birds with wilderness characteristics or birds of the National Conservation Lands in the project area. I noted this in a comment in DYS.

The Nutsin BF and E2 E2s differ. There are no natural resources, natural conservation areas, or other designated, natural areas or historic sites, and no scenic views, wilderness study areas, wetlands or areas or wetlands with Wilderness characteristics located within the proposed project area. The Basin and Range National Monument, the proposed project area, is located within the Nutsin BF. The surrounding far wilderness is not located within the proposed project area in either the Nutsin BF, Basin Monument, Forest Reserve, and the Nutsin BF. Wilderness study areas are not located within the proposed project area.

The National Conservation Area is attached. Please see the below additional information is needed

Bailey, Cathi
Nov 29 (13 days ago)

no one, Nikki

I don't quite remember the specifics of our request for the FRN so I provide the following as a quick response:

The Proposed RMP/Final EIS considered five rivers to be eligible for potential designation as Wild and Scenic Rivers, but the RDOs do not determine them to be suitable for designation as Wild and Scenic Rivers, instead protecting them through other means.

Cell: D26

Comment: Britta Nelson:

With all records show that under the proposed plan, a NCL stipulation would be applied to the suitable W&B segments along the Colorado and Green Rivers (25,347 acres), and the Montezuma W&B Segment 3 along the Colorado River which is closed to mineral leasing (752 acres). Have there been changes for W&B data?

to Patrick, me, Ryan, Sally, NMS, CSM

My understanding is that no changes will be made between the Montezuma W&B/PMOP documents and the NCL/Approved RMP documents related to some of W&B and areas closed to mineral leasing. Pat, please correct me if I'm wrong.

to Brent, Emily, me, Ryan, Sally, NMS, CSM
Correct, there are no changes to acreages between proposed and approved.

Hi Britta, The short answer to your follow-up question is "no". We are currently drafting alternatives for our RMP revision, in which we will make those decisions on (DNC), but decisions on (DNC) have not been made for this area at this point because our RMP is still (DNC) for the area of the Andeer Road project(s).

To: "Nelson, RICH" <richn@blm.gov>
Cc: "Thompson, Lucian" <clucan@blm.gov>, Peter Wink <pwink@blm.gov>, Robert Wick <rwick@blm.gov>, NINA Moore <nmoore@blm.gov>, Judy Barry <jbarry@blm.gov>

Hi RICH, The short answer to your followup question is "no". We are currently drafting alternatives for our RMP revision, in which we will make those decisions on (NCA), but decisions on (NCA) have not been made for this area at this point because our RMP is still (NCA) for the area of the Andeer Road project.

To: Lucian Thompson <clucan@blm.gov>, Robert Wick <rwick@blm.gov>, Peter Wink <pwink@blm.gov>

Hi Tim, WD-413 received the NOI to prepare an EIS on the Andeer Mining District Industrial Access Project for scumme and has some follow-up questions. I am reaching out to you because your name is listed as the point of contact for the project in the DIRM system.

The Andeer NOI-BP (attached) indicates that wilderness characteristics are a key issue. Can more information be provided about this including if the wilderness characteristics inventory is current, if the current RMP addresses lands with wilderness characteristics, and if the project is consistent with the plan?

Also are there National Conservation lands units such as wild and scenic rivers or WAs in the project area?

Please let me know if we need to discuss.

Thanks,

Rich Nelson, M.F.A., Program Analyst

Call: 514

Comment: Britta Nelson.

Summary Recommended: OIS-4100 Notice of Availability of Final Environmental Impact Statement and Notice of Decision for Proposed Land Exchange between the Bureau of Land Management and Agua Caliente Band of Calalu Indians
Title:
x

Arthur, Britta (britta@nps.gov)
Recommended on 2/15/17 by
x

As they are new, we are recommending that the OIS be for the OIS of the Proposed Land Exchange with the Agua Caliente Band of Calalu Indians within the Santa Rosa and San Jacinto Mountains National Monument. No other have been made to the notice package (attached). With this action, the BLM or agencies, and facilitate more efficient land management.

Tim reviewed the package and found the following:

- 1) The land exchange moves BLM lands to the Agua Caliente Band of Calalu Indians within their reservation boundary that is also within the SLMNM boundaries. The land exchange provides key reservation lands outside the reservation boundary but within the monument boundary to the BLM providing a larger core.
- 2) The current BLM lands being exchanged are isolated and the only way to gain access is through reservation lands and Agua Caliente permission. The exchange will allow more consistent jurisdiction of the lands by the Agua Caliente, but do not change how the lands will be managed in the future. These lands are
- 3) The new BLM acquired lands will provide a larger tract of land considered as lands having wilderness character of within the monument. These lands will also have a more consistent recreation use and improves management of these lands as identified in the SLMNM LUP.
- 4) These new acquired lands will present any potential development within the monument boundary. There is a currently a road connecting these lands but no right of way.
- 5) The Monument Manager nor the FD see any negative long term impacts from this Land Exchange.

In addition Doug Herrera indicated that such an exchange was mentioned in the legislation that created Santa Rosa & San Jacinto Mountains National Monument in 2000.

Please let me know if additional information is needed.

Hi all,

The Exchange Decision package was approved on October 18, 2016. Since this is an EIS land exchange, an additional review for submission of the NINA into the NINA is required. The NINA/NEO package has been submitted into DTE and is currently being reviewed by WFO. Estimated date of publication is unknown.

The NINA/NEO package will be submitted into DTE and local managers will initiate a 45-day protest period. After the protest period and absent any protests, the NINA/NEO would be completed.

Thank you to report this week.

NOTE: Please let me know if there is anyone that needs to be included or removed from the list of people receiving these reports. Thanks!

WFO NINA Review Process:

Below is a list of all offices, as identified in DTE, for review of the NINA/NEO (offices that have completed their review/timeline are marked with X).

WFO-400 Regulatory Affairs (Completed 1/10/2017)
WFO-410 Land Tenure (Completed 1/10/2017)
WFO-420 NEPA Review (Pending)
WFO-430 Regulatory Affairs
WFO-440 Salt Lake Valley (State)
WFO-450 Regulatory Affairs
WFO-460 Public Affairs

WFO-400 Communications

WFO-410 BLM Director's Office
WFO-420 Regulatory Affairs
DOO Assistant Secretary's Office/Nebraska
DOO Regulatory Affairs
WFO-430 Regulatory Affairs

Next Steps:

- * NINA/NEO published (45 protest period begins)
- * Final NEPA, EIS, and DTE
- * Final EIS/NEPA completed
- * Final NEPA signed (45 protest period)

Approved Values and Equivalency: Date of Value 1/10/2017

Non-Federal Lands: \$445,000

Federal Lands: \$745,000

Cost Equivalent to be paid by BLM (NEPA Funding): \$24,000

Current Price for the Lands:

* Non-Federal: Coordinate with DCA/DOO on NINA/NEO Package

Exchange Overview:

- This exchange involves disposing of 1,540 acres of Federal land to the Agua Caliente Band of Cahuilla Indians in exchange of 1,471.39 acres of non-Federal lands.
- All of the lands involved in the exchange are located within the Santa Rosa and San Jacinto Mountains National Monument, Southern California Desert District.
- The Agua Caliente tribal number is CA-62602P(0).

Exchange Decision Phase Accomplishments:

- Final Finding Draft EIS (completed Mar 2016)
- EIS Review Draft EIS (completed April 2016)
- Final Finding Draft EIS/NEPA for 60 review (completed April 2016)

EXCHANGE OF DECISIONS AND FINDINGS

to: Sally, Peter, Timothy

Hi Sally and Peter, Britta is recommending of USFS LARS Notice for the USFS of the Proposed Land Exchange with the Agua Caliente Band of Cahuilla Indians within the Santa Rosa and San Jacinto Mountains National Monument. No edits have been made to the notice package (attached). With this action, the BLM is negotiating, and building new efficient land management.

[REDACTED]

4) The current BLM lands being exchanged are not owned and are only used for recreation through recreation lands and agricultural lands of the monument. The exchange will allow more consistent protection of the lands by the Agua Caliente Band, but do not change the land use or the management of the lands. The exchange will allow more consistent protection of the lands by the Agua Caliente Band, but do not change the land use or the management of the lands.

5) The new BLM acquired lands will provide a larger tract of land considered as lands having wilderness character of within the monument. These lands will also have a more consistent recreation use and improve management of these lands as identified in the USFS LARS.

6) These new acquired lands will provide potential development within the monument boundary. There is currently a road transecting these lands but no right of way.

7) The Monument Manager can use the USFS to any negative long term impacts from this Land Exchange.

In addition Doug Herrera indicated that such an exchange was mentioned in the legislation that created Santa Rosa & San Jacinto Mountains National Monument in 2000.

Please let me know if additional information is needed.

Britta

Review of the Land Exchange and possible concerns:

1) The land exchange moves BLM lands to the Agua Caliente Band of Cahuilla Indians within their reservation boundary that is also within the USFS LARS boundary. The land exchange provides key recreation lands outside the reservation boundary but within the monument boundary to the BLM providing a larger can.

2) The current BLM lands being exchanged are not owned and are only used for recreation through recreation lands and agricultural lands of the monument. The exchange will allow more consistent protection of the lands by the Agua Caliente, but do not change how the lands will be managed in the future. These lands are

3) The new BLM acquired lands will provide a larger tract of land considered as lands having wilderness character of within the monument. These lands will also have a more consistent recreation use and improve management of these lands as identified in the USFS LARS.

4) These new acquired lands will provide potential development within the monument boundary. There is currently a road transecting these lands but no right of way.

5) The Monument Manager can use the USFS to any negative long term impacts from this Land Exchange.

Hi Doug,

[REDACTED] We should be able to complete tomorrow's report.

Britta or Tim, anything else I missed?

Sally

Hi Britta and Sally!

I hope this finds you both doing well. Just noticed that this land exchange is in RUS, so I thought I'd reach out and ask if you had any questions about it or if there's anything holding it up. It's an exchange between BLM and the Agua Caliente Band of Cahuilla Indians right here in Palm Springs.

I'm also cc'ing Ashley, our SB&B&M monument manager, and Louise, our project manager.

Thanks!

Best,

Doug

Douglas L. Herrera, L.D.

Subject: Check in on Southeastern States PRMP/SES
To: Ryan Hathaway <rhathaway@blm.gov>
Cc: Nikki Moore <nmoore@blm.gov>

Hi Ryan, I hope you are well. WDM 10 has the NDA for the Southeastern States PMRP/VES in OYS. There are remaining issues that were to be worked out by Eastern States, WQ210, and WDM 93 but those discussions have not occurred yet. Should we set something up to discuss or is that something 210 will coordinate?

Review Kick-off Briefing held on 10-13-14

Cell: 02

Comment: Britta Nelson:

Nelson, Britta <bnelson@lin.govt>
12:21 PM (10 minutes ago)

is NIMK included in the meeting with Eastern States? Since the ONK is a National Conservation Lands unit, NIMK should be included in discussions on: the ACEC overlap

Thanks,

Britta Nelson

Hello Britta,

WO comments were addressed and Pre-brief was done. So, AD briefing took place. There were some issues regarding overlapping designations between recreation and ASCC. Additionally making sure that the purpose and need statement captures the spirit and content is also essential. I think Eastern States is working internally to make sure that the purpose and need statement captures the spirit and content is also essential. I think Eastern States is working internally to make sure that the purpose and need statement captures the spirit and content is also essential.

☐ I will keep you updated.

Hi Ryan, I hope you are well. WQD 93 has the NDA for the Southeastern States PMP/FDS in Q15. There are remaining issues that were to be worked out by Eastern States, WQ2 10, and WQD 93 but those discussions have not occurred yet. Should we set something up to discuss or is that something 210 will coordinate?

Thanks,

Britta Nelson

National Conservation Lands, a WO admin review of the GSENM DRMP-AODG is scheduled for January 30 through February 20 with a kick-off briefing scheduled for January 31. After receiving the review files from WO210 I will share them along with a WO432 comment form on google drive. WO112 commented previously. Allison and Rob, can you provide answers to each of the following questions from your review of the GSENM DRMP-AODG to help guide WO432's review?

General

Are all National Conservation Lands units and other related areas that are located within the planning area identified and the management addressed in the BWP alternatives? If not, is there a stand-alone plan for that unit?

Are mitigation standards identified for future land use activities that impact National Conservation Lands units and other related special areas?

Are appropriate land use allocations and/or management actions identified in the BWP that limit or exclude land use activities that are incompatible with the management of National Conservation Lands units and other related special areas?

Has the State Director been briefed on BWP alternatives and decisions regarding National Conservation Lands, lands with wilderness characteristics, eligible and suitable (pre-designated) Wild and Scenic River segments, and trails under study or recommended as suitable for designation?

[illegible]

Does the plan include objectives and associated management actions, allowable uses, and restrictions to safeguard the nature and purposes of the trail?

Does the RMP include any unique issues (e.g., associated settlement agreement) or background (e.g., anomalies included in a National Monument proclamation) that affect the alternatives? Summarize how the unique issues or background affect the alternatives.

Please let me know if you would like to discuss. Thanks, Britta

WO Review Kick-off Briefing: GSENM Grazing DMPP Amendment

The WO admin review period for the Grand Staircase-Escalante National Monument (GSENM) Grazing Draft EIS Amendment (DMPPA) will run from January 10–February 20, 2017. To help inform your WO admin review, please attend this briefing for an overview of the GSENM Grazing DMPPA. I will send the DMPPA and presenters

Please let me know if you have any questions.

Tue Jan 31, 2017 8am - 10am Mountain Time

Allison and Rob, can you provide answers to each of the following questions from your review of the Cedar City DBMP/LEIS to help guide WQ410's review?

Are all National Conservation Lands units and other related areas that are located within the planning area identified and the management addressed in the RMP alternatives? If not, is there a stand-alone plan for that unit?

Are migration standards identified for future land use activities that impact National Conservation Lands units and other related special areas?

Are appropriate land use allocations and/or management actions identified in the RMP that limit or exclude land use activities that are incompatible with the management of National Conservation Lands units and other related special areas?

Has the State Director been briefed on RMP alternatives and decisions regarding National Conservation Lands, lands with wilderness characteristics, eligible and suitable (pre-designation) Wild and Scenic River segments, and trails under study or recommended as suitable for designation?

[illegible]

Does the plan include objectives and associated management actions, allowable uses, and restrictions to safeguard the nature and purposes of the trail?

Review task off-briefing Initial 10-16-18

Call 183
Comment: **Initial Review**
Initial Conversation Log, a WFO memo from the GSINP DRMP ADEE is scheduled for January 16 through February 20 with a kick-off briefing scheduled for January 11. After reviewing the review form, WCC2021 will share them with you. WCC2021 content form on page four, WCC21 content provided already. Also for ADEE, you can provide answers to all of the following questions from your review of the GSINP DRMP ADEE to help guide WCC21 review?

General
Are all Operational Conversation Logs with and other related ones that are included after the meeting are identified and the management addressed in the RMP? Alternatively, if not, is there a good cause plan for that one?
An integration paragraph identified for future and any activities that impact National Conversation Logs with and other related special issues?
Are separate final use allocations and/or management decisions identified in the RMP? And/or are separate final use activities that are incompatible with the management of National Conversation Logs with and other related special issues?

[REDACTED]

DEU to DEU and planning activities
How are the planning activities and management decisions prepared and reported if the planning is a preparation or not in long-term commitment for the future?
Are the policy priorities or WFO in the ADEE identified as a management or business case?

Links with wilderness characteristics
Does the DEU have a complete, updated inventory of study with wilderness characteristics?
Is the inventory report available or is it updated?
Are decisions made for all study with wilderness characteristics within the planning area?
Are the planning activities and management decisions made for all study with wilderness characteristics and the planning area?
Is a table included that lists the management decisions, such as found to have wilderness characteristics, and the percentages of lands that fall within each of the categories identified in BLM Manual 1-22, which include: 1) protection of study with wilderness characteristics as priority over other uses, 2) managing other uses within the study with wilderness characteristics, and/or 3) other uses that are not compatible with the management of study with wilderness characteristics?

DEU and Land Use
Do the DEU complete the eligibility determination and current policy requirements 3414000?
Do the DEU complete the eligibility determination and determination for eligibility to receive any benefits and others from WCC2021?
Do the wilderness characteristics decisions made for all study with wilderness characteristics in the planning area?
Is the DEU Study Report included as an Appendix A and is consistent with current policy?
Are the planning activities and management decisions made for all study with wilderness characteristics and the planning area?
Are the planning activities and management decisions made for all study with wilderness characteristics and the planning area?
Are the planning activities and management decisions made for all study with wilderness characteristics and the planning area?

National Conversation Log and Wilderness Data
Is the National Conversation Log and wilderness data included in the review?
Does the plan include objectives and associated management actions, decisions, and, and restrictions to safeguard the land and resources of the DEU?

Other RMP Issues
Does the RMP include any unique issues (e.g., associated wilderness area) or background (e.g., associated wilderness area) that the management is a National Management presentation that the management? How does the plan include objectives and associated management actions, decisions, and, and restrictions to safeguard the land and resources of the DEU?

Please let me know if you would like to discuss. Thanks, Britt

Annex A
WFO Review Kick-off Briefing GSINP DRMP ADEE Amendment
The WFO Review memo period for the GSINP DRMP ADEE is scheduled for January 16 through February 20 with a kick-off briefing scheduled for January 11. After reviewing the review form, WCC2021 will share them with you. WCC2021 content provided already. Also for ADEE, you can provide answers to all of the following questions from your review of the GSINP DRMP ADEE to help guide WCC21 review?

[illegible]

Thank you, Sally. I'm sharing your clarification with the Monument staff.

Nathan, 3:05pm 4/16/2017

To: Timothy, Sally

Looking like it is on the latest in GSDM's "translations" language since our discussion on this yesterday. Sorry again for not copying Tim on my original note to Ryan.

Buffy, Sally

Apr 14 (7 days ago)

OK, let me know if you need anything.

Buffy, Sally

Apr 14 (7 days ago)

To: Ryan, Andrew, Matthew, Cynthia, me, Nikki, Ryan, Timothy

Thanks, Ryan. Just noticed that I used "language" in the closing of my email. I meant "transmission." Sorry about that...must be time for the weekend!

Have a good one, Sally

Nathan, Cynthia

Apr 14 (7 days ago)

To: Sally, Ryan, Andrew, Matthew, me, Nikki, Ryan, Timothy

All:

We would like to propose language for the Drafting Paper and section 3.6.1 of the EIS that would easily clarify the issue. This involves changing the words "translation" to "transmission with". Throughout the document, including the Program and Found section 3.6.1 and section 3.6.2 we use the w

The statement in the BP and 3.6.1 would read:

Given that the Proclamation provides the BLM with the discretion to coordinate landward grazing consistent with managing objects identified in the Proclamation, Alternative C provides a balance of landward grazing that recognizes the importance of working to the local custom and culture with managers

Let me know if this will work with everyone.

Thanks!

To: Eric Johnson <erjohn@bin.gov>, Kelly Crawford <kcrawford@bin.gov>
Cc: Leah Quenberry <lquenberry@bin.gov>

Kelly and I, I rearranged and edited the response to NMA's question on the EIS comments document. I don't know if this helps anyone understand our response, but I just felt the need to do it after the briefing today. I haven't sent it to Andrew or NMA.

2. We would like to better understand how over 50% of the soil can be damaged by wildfire and at a level to reduce the breeding habitat for sage grouse by 50%, but grazing is only being reduced by a few hundred AUMs. We would like to see stronger rationale on how we can "lose and still not be losing?"

Regarding this, this does not imply of "increasing wildlife response time" and "success rates of restoration efforts." These were goals in the original 2007 Plan and the National Fire Health Plan, and these are still in effect. But they are outside the scope of this currently focused plan amendment. Restoration efforts are usually more AUMs, reduction in livestock grazing is required to free it not closed our planning tool decision. Grazing management after a fire is a site-specific decision, and is not appropriate for a landscape scale LUP decision. This work is done under the guidelines of Emergency Stabilization and Restoration Plans and is outside the grazing strategy required after the stabilization work and is not allowed on a burned area until desirable grasses and/or forbs have been re-established, typically two or more growing seasons. To date, previously burned areas have been seeded if the native plant community was not able to recover naturally. Once livestock is not White effects of the plant communities of the Monument do both saplings, livestock grazing is not the causal factor for this. Removing livestock would not have the effect of restoring saplings. Please see the discussion on Vegetation Condition in Chapter 3 of the EIS.

Planning efforts are always contingent on available funding. There is never any guarantee of funding, but there is an understanding there will be significant effort to implement any plan the BLM selects and publishes.

Hope I'm inaccurate on any of this.
Thanks,
Eric

Comments

Nelson, Brett Chiswick@blm.gov

Apr 27/18 4:46 AM

To Timothy

I dug through the attachments and don't see a direct relationship between fire and brush (per Kelly's question). But there are a few places where an association is described:

Ch. 3 Special Forest Systems, p. 133-134

Recent fire has killed or injured approximately 60,000 acres of the Monument, including areas

identified as providing suitable components of seasonal upgraze habitat. Adjustments to habitat delineations as a consequence of these fires has not been completed. Adjustments to habitat delineations were not completed because BLM had the site visit data assessments to substantiate changes in herbaceous components.

Wildfire has resulted in a loss of upgraze cover, and is largely responsible for habitat not meeting the seasonal requirements for upgraze in many areas of the monument. Specifically, the areas identified as suitable for browsing habitat in the Monument, 75.0% of the sites were found to be unsuitable only because upgraze cover was lacking, and a lack of upgraze was a contributing factor in an

within the Monument identified as unsuitable for browsing habitat, 1.0% of the sites were only due to low herbaceous cover, and a lack of herbaceous cover was a

contributing factor in 17% of unsuitable sites, including the aforementioned 75%.

Land Use Planning, "Review Antiquities Order"

1.25, p. 285-286. Future changes to brushback grazing in the Monument are likely, as both the BLM's and operator's management shift over time, based on resource considerations and business needs. Some reasonably foreseeable scenarios that may change brushback grazing for the question are changes in permitted use, c

temperatures and wet springs, or changes that may need to occur due to monitoring and data collection.

Within the Monument, vegetation communities are influenced by brushback grazing management, wildfire, rehabilitation efforts, fuel load projects, and climate. All contribute to other vegetation communities indirectly affect brushback grazing. These influences all interact to affect changes in the vegetation communities, and thus the longer term for brushback grazing.

Appendix C, Idaho and Southwestern Monuments Greater Sage-Grouse Approved Resource Management Plan Attachment Attachment – Chapter 2, and Regional Design Features p. 353

Revised is an excerpt from Chapter 2 of Attachment 1 of the Idaho and Southwestern Monuments

AGM for reference purposes. The guidance in this document is consistent with the Idaho National Monument Final Plan Amendment attachment.

For

vegetation and successful establishment of seeded species within brushback areas, all new seedlings of grasses and forbs should not be planted until at least the end of the second growing season, and longer as needed to allow the species to mature and develop robust root systems which will stabilize the site, compete effectively against rhizomatous and other invasive species, and remain sustainable under long term grazing management. Adjust other management activities, as appropriate, to meet ESQ objectives.

NO FWS 3.1. Adjust, as appropriate, brushback management on adjacent unburned areas to mitigate the effect of the burn on fuel loading operations.

NO FWS 3.4. Following seedling establishment, modify grazing management practices if needed to achieve long-term vegetation and habitat objectives.

NO 1.6. Monitor existing areas designated as suitable or unsuitable for brushback grazing during active periods for brushback grazing within the growing year of use for changes in the seed load. Through the number of acres available on an adjustment may be adjusted based on the specific conditions to meet management objectives during the growing season, including development, or other appropriate management practices, including, temporary

Revised final draft ROD for the Transborder Transmission Project and the WMA package sent for review by Sharon Knowlton on 05-18-16. Comments requested by CDB, 5-24-16. National Trails comments on ROD provided on 05-24-16. 05-26-17. Followed up on the Mitigation and Monitoring appendix which is missing details on projects. It will most likely contain several options including the purchase of riparianly designated wilderness. The WMA has drafted a plan and is now waiting our Director's approval. Once made, it can be shared internally with the larger BLM group.

Hi Molly, Maely, and Terry - I hope you are all well and have had a great week. I wanted to check in with you on the Verde Transmission project BWP amendments/CDS. I am hoping you can keep me updated on the progress of this project and let me know if support is needed from WMA in the draft, is being prep.

Our records show the following project issues:

- 1) The project area includes eligible and suitable WMA resources including additional segments of the Rio Grande. The proposed route crosses the Rio Grande River. Section 7 of the WMA and Sonoran Desert Act requires looking at "Tie-in" projects that are upstream, downstream or on a tributary of a designated river. Based on the project would cross two National Historical Trails (the Camino Real on Terra Antiqua & Old Spanish NHT). The project needs to be considered per BLM NAC200.
- 2) There are no lands with wilderness characteristics per existing inventories. Inventories may have been conducted as part of the BLM's, Tucson Field Office BWP Amendment of 2012. Additional inventories may need to be conducted to prepare a complete and defensible CDS for this project.

Additional project information follows:

Subject: Here are the Transborder Project draft RMP, NDA, and NDA package for review. I am also

Malia, everyone this is the first of a series providing the draft package described above. We are pleased to provide the revised final draft RMP for the Transborder Transmission Project and the NDA package for review. The body of the RMP is attached, along with the Mitigation and Monitoring appendices, which is a
part, Appendix 1: Mitigation and Monitoring with the exception required above, Appendix 2: Response to Governor's consistency and F&C comments, Appendix 3: Alternatives Eliminated from further analysis and Appendix 4: NPS requirements for access to Donkey Road. Appendix 5 is the Plan of Development and
All comments received on the draft RMP and NDA must thus far have been submitted except those noted here or call highlighted in the document. For those who have previously reviewed documents, please verify we've adequately addressed your comments. The purpose of this review is to identify show stopping

Our Wyoming External Affairs Office will be working directly with other states and the W&M to finalize the NDA package.

We anticipate finalizing the greater sage grouse and migratory bird mitigation after the technical advisory group completes its task in the first half of June. We'll add that mitigation then. When W&M provides the lands with wilderness characteristics details for inclusion in the mitigation and monitoring appendices,

In order to maximize our efficiency and allow for robust review and comment we are providing this package out now for final review and comment. Still pending completion are the final RCD and the PA. Please respond with any suggested revisions by close of business May 24th, 2016. Subsequent emails will contain a courtesy copy of the TWE Plan of Development in 2 parts due to size limitations.

Regards,
Sharon

Revised final draft RCD for the TransWest Transmission Project and the NHP package are for review by Sharon Knowlton on 05-18-16. Comments requested by 05-24-16. National Trails comments on RCD provided on 05-04-16. 05-24-17. Follow-up on the Mitigation and Monitoring appenda which is missing details on project. I will meet today to review current options including the purchase of land to provide riparian habitat. The NHP has drafted a plan and is now waiting for Director's approval. Once ready, it can be shared internally with the larger BLM group.

a Review conducted from the Wilderness Society
a WOLF provided feedback on draft final RCD, NHP, and NHP package (05-24-16)
a WOLF drafted compensatory mitigation language. The issue was resolved and WOLF agreed to the mitigation language which was not about boundary mitigation and not about mitigation. The compensatory mitigation package language, as modified by WOLF, was incorporated into an addendum to the RCD on 05-24-16.

Hi Molly, Molly, and Terry - I hope you are all well and have had a great week. I wanted to check in with you on the Verde Transmission project NHP amendment/OS. I am hoping you can keep me updated on the progress of this project and let me know if support is needed from WOLF as the draft is being prep.

Our records show the following project issues:
1) The project area includes eligible and suitable WOLF resources including additional segments of the Rio Grande. The proposed route crosses the Rio Grande near Section 7 of the WMA and because WMA's Act requires looking at "historic" projects that are upstream, downstream or on a tributary of a designated river. Based

2) The project would cross two National Historical Trails (the Camino Real de Tierra Adentro & Old Spanish NHT). The project needs to be consistent per BLM NHP200.

Characteristics per existing inventories. Inventories may have been conducted as part of the BLM's Trans West Office NHP Amendment of 2013. Additional inventories may need to be conducted to prepare a complete and defensible OS for the project.

Additional project information follows:

Hi Molly, Mike, and Terry - I hope you are all well and have had a great week. I wanted to check in with you on the Verde Transmission project NEPA amendment/EIS. I am hoping you can keep me updated on the progress of this project and let me know if support is needed from WCAID as the draft is being prep.

Our records show the following project issues:

1) The project area includes eligible and suitable WMA streams including additional segments of the Rio Grande. The proposed route crosses the Rio Grande River. Section 7 of the WMA and Sonoran Desert Act requires looking at "increment" projects that are upstream, downstream or on a tributary of a designated river. Based on the project area, the project would cross two National Historical Trails (the Camino Real on Tierra Adentro & Old Spanish NHTs). The project needs to be considered per BLM 16C203.

2) There are no lands with wilderness characteristics per existing inventories. Inventories may have been conducted as part of the BLM's Two-Step Draft EIS/NEPA Amendment of 2012. Additional inventories may need to be conducted to prepare a complete and defensible EIS for this project.

Britta,
At this time, I'm not sure what our plans are relative to a NEPA review of the draft EIS. I'll consult with our local management team here in New Mexico and our NEPA Coordinator and get back to you on that question.

RE: 12-17,
Mazur, Mike

To: Tansara, Stephen, Sally, Deborah, Christopher, Georganna, me

Re: Mazur, Mike - thank you for sending us the BCD-RD for a quick review. We did notice that the RD language used for other transmission projects appears to be missing. To meet policy requirements, we recommend the following language be added to the National Conservation Lands (NCL) section on

To meet the policy and purposes of the National Trails System Act (NTSIA Sec. 100), to prevent a project which will not substantially interfere with the nature and purposes of the trail (NTSIA Sec. 7)(1), and to safeguard the nature and purposes of the National Scenic and Historic Trails (NSHT), BLM MS-4388 1.A.A.1.a.1),

Analysis and consultation measures to mitigate impacts to National Trails System components, including the Oregon National Historic Trail (Oregon NHT), will be applied for the duration of the impacts from the Project. For residual (i.e., unavoidable) effects to the values and settings of the Oregon NHT, that were

National Trails System components, and will be required to be applied for the duration of the impacts. Mitigation measures will be feasible, additional, timely, consistent, adaptive, integrated, and repeated upon.

The terms and conditions within the permit will include all identified NHT-related avoidance, minimization, and compensatory mitigation measures, which may include, but are not limited to, proposed mitigation measures (e.g., design features), including the associated monitoring, adaptive management, and reporting requirements.

Please let me know if you have any questions!

To Teresa, Kersch, Julie, Deborah, Christopher, Christopher, etc
Teresa, Julie, and Deborah - thank you for sending us the BHP IS for a quick review. We did notice that the BHP language used for other transmission projects appears to be missing. To meet policy requirements, we recommend the following language be added to the National Conservation Lands (NCL) section on:

To meet the policy and purpose of the National Trails System Act (NTSA) (16 U.S.C. 1601), to permit a project which will not substantially interfere with the nature and purpose of the trail (NTSA Sec. 7(c)), and to safeguard the nature and purpose of the National System and Historic Trails (NHS) (BLM MS-8888 (A.A. 3.3)).

Avoidance and minimization measures to mitigate impacts to National Trails System components, including the Oregon National Historic Trail (ONHT), will be applied for the duration of the impacts from the Project. For avoided (i.e., unavoidable) effects to the values and settings of the Oregon NHS, that show National Trails System components, and will be required to be applied for the duration of the impacts. All mitigation measures will be feasible, additional, timely, monitored, adaptively managed, and reported upon.

The terms and conditions within the permit will include all identified NHS-related avoidance, minimization, and compensatory mitigation measures, which may include appropriate proposed mitigation measures (e.g., design, structure), including the associated monitoring, adaptive management, and reporting requirement.

Please let me know if you have any questions!

Britta,

At this time, I'm not sure what our plans are relative to the draft DLS. I'll consult with our local management team here in New Mexico and our WSDLS Coordinator and get back to you on that question.

Hi Adrián, thanks for the note. I will make sure and include you on communications on the Verde project. Thanks for keeping me updated and letting me know what WSDLS support might be needed as you move forward. I do have a question - I saw this project is identified on the priority project transmission d

Thanks,

Our records show the following project items:

1) The project area includes eight and a half WSDLS streams including additional segments of the Rio Grande. The proposed route crosses the Rio Grande near Section 7 of the WSD and some of the project area requires looking at "Technical" projects that are upstream, downstream or on a tributary of a designated river. Based

2) The project would cross two National Historical Trails (the Camino Real de Tierra Adentro & Old Spanish NHT). The project needs to be considered per BLM NHTS.

3) There are no lands with wilderness characteristics per existing inventories. Inventories may have been conducted as part of the BLM's Tenth Office RMP Amendment of 2012. Additional inventories may need to be conducted to prepare a complete and defensible DLS for this project.

Additional project information follows.

Thanks.

Hi Molly, Mike, and Terry - I hope you are all well and have had a great week. I wanted to check in with you on the Verde Transmission project BMP amendments/EIS. I am hoping you can keep me updated on the progress of this project and let me know if support is needed from WOTC as the draft is being prep-

Our records show the following project issues:

1) The project area includes eligible and suitable WOTC streams including additional segments of the Rio Grande. The proposed route crosses the Rio Grande near Section 7 of the WOT and some. Works and requires looking at "incident" projects that are upstream, downstream or on a tributary of a designated river. Based

2) The project would cross two National Historical Trails (the Carolina Red to Turner Adams) & Old Spanish NHT's). The project needs to be considered per BLM 16C260.

3) There are no lands with wilderness characteristics per existing inventories. Inventories may have been conducted as part of the BLM's Tussock Office's RMP Amendment of 2012. Additional inventories may need to be conducted to prepare a complete and defensible GIS for this project.

Additional project information follows.

[REDACTED] Energy Corridor Region 1 draft review report

Nelson, Britta <brittan@blm.gov>
Mon 2 (4 days ago)

To Kelly, Peter
Hi Kelly and Peter, I met with Gregorin Smith and Michael O'Brien this morning about the WFO review of the Section 108 Energy Corridor Region 1 draft review report. The report focuses on review of energy corridors in southern California, southern Nevada, and western Arizona.
WFO review of the draft report is scheduled for March 14-16. A review kick-off meeting is planned for March 15. The review will be a continuous 10/10/10 review. Information has been gathered from the 10/10/10, other agencies, stakeholders, and others for the report. The draft review report includes a summary of public comment on policy issues and if the decisions or recommendations in the draft review report are supported. The 10/10/10 with the review package will follow the review.
As a reference, here is a press release about the Section 108 Energy Corridor Regional Review: https://www.blm.gov/wh/press/pressroom/2018/section108_08_08_2018.html
I'll send out a heads up to the program as it starts.

To: Kelly, Peter
Hi Kelly and Peter, I met with Georgetown Lewis and Michael earlier this morning about the WFO review of the Section 106 Energy Corridor Region 1 draft review report. The report focuses on reviews of energy corridors in southern California, southern Nevada, and western Arizona.

WFO review of the draft report is scheduled for March 14-16. A review kick-off webinar is planned for March 15. The review will be a synchronous 10/100 review. Information has been gathered from the USFWS, other agencies, stakeholders, and others for the report. The draft review report includes a summary of public comment on policy issues and if the decisions or recommendations in the draft review report are requested. The 10/100 with the review package will follow the review.

As a reference, here is a press release about the Section 106 Energy Corridor Regional Review: <https://www.blm.gov/whys/press/2018/09/20/2018-09-20-2018-09-20>

I'll send and is a heads up to the programs if that works.

no Sally, Peter, Timothy, Robert, Cathi, Deborah.

National Conservation Lands Programs, another couple updates on the Section 308 Energy Corridor Region 1 Recommendations Report follow. First, the 308 Corridor Team has indicated we can expect to see the draft report for review on March 27.

Next, in response to Bob's question about GIS layers, the corridors and National Conservation Lands units have been mapped on the on the BLM mapper found at: <http://DOI.gov/bdlm/section/bdlm/portal/>, or we can request the GIS layers. If you would like the layers, please let me know and I will follow up.

National Conservation Lands Programs, a quick heads up about the WCEI review of the Section 108 Energy Corridor Region 1 draft review report. The report focuses on review of energy corridors in southern California, southern Nevada, and western Arizona.

WCEI review of the draft report is scheduled for March 14-20. A review kick-off webinar is planned for March 15. The review will be a continuous 10/100 review. Information has been gathered from the 10/100, other agencies, stakeholders, and others for the report. The draft review report includes a summary of public comment on policy issues and if the decisions or recommendations in the draft review report are requested. The 10/100 with the review package will follow the review.

As a reference, here is a press release about the Section 108 Energy Corridor Regional Review: https://www.blm.gov/wh/press/wh/pressroom/2015/section108_2015.html

Subject: Question re 108 items for Section 108 Energy Corridor Region 1 draft review report
To: "Timothy, Robert" <timothy@blm.gov>, Sally <sally@blm.gov>, Emily <emilys@blm.gov>, Peter <peter@blm.gov>

National Conservation Lands Program, a quick heads up about the WOI review of the Section 108 Energy Corridor Region 1 draft review report. The report focuses on review of energy corridors in southern California, southern Nevada, and western Arizona.
WOI review of the draft report is scheduled for March 18-19. A review draft will be submitted to WOI on March 15. The review will be a comprehensive WOI review. Information has been gathered from the WOI/DO, other agencies, stakeholders, and others for the report. The draft review report includes a summary of public comment on the project and a list of recommendations for the draft review report to be completed. The WOI will be the review package and follow the review.
As a reference, here is a page release about the Section 108 Energy Corridor Region Review: http://www.blm.gov/woi/section108/review/2019/section108_2019_0318.html

Please let me know if you have any questions at this point. Thanks.

Comment: Britta Nelson:
I update WDOI on March 18/19 to address questions about the National Trails were addressed in the draft review report (mainly potential for conflict). Clarification was provided that the draft review report was BMP pre-approval concerning criteria from NAC 2012, 2013, 2014. The screening criteria is used to assess the NAC2012 policy. The NAC2012 policy can be used to substantially interfere with the review and proposed of the National Trails. The Trail State and WOI/DO/DO provides existing criteria for categorizing color and water regulations. The NAC2012 does not specifically include National Trails within color and WOI/DO because they are units of the National Conservation Lands.

On Fri, Sep 25, 2020 at 11:29 AM, Nelson, Britta <brittan@blm.gov> wrote:

Hi Molly, Molly, and Terry - I hope you are all well and have had a great week. I wanted to check in with you on the Verde Transmission project BMP amendments/EIS. I am hoping you can keep me updated on the progress of this project and let me know if support is needed from WDOI as the draft is being prep.

Our records show the following project issues:

1) the project area includes eligible and suitable WSRA streams including additional segments of the Rio Grande. The proposed route crosses the Rio Grande River. Section 7 of the WSA and Sonoran Desert Act requires looking at "downstream" projects that are upstream, downstream or on a tributary of a designated river. Based

2) the project would cross two National Historical Trails (the Camino Real de Tierra Adentro & Old Spanish NHT). The project needs to be considered per BLM NAC200.

3) There are no lands with wilderness characteristics per existing inventories. Inventories may have been conducted as part of the BLM's Tenth Forest (TFL) amendment of 2013. Additional inventories may need to be conducted to prepare a complete and defensible EIS for this project.

Section B&E Energy Corridor - Region 1 "Panel 2" Review.

This email forwards for the planned B&E, URS and consulting agency "Panel 2" Review, the attached (BMP) Section B&E Energy Corridor Region 1 Recommendations Report. This non-NEPA corridor resolution recommendation report product is the result of the recent Section B&E Westwide Energy Corridor - Region

Please provide your review comments and suggested revisions within the attached document comment review form by COB Friday, April 18th, 2017. This provides authors (2) week review period.

Identified Region 1 "Panel 2" reviews include:

Region 1 (A, C, D, G, H) B&E Field Office, District Office and State Office program and line management;
Region 1 (B, E, F, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z) B&E Field Office program and line management in cooperation;
B&E M&A, W&A, W&A and W&A-W&A program staff;
Region 1 Consulting Agency program and line management within the B&E, B&E, W&A, W&A and W&A;
The Section B&E Interagency Work Group

You have been assigned to review through a recent calendar event of a planned Region 1 "Panel 2" Review Webinar scheduled for this coming Wednesday, March 29th at 1:00 PM (PT) to 3:00 PM (PT) PT. It will provide an overview of the Draft Region 1 Recommendation Report, address review concerns

It is important note, that the Draft Report is composed of two (2) separate file sets as follows:

Draft Report in Microsoft Word (attached to B&E file) and as received on the Box link below;

Appendix A in Microsoft Word (attached to B&E file) and as received on the Box link below;

Appendix B - Part 1 in a PDF file (B&E file) and as received on the Box link below;

Appendix B - Part 2 in a PDF file (B&E file) and as received on the Box link below;

Revised Corridor Abandonment Review file (to be received on the Box link below).

For Panel 2 reviews who may experience email problems with receiving the large Draft Report attachment, office file sets can be accessed and downloaded using Argonne National Laboratory's Box Site. B&E Project file site at the following link:

20170501-Region_1_Corridor_Recommendations_Report_-_For_Panel_2_Review

Revised Corridor Abandonment Review file (to be received on the Box link below).

https://box.blm.gov/box/20170501-Region_1_Corridor_Recommendations_Report_-_For_Panel_2_Review

To ease your review and comment effort, please first focus your initial attention on Section 2, Section 3 and respective B&E State or URS Corridor Recommendations. If time allows, review Section 1.B which provides background on the 2009 Inc. B&E F&O and R&O, subsequent lawsuit / settlement agreement

(After you've had a chance to familiarize yourself with the Draft Report, I believe you'll see the very comprehensive and high quality product that Argonne and the Region 1 Core Team has developed that is intended for use by Region 1 B&E / URS land use planners in the future. We look forward to the re

505.236.0529

National Conservation Lands Program, a few updates on the Section 308 Corridor review.

A meeting for the review of the Section 308 Energy Corridor Region 1 Recommendations Report is scheduled for March 20.

A three week review of the Draft Report by NM-FWS/OTM/State Management, WOTAP/Program Lands and Corridor/Federal Agency lands/Region is planned for March 20th through April 24th.

Following up on Kelly's question, we have been able to link up some data for the GIS layers of the corridors.

Please let me know if you have any questions. Thanks.

Krista

On Fri, Sep 30, 2016 at 11:09 AM, Britta Nelson <bnelson@blm.gov> wrote:

Hi Mallye, Julie, and Terry - I hope you are all well and have had a great week. I wanted to check in with you on the Verde Transmission project RMP Amendment/EIS. I am hoping you can keep me updated on the progress of this project and let me know if support is needed from WSD as the draft is being prep.

Our records show the following project issues:
1) the project area includes eligible and suitable WFS streams including additional segments of the Rio Grande. The proposed route crosses the Rio Grande River. Section 7 of the WSA and Section 9 of the Act requires looking at "increment" projects that are upstream, downstream or on a tributary of a designated river. Based
2) The project would cross two National Historical Trails (the Camino Real de Tierra Adentro & Old Spanish NHT). The project needs to be considered per BLM 160205.
3) There are no lands with wilderness characteristics per existing inventories. Inventory may have been conducted as part of the BLM's Tenth Census of RMP Amendment of 2012. Additional inventory may need to be conducted to prepare a complete and defensible GIS for this project.

Additional project information follows.

Thanks,

Britta Nelson
Management and Program Analyst

Journal of Case Management

202.226.0539

On Mon, Mar 27, 2017 at 1:37 PM, Gazewood, James [Jim] <jgazewoo@tln.gov> wrote:

This email forwards for the planned BLM, USFS and cooperating agency "level 2" review, the attached DRAFT Section 368 Energy Corridor Region 2 Recommendations Report. This non-NEPA corridor revision recommendation report product is the result of the recent Section 368 West-wide Energy Corridor - Region

Please provide your review comments and suggested revisions within the attached document comment review form by COB Friday, April 16th, 2017. This provides a three (3) week review period.

Identified Region 1 "Level 2" reviewers include:

- Region 1 (AZ, CA, NV) BLM Field Office, District Office and State Office program and line management;
- Region 1 USFS Pacific Southwest Region program and line management as appropriate;
- BLM WO-200, WO-300 and WO-400 program staff;
- Region 1 cooperating agency program and line management within the FWS, BOR, NPS, BIA and DoD.

You have been previously notified through a recent calendar event of a planned Region 1 "Level 2" Review Webinar scheduled for this coming Wednesday, March 28th at 1:00 PM ET/11:00 AM MT/10:00 AM PT that will provide an overview of the Draft Region 1 Recommendation Report, address review coordinators' questions, and discuss the review process.

It is important note, that the Draft Report is comprised of five (5) separate file sets as follows:

Appendix A in Microsoft Excel (attached 12-KB file size) or accessed via the link below;
Appendix B - Part 1 as a PDF file (40-KB file size) or accessed via the link below.

Appendix B - Part 2 at a PDF file (84-MB to large to attach) to be accessed via the Box link below;
Revised CoVIDior Abstracts (various file sizes) to be accessed via the Box link below.

For Level 2 researchers who may experience ethical problems with receiving the large draft report attachment, all five file sets can be accessed and downloaded using Argonne National Laboratory's Box Inc. IBM Project file site at the following link:

<https://doi.org/10.1016/j.jmbs.2019.102500>

https://app.box.com/file/tjV722526234882q/Corridor_Abstracts

To ease your review and comment effort, please first focus your initial attention on Section 2, Section 3 and respective BLM State or USFS Corridor Recommendations. If time allows, review Section 1.0 which provides background on the 2008 Sec. 360 PEIS and RCD, subsequent lawsuit / settlement agreements.

After you've had a chance to familiarize yourself with the Draft Report, I believe you'll see the very comprehensive and high quality product that Argonne and the Region 1 Core Team has developed that is intended for use by Region 1 BLM / USFS land use planners in the future. We look forward to the n

Again, please provide your review comments using the attached comment form to me and/or Georgiann Smale, WFO Transmission / Sec. 368 Program Lead by COB Friday, April 14th.

If you should have any questions or need further assistance, please contact me as provided below, or contact Georgann Smale at (202) 912-7219 or Kimmie Wescott, Project Manager, Argonne NS, (616) 252-5788

Start with the Level 2 Review.

Hi Britta,

In mid-December we briefed Core Director Amy Lunden on the WMSO response and we are making a few adjustments to the annex response. We are also close to completing the GIS and user estimates.
The holidays have slowed us down a bit but submitting this response to your office promptly remains high on the priority list.
Thanks again for keeping this on your radar.
Happy New Year!

[REDACTED] part of our response. I appreciate you keeping it on your radar.
We have decided to go ahead and include the end user greenhouse gas emissions (GHG) estimates into the RMP and this effort is taking some time due to the complexity involved in generating current and forecast oil/gas production in our field office. We are close to having the production estimates sent to us.
With the upcoming holidays it may be a few weeks before we are able to have this done.
If you have any other questions I would be glad to answer them.
Thanks,
Chad

Hi Peter,
Just spoke with Don Bruckhiser, lead for the American Draft RMP. He indicated the contractor is in the process of inserting all the recommended changes for the WSA, he hopes to send the final draft version back to us for another review in approximately 2 to 3 weeks.
Let me know if you have questions.

Thanks,
Arlene

Hi Britta,
In mid-December we drafted State Director Arlene Lumbert on the WSA response and we are making a few adjustments to the review response. We are also close to completing the DMS and user estimate.
The holidays have slowed us down a bit but submitting this response to your office promptly remains high on the priority list.

Thanks again for keeping this on our radar.

No further at this time adding about the status of our response. I appreciate you keeping it on your radar.

We have decided to go ahead and include the end user greenhouse gas emission (GHG) estimate into the RMP and this effort is taking some time due to the complexity involved in generating current and forecast oil/gas production in our field office. We are close to having the production estimate sent to us.
With the upcoming holidays it may be a few weeks before we are able to have this done.
If you have any other questions I would be glad to answer them.

Thanks,
Chad

Follow up from Director's staff. Met with MMSL, WGLS, WGLS on Oct 9 to discuss trade with wilderness characteristics issue. Thanks again for meeting to discuss the Caribid briefing. As follow up, Chad will work with Britta and Nelson on updating the briefing information related to trade with wilderness characteristics information related to WGLS. Liability will also be included either verbally or in the powerpoint presentation. New Mexico to provide information in January for WGLS review. Checked with NM on 10/20/14 as status.

Britta

Here's what I know about the status of the WGLS issues that WGLS had raised in the Southwest OMBP. Field Office staff have directed the contractor to make the changes that WGLS had and Laine Tompkins of the MPTG had recommended.

Let me know if you need anything else.

Cohen, Ilana

Dec 20 (9 days ago)

Hi Nikki,

I think this package looks good. In the initial BLM section of the Order (on page 2), I would like to request the following change:

Replace this:

"BLM's 32 million-acre National Conservation Lands System."

With this:

"BLM's 35 million-acre National Conservation Lands."

Thank you,

-Ilana

On Dec 20, 2016, at 6:43 PM, Salt, Deborah <debsalt@blm.gov> wrote:

Nikki, Britta:

Thanks for the opportunity to review the BLM's response/strategy to the Secretarial Order signed by Secretary Jewell in October.

I see no red flags in the response/strategy. Surname is recommended from my perspective.

There may be future opportunities for us to also formulate ways to work with Tribes leading up to the 50th anniversaries of the Wild and scenic Rivers Act and National Trails System Act (2018) based on this SO; however, we are not prepared at this time to offer such an initiative in the response, given the imminent deadline. We could consider this idea as we develop our 50th strategies, as appropriate.

**NATIONAL
CONSERVATION
LANDS**

**May 2017
Monthly Hot Topic Snapshot
WO-410 RMP and EIS Review
Updated 05/08/17**

Chris McAlear
Acting Assistant Director
Assistant Director (WO-400)

RMPS AND PROJECTS WITH ISSUES TO ELEVATE/DIRECTORS PRIORITIES

- **Sonoran Desert National Monument PRMP-A/FEIS. Arizona.**
 - **Update:** Three week WO review anticipated to begin the week of May 15.
 - Amendment is focused on target shooting. **This amendment has a court ordered deadline.**
- **Grand Staircase-Escalante National Monument administrative draft MMP-A/DEIS. Utah.**
 - **No issues.**
 - **Update:**
 1. WO410 coordinated with the UTSO and WO210 about the use of "in balance" language and agreed the notice briefing paper and section 2.6.1 of the EIS would be updated to change the words "in balance" to "consistent with".
 2. GSENM clarified that per the MMP, nothing in the land use plan amendment prevents the use of livestock as a vegetation management tool.
 - WO410 surnamed DTS# 1471, NOA for the GSENM MMP-A/DEIS, on April 14. **NOA package has not reached WO400.**
- **Craters of the Moon National Monument Proposed RMP Amendment/FEIS. Idaho.**
 - **No issues.**
 - **Update:** It was agreed to move the amendment forward as-is.
 - **This amendment has a court ordered deadline** (ROD by July 2017).
 - DTS# 1515, NOA of the Craters of the Moon NM PRMP-A/FEIS was surnamed by WO410 on May 1. **NOA package has not reached WO400.**
- **DTS# 1527. NOA of the DRMP and DEIS for the Cedar City Field Office Planning Area. Utah.**
 - **Update:**
 1. Surnamed by WO410 on May 2. **NOA package has not reached WO400.**
 2. Received the response to WO comment on April 19. Provided feedback to WO210 on April 24 re: establishing WSA as ROW avoidance areas. Checking with WO210 to confirm acceptance of comment.
- **DTS# 1397. NOI to Prepare a Supplement to the Draft RMP for the Southern Nevada District Planning Area, comprising the Las Vegas and Pahrump Field Offices and Gold Butte National Monument. Nevada.**
 - **Update:** Surnamed by WO410 on April 24 (with edits). **NOI package has not reached WO400.**
 - WO410 met with the NVSO and WO210 on March 22 to discuss the combining of the plans and agreed the NOI package materials would be revised to include a specific section highlighting the public scoping and overall engagement process with a focus on parties interested in GBNM and will note the WO410/WO210/Nevada meeting held to discuss the planning approach.

- **DTS# 1542. NOI to Amend the RMP for the Ukiah Field Office, California and Prepare an Associated Environmental Assessment for the Berryessa Snow Mountain National Monument.** California.
 - Surnamed by WO410 on May 2. **NOI package has not reached WO400.**
- **DTS# 1560, Notice of Temporary Closure and Temporary Restrictions for the Burning Man event.** Nevada.
 - Surnamed by WO410 on April 18. **Notice package has not reached WO400.**
- **DTS# 1545. NOA of the Draft RMP and DEIS for the BLM Carlsbad Field Office, New Mexico.**
 - **Update:** WO210 is holding the NOA while the Carlsbad FO revisits the alternatives. Updates to the DRMP/DEIS will come to the WO for review.
- **DTS# 1401. NOA of the Boardman to Hemingway ROD.** Oregon.
 - **NOA package has not reached WO400.** NOA not routed at Division level.
 - WO410 provided updated language for NSHT for the ROD to the Project Manager and WO210 (Jan 12, 2017).
- **Section 368 Energy Corridor Region 1 draft review report.** Southern California, southern Nevada, and western Arizona.
 - **Update:** Checked in with WO301 to determine if follow up is needed re: WO410 comments (submitted April 14, 2017) or the updated conflict maps. WO301 indicated no follow up needed at this time.
 - **Issues:** The draft review report addresses National Trails in accordance with outdated policy. This issue has been addressed with WO301 with follow-up occurring.
- **Donlin Natural Gas Pipeline.** Alaska.
 - **No update.**
 - Meeting with BLM Alaska was held on February 27 to discuss State Patent lands of concern within the Donlin project, specific to the Iditarod National Historic Trail. Although it is not feasible to get a ROW reservation for affected townships, BLM Alaska is working to get comments into NEPA for the project, including mitigation for impacts to the NHT.
- ~~**Verde Transmission ADEIS.**~~ New Mexico.
 - **Issues:** Potential impacts to WSR and National Trails.
 - Proposed route crosses Rio Grande River. Eligible and suitable WSR streams in area including additional segments of the Rio Grande WSR.
 - Project would cross the Camino Real de Tierra Adentro NHT and Old Spanish NHT.
 - **Next milestone is review of ADEIS (TBD). Any review is to be coordinated through New Mexico as amendment is not on WO210 priority list for WO review.**
 - **Update:** Scoping Report is being prepared. Scoping indicates opposition to project.
- **Mancos Shale RMP-A NOI, Farmington, New Mexico.**
 - **Issues: Unknown** but WO410 is tracking because the RMP-A proposes to amend four decision types including lands with wilderness characteristics and will analyze potential impacts from oil and gas decisions to the Old Spanish NHT (RMP decisions for the NHT will not be made).
 - **As the RMP-A/EIS moves forward (alts development, impact analysis, etc.). WO410 will participate to ensure that the National Conservation Lands units are adequately considered.**

- **Update:** draft alternatives will be completed this summer. Public release of the DRMP/DEIS is not anticipated until calendar year 2018. NMSO will coordinate with WO210 on WO review.

UPCOMING BRIEFINGS (NEXT 30 DAYS)

- **Grand Staircase-Escalante National Monument administrative draft MMP-A/DEIS.** Utah.
 - **AD Brief TBD.** Staff pre-brief was held April 25.
 - **No issues.** 471,700 acres contain wilderness characteristics. The draft MMP did not specifically address management of lands with wilderness characteristics, however these lands receive incidental management in the following zones:
 - The primitive zone (281,800 acres) allows for an undeveloped, primitive, and self-directed visitor experience without mechanized or motorized access.
 - The outback zone (149,600 acres) is intended for an undeveloped, primitive, and self-directed visitor experience, while allowing motorized and mechanized access on designated routes. Facilities are rare and are provided only when needed for resource protection.
 - The remaining lands with wilderness characteristics (40,300 acres) are in the front country and passage zones which contain more facilities and are the focal points for visitation.
- **Cedar City DRMP/DEIS.** Utah.
 - **TBD.**
 - **No issues.** 259,975 acres contain wilderness characteristics (16 areas).
 - Prioritize other uses on 190,545 acres (73%) while not protecting wilderness characteristics based on mining claims with anticipated development and other resource management priorities, mainly multiple vegetation treatments for restoring habitat from pinion/juniper encroachment.
 - 69,430 acres (27%) would be managed to protect wilderness characteristics as a priority over other multiple uses. Protective allocations include VRM class II, ROW exclusion, NSO for leasable minerals, recommended withdrawal for locatable minerals.
- **Lewistown DRMP/DEIS.** Montana.
 - **TBD.**
 - **No issues.** 202,730 acres contain wilderness characteristics.
 - 1) Prioritize other uses on 70,000 acres while not protecting wilderness characteristics. Underlying prescriptions include open to mineral material sales, non-energy leasables, cross-country mechanized travel, fluid minerals with minor constraints (CSU), and livestock; limited to designated routes yearlong; 400 acres of ERMA prescription (potentially); and mostly VRM III.
 - 2) 30,000 acres would be managed to minimize impacts to wilderness characteristics while managing for other uses (13,000 acres of ACECs and approximately 15,000-20,000 acres where actions are in place to protect GRSG).
 - 3) 100,410 acres (49%) would be managed to protect wilderness characteristics as a priority over other multiple uses.
- **Carlsbad Field Office DRMP/DEIS.** New Mexico.
 - **TBD.**
 - **Issue:** Discrepancies in acreages for lands with wilderness characteristics was found in DRMP/DEIS and range from 24,072 to 41,772 acres. **Carlsbad FO is revisiting the alternatives.**

- **WSR rationale:** The Delaware River segment was not included in the Preferred Alternative because this area has been identified as an area with high oil/gas development potential. Portions of the Delaware River segment are currently leased for oil and gas development and are surrounded by state lands. Much of the Delaware River segment carries protective allocations associated with the proposed Gypsum Soils ACEC which is included in the Preferred Alternative C.
- **Rio Puerco PRMP/FEIS.** New Mexico.
 - **TBD.**
 - **No issues.** There are seven areas totaling 37,524 acres of wilderness characteristics.
 - 1) Prioritize other uses on 1,663 acres (4%) while not protecting wilderness characteristics.
 - 2) 6,920 acres (18%) would be managed to minimize impacts to wilderness characteristics while managing for other uses. Travel limited to designated routes, closed to leasable minerals, avoid for saleable minerals and ROW, minimizing impacts and requiring use of existing routes for forest product removal, and VRM III.
 - 3) 28,941 acres (77%) would be managed to protect wilderness characteristics as a priority over other multiple

 leasable and saleable minerals, no new ROWs, closed to forest product removal, and VRM II.
