[JUNE 13 COUNT.docx](#)
[July 20 duplicates and near duplicates.docx](#)

Here are the 3 papers that have the untotaled numbers - a screen shot from June 13 and from July 20, and a worksheet with numbers from the other, smaller uploads. The June 13 one has a small worksheet at the end showing counts from the smaller sets of sups and nds; the July 20 count of those was done by Brendan, and he has those figures, so the attachments do not show 100% of the count.

The count of number of units in each date set is not shown in these documents. I have it as 59,559 for Bears Ears; 104,618 for June 13; 10,343 for June 14-19; 206,372 for June 28, 47,197 for July 4 and 373,571 for July 20 = 801,660 total units.
