Forgot to ask Friday if you are working today, but if not for Wednesday - I went into the Bears Ears project to start pulling together comments on the marine monuments for NOAA, and saw this (below) under "Project Details", which doesn't make any sense to me at all. I know the system said the coders had finished Bears Ears, and the results were 25,276 comments in form letters and 33,800 individual comments. Nothing below matches this, and there are 2 archives shown, while I thought we were working from one.

Project name: Bears Ears
