Hi Bud,

There was a huge volume of information submitted. BLM only submitted factual: maps, RMPs, outreach information etc. Then there is current public comment and political input. A special share point was set up in the Secretary's office and they are responsible for creating packets.

Long story short, it would be a huge volume of stuff and I'm guessing the Secretary's office doesn't want any reports or synthesis of the information shared at this point.

We reviewed 19 Monuments, it was a very labor intensive. Hopefully the Monuments will get a fair shake.

State Directors:

On May 12, the BLM received a data call to respond to Executive Order 13792 directing the Secretary of Interior to review certain National Monument designations or expansions under the Antiquities Act. The timeline for this data call was extremely expedited; particularly for the Grand Staircase Escalante National Monument and Bears Ears National Monuments. The responses and assistance we received from the state offices including associate state directors along with monument managers and your staff from recreation, energy, minerals, GIS, and other programs is greatly appreciated. We wanted you to know the Secretary's office was extremely impressed and complimentary with the quality and timeliness of the information submitted by the BLM.

Thank you again for all your assistance and please extend our appreciation to all of your staff that assisted.
